

Robert W. Peterson

Spokane, WA | 2089950304 | rob.w.peterson@gmail.com

Summary

Systems Software Engineer with a strong background in hardware and software integration, seeking to transition into a Python Engineer role. Experienced in maintaining and enhancing systems library code and resolving complex customer issues. Proficient in Python and skilled in debugging and regression testing. Aims to leverage technical expertise to develop innovative solutions in Python engineering.

Skills/Languages:

- **Skills/Languages:** Debugging, C, Java, Perl, Python, Linux, BASH, VHDL/Verilog, Regression testing, Fast learner

PROFESSIONAL EXPERIENCE

Hewlett Packard Enterprise

Jan 2022 - Mar 2025

Systems Software Engineer (C/C++ and Python)

Remote

Maintained and enhanced systems library code for testing enterprise storage software. Root causing customer issues, and interfacing with multiple teams to assure product quality.

- Enhanced systems library code for testing enterprise storage software, improving testing efficiency and reliability
- Diagnosed customer issues and collaborated with multiple teams, leading to improved product quality and customer satisfaction

Hewlett Packard

Mar 2018 - Oct 2018

Engineering Contractor

- Aligned PCA designs with existing testing infrastructure support, ensuring seamless integration and improved testing efficiency
- Contributed to I/O PCA testing board design using Java and Python, enhancing the board's functionality and reliability

Boise State SOAR team

Aug 2017 - Oct 2017

Electrical Engineering Lead

- Led the design and testing of an atmospheric data recorder, ensuring compliance with project specifications and enhancing data accuracy
- Designed systems to meet NASA's engineering constraints using schematic capture and SPICE simulation, resulting in enhanced reliability and compliance.
- Resolved environmental operations issues, such as cold temperature challenges, by implementing robust testing protocols, improving system performance

Hewlett Packard

Apr 2011 - May 2017

ASIC Engineer

- Designed incremental improvements to existing IP, enhancing system performance and reliability
- Integrated third-party IP, including black-box components, to expand functionality and compatibility
- Performed IP validation and silicon characterization, ensuring compliance with design specifications and quality standards
- Supported the Firmware Team by resolving development issues and debugging requests, improving software integration and functionality

EDUCATION Highlights

Boise State University - Boise, ID

Present

Master of Science, Computer Science (ABET)

- **Coursework:** Machine Learning, Large-Scale Data Analysis, AI, Data Science

Boise State University - Boise, ID

May 2019

Bachelor of Science, Computer Science (ABET)

- **Coursework:** Data Structures, Capstone, Web Development, Operating Systems, Programming Languages

Boise State University - Boise, ID

Dec 2012

Master of Business Administration

- **Coursework:** International economics, Managerial accounting, Advanced financial analysis, Supply chain management, Business Law

Eastern Washington University – Cheney, WA

Apr 2011

Bachelor of Science, Electrical Engineering (ABET)

- **GPA:** Magna Cum Laude
- **Achievements:** Magna Cum Laude
- **Coursework:** Digital Signal Processing, Microcontrollers, VLSI

Washington State University – Pullman, WA

May 2007

Bachelor of Science, Mechanical Engineering (ABET)
