WORK EXPERIENCE

Automation and Control Specialists

Process Automation Consultant

Contracted to National Resilience, Inc. as Sr. MES Engineer

East Norriton, PA

July 2023 - Present

Jun 2024-Present

- Led the implementation and Kneat validation of new manufacturing process recipe within POMSnet MES.
- Overhauled MES reporting strategy, leading to an 80% improvement in development and CSV time.
- Supported SAP integration with MES via Boomi middleware.

Contracted to Johnson & Johnson as MES Engineer

July 2023-Jun 2024

- Led the modeling of 2 GMP manufacturing processes in Werum PAS-X, and provided functional testing expertise including draft and execution of 900-page commissioning test plan.
- Successfully automated the installation qualification of master data in Werum PAS-X, resulting in a 70% reduction in test execution time.
- Wrote complex SQL queries for manufacturing exception tracking, leading to a 40% reduction in exceptions.

Cognizant

Automation Engineer

Contracted to National Resilience, Inc. as MES Engineer

East Norriton, PA

January 2021 – July 2023

December 2021-July 2023

- Assessed feasibility of MES platforms including POMSnet, PAS-X, and Apprentice Tempo.
- Implemented 3 fully validated cell therapy manufacturing processes in POMSnet MES.
- Managed system integration between MES, LabVantage, and ERP, leveraging Boomi, REST APIs, ETL, and database transactions while providing documentation (requirements, design specifications, and test plans).
- Developed SQL based reports using Telerik report writer for MES data analytics and batch release.
- Collaborated with cross-functional teams and external vendors to enhance product quality and deliver production-ready solutions within 2-week agile sprint format.
- Meticulously documented complex code functionality and drafted over 200 pages of training procedures.
- Rapidly diagnosed root causes of complex software issues, delivering immediate solutions to meet SLA of 1-hour during manufacturing batches.

Contracted to Tmunity Therapeutics, Inc. as MES Engineer

January 2021-December 2021

- Designed and programmed .NET console application (C#, Selenium WebDriver) for automated testing of POMS MES workflow code.
 - Decreased required validation tester resources and timeline by over 70% via automated testing.
- Drafted test protocol templates and executed/reviewed over 700 IT-CSV test protocols for validation and SDLC of MES T-Cell manufacturing process.

Lam Research

Process Engineering Intern

Tualatin, OR

April 2019 – September 2019

- Led process feasibility study to improve single-tool manufacturing time by 10% via data analysis (DOE, JMP).

EDUCATION

Oregon State University

Bachelor of Science in Chemical Engineering | GPA: 3.89/4.0 | Summa Cum Laude

Corvallis, OR

June 2020

TECHNICAL SKILLS & CERTIFICATIONS

Technical Skills

- C#, .NET, Java, SQL
- XML, JSON
- MES, LIMS, S-88, ISA-95, GxP
- SDLC, CSV, Kneat, Veeva
- REST API
- Werum PAS-X, POMSnet
