EDUCATION

Arizona State University Aug 2023 - May 2025
Master of Science in Computer Science, **4.28/4.00** Tempe, AZ
Courses:- **Distributed Software Development, Cloud Computing, Distributed Databases, Mobile Computing, Generative AI, Deep Learning.**

Birla Institute of Technology and Sciences, Pilani Aug 2016 - May 2020
Bachelor of Engineering in Electrical and Electronics Engineering India
Courses :- **Object Oriented Programming, Data Structures and Algorithms, Probability and Statistics, Linear Algebra, Computer Programming.**

SKILLS

- Languages: **Python, Java, C++, Javascript, Typescript, Golang, SQL.**
- Front End Tools: **NextJS, ReactJS, AngularJS, JQuery, Zod, Shadcn, EJS, HTML, CSS, Bootstrap, TailwindCSS.**
- Back End tools: **Django, Springboot, NextJS, NodeJS, ExpressJS, Rest API, Flask.**
- Databases: **SQL, NoSQL, PostgreSQL, MongoDB, Mongoose, Apache Spark, SparkSQL, Hadoop.**
- Other: **Git, Mercurial, GCP, AWS, Linux, CI/CD, Docker, Jenkins.**

WORK EXPERIENCE

Software Engineer Intern September 2024 onwards
Lasaria Remote, US
• Developed real-time chat functionality featuring one-to-one and group chats using **WebSocket APIs**, with message encryption and offline support. Implemented media sharing via **AWS S3** and push notifications.
• Optimized DB performance using **AWS DynamoDB** and **indexing**, slashing retrieval time by 90%.
• Streamlined user authentication with **OAuth (AWS Cognito)**, microservices (**NodeJS**), **JWT** tokens, boosting efficiency by 40%.
• Enhanced app functionality through API endpoints (**AWS Lambda**), front-end improvements (**ReactNative, Figma, Expo**), driving a 30% increase in engagement.

Software Engineer Intern May 2024 - Aug 2024
Softpoint LLC Scottsdale, AZ
• Designed a TCP server for high-traffic **CRUD** operations using **Django** and **PostgreSQL**, handling over 10,000 requests per minute.
• Developed a reverse proxy with **Django** middleware to ensure secure sequential database access and avoid conflicts.
• Built an interactive web application with **Django** and **React**, reducing user session duration by 90%.

Senior Software Engineer Nov 2022 - July 2023
Lens Caravan Delhi, India
• Led backend development with **Django**, architecting robust **REST APIs** for order management and processing.
• Integrated payment systems like **Stripe** with **Django** and implemented WebSocket-based real-time transaction tracking.
• Enhanced database performance through advanced **Django ORM** techniques and query optimization.

Software Engineer - II Jan 2021 - Oct 2022
Aristocrat - Big Fish Games Gurugram, India
• Crafted slot games (**Async JS, PHP, cocos-2dx, Docker, Jenkins**) for **1.5M+** global users.
• Conducted requirement analysis and **LLD**, elevating engagement by **15%** with Winterland, the most **advanced community** game.
• Spearheaded **award-winning game development**, receiving **Golden Play Button Award** for **highest impact in 2022**.
• Augmented game performance by **30%** through **code refactoring** and **asset optimization**, ensuring smooth gameplay.

PROJECTS

Optimized Elastic Face Recognition System on AWS (Class)
• Conceptualized scalable video analysis pipeline using **AWS Lambda** and **Docker**, reducing image processing time by 40% and enabling efficient storage in **Amazon ECR**.
• Implemented **multi-stage processing** with **FFmpeg** for video splitting and **ResNet-34 CNN** for face recognition.
• Utilized **AWS S3** for seamless data flow and **Lambda functions triggered by S3 events** for automated processing.
• Improved performance and cost by **fine-tuning Lambda memory and timeout settings**, reducing execution time by 30%.

LLM-Powered Medication Reminder System with Twilio Voice & SMS Integration (Personal)
• Built a voice-based medication reminder system using **Node.js** and **Twilio**, supporting **100+ concurrent users** via automated voice and SMS alerts.
• Integrated an **LLM-powered conversational agent** to interact with patients in natural language, enhancing engagement and response accuracy.
• Achieved **100% adherence tracking** by capturing and logging patient responses through Twilio's speech-to-text and storing in MongoDB.
• Leveraged Twilio's Answering Machine Detection to optimize voicemail delivery, with **<1s average response latency** after beep.
• Added SMS fallback for failed voice interactions, ensuring **99% message delivery coverage** across common edge cases.
