Experience

Data Analyst – Tarkik Solutions: Washington, DC (Apr '23 – Mar '25)

- Ingested and cleaned large datasets by utilizing Smartsheet for data collection workflows and Excel for formula-based validation.
- Translated business requirements into data models and used Power BI to build interactive dashboards with slicers, filters, and visuals that improved cross-departmental data access.
- Built customized Smartsheet reports to track project metrics, automate updates, and share real-time insights.
- Conducted stakeholder meetings and requirement-gathering sessions, translating needs into actionable plans to support data initiative rollouts aligned with agency goals.
- Managed project lifecycles by coordinating development tasks, hosting stakeholder demos, scheduling releases, and setting up maintenance workflows to ensure efficient delivery and sustainability of data solutions.

Business Analyst – Brilliant Corporation: Reston, VA (Apr '22 – Sept '22)

- Reviewed and cross-referenced sensitive documents using standardized checklists and version control practices to ensure data accuracy and confidentiality for clients across 5+ sectors.
- Designed Excel-based tracking systems with formulas, filters, and conditional formatting to monitor the location and status of 8,000+ documents, streamlining management and retrieval.
- Created ad-hoc reports by querying data sources, applying custom filters, and summarizing key metrics to deliver actionable insights that supported timely project decisions.

Escalations Specialist – ID.me: Mclean, VA (Aug '20 – Apr '22)

- Used Zendesk to manage and prioritize fraud-related support tickets, ensuring accurate documentation and timely resolution of security-sensitive cases.
- Utilized Jira to monitor identity verification workflows and Confluence to document fraud case updates, ensuring secure and consistent handling of sensitive information.
- Applied secure troubleshooting protocols via email, phone, and Zoom to resolve identity authentication issues and prevent unauthorized access.
- Supported early company growth by streamlining fraud handling processes and consistently delivering secure, accurate resolutions in high-risk cases.

Certificates

- Google Data Analytics Professional
- Certified Scrum Master (CSM)

Education

- Associates in Network and System Administration: Stratford University (Mar '16 – Jun '18)
