PROFESSIONAL SUMMARY

Experienced Full-Stack Java Developer with 4+ years of expertise in designing, developing, and deploying scalable web applications and microservices.

- Proficient in Java (8/11/17) and Spring Framework, including Spring Boot, Spring MVC, and Spring Security, with extensive experience in RESTful APIs and microservices architecture.
- Expertise in developing secure, high-performance applications for financial services using technologies such as JWT, OAuth2, and Spring Security.
- Strong background in database optimization, with hands-on experience in SQL (MySQL, PostgreSQL) and NoSQL (MongoDB), utilizing Hibernate and JPA for data mapping and ensuring efficiency in data processing.
- Built and deployed event-driven microservices using Kafka and integrated Apache Kafka for real-time data streams, ensuring high throughput in financial systems.
- Applied cloud-native solutions with AWS services (EC2, RDS, S3), enabling scalable, fault-tolerant applications with automatic scaling and load balancing.
- Implemented CI/CD pipelines using Jenkins, Docker, and Kubernetes to streamline build, test, and deployment processes, enhancing operational efficiency.
- Experienced in front-end development using React.js and Angular 12+, integrating with back-end services to create dynamic, responsive user interfaces.
- Developed real-time data dashboards and integrated APIs with Power BI for business stakeholders to visualize KPIs, timelines, and other crucial metrics.
- Strong advocate of Agile methodologies, with active participation in sprint planning, code reviews, and retrospectives to deliver high-quality solutions aligned with business goals.
- Maintained adherence to security and compliance standards, particularly in payment processing and financial risk management systems, ensuring PCI-DSS compliance.

PROFESSIONAL EXPERIENCE

First Bank | Full-stack Java Developer

Aug 2024 - Present

- Develop and deploy highly scalable microservices using Java 17 and Spring Boot, ensuring high availability and reliability for core banking applications and financial services.
- Design and optimize RESTful APIs for seamless backend-to-frontend integration, facilitating real-time transaction processing and improving user experience across banking platforms.
- Integrate Spring Security to safeguard banking transactions, implementing JWT-based authentication to enforce secure, role-based access control in financial applications.
- Utilize Hibernate and JPA to streamline data mapping for complex banking operations, ensuring accurate, efficient data management in transaction processing systems.
- Build and deploy event-driven microservices using Apache Kafka, enabling real-time processing of financial data streams, improving accuracy, and enhancing event-driven workflows.
- Used AWS services (EC2, RDS, S3) to design a cloud-based architecture that supports scalability, fault tolerance, and high availability, ensuring optimal performance for banking operations.
- Optimize SQL queries and stored procedures in MySQL, boosting transaction processing speed by 35%, critical for high-volume financial systems.
- Automate CI/CD pipelines with Jenkins and Docker, ensuring faster, error-free deployments of financial applications while maintaining strict version control in a regulated environment.
- Develop and maintain financial risk management systems, including real-time fraud detection algorithms and secure payment processing modules, ensuring compliance with PCI-DSS regulations.
- Implement Redis caching to reduce the load on backend databases, resulting in a 20% decrease in response times for high-volume transaction processing and account inquiries.
- Conduct comprehensive compliance checks, ensuring all transaction systems adhere to banking industry regulations and meet internal security standards.
- Collaborate closely with banking compliance teams to ensure the secure handling of financial data, integrating features like encrypted data storage and secure payment gateways.
- Work in Agile/Scrum environments, participating in daily stand-ups, sprint planning, and retrospectives to deliver high-quality features aligned with business goals and customer needs.

Accenture | Software Engineer

Oct 2020 - Dec 2022

- Collaborated with Project Managers and Technical Leads to analyze and understand project requirements, delivery models, and system architectures, ensuring seamless alignment of software solutions with business objectives.
- Developed and optimized RESTful APIs and microservices using Java and Spring Boot, driving scalability, performance, and modularity. Enhanced API response times by reducing latency and significantly improving data retrieval efficiency.
- Engineered reusable Java components to streamline reporting processes, reducing development overhead and accelerating feature deployment by 20%.
- Analyzed system and project performance to identify bottlenecks and inefficiencies. Implemented data-driven optimizations that improved project success rates by 25% and enhanced overall system reliability and stability.
- Actively participated in Agile methodologies, contributing to sprint planning, code reviews, and managing CI/CD pipelines for continuous integration and seamless deployment of high-quality features.

- Developed and maintained dynamic front-end components using Angular 11/12, integrating with back-end services to create an interactive and responsive user interface.
- Built automated ETL pipelines using Python and SQL for real-time data processing and developed interactive Power BI dashboards, enabling stakeholders to track KPIs, timelines, and project risks for data-driven decision-making.

Genesis Solutions | *Java Developer*

May 2019 - Sep 2020

- Developed Java-based web applications using Spring MVC and Spring Boot, ensuring high-performance and modular architecture.
- Designed and implemented RESTful APIs for seamless communication between distributed services, optimizing data exchange.
- Utilized Hibernate ORM to manage database interactions, enhancing data retrieval efficiency and reducing query execution time.
- Built and maintained multi-threaded applications, leveraging Java concurrency utilities to optimize performance for high-load processing.
- Developed JSP/Servlet-based UI components, integrating with front-end technologies such as HTML5, CSS3, and JavaScript.
- Integrated Angular 8 for dynamic, single-page front-end applications, ensuring seamless user interaction with backend services.
- Wrote complex SQL queries and stored procedures, optimizing relational database performance for high-traffic systems.
- Applied Java design patterns like DAO, Singleton, and Factory Pattern to create a scalable and maintainable codebase.
- Conducted unit testing using JUnit and ensured application reliability through rigorous debugging and Log4J-based logging mechanisms.
- Followed Agile methodology, participating in scrum meetings, sprint planning, and continuous integration (CI/CD) workflows.
- Deployed and managed applications on Apache Tomcat and ensured seamless integration with Oracle databases.

TECHNICAL PROFICIENCY

- **Languages:** Java (8/11/17), SQL, Python, JavaScript (ES6), TypeScript
- **Frameworks:** Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, Apache Kafka
- **Front-End:** React.js, Angular 12+, HTML5, CSS3, JavaScript (ES6+), Redux, Node.js
- **Cloud Technologies:** AWS (EC2, RDS, S3), Docker, Kubernetes
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis
- **Tools & Technologies:** Jenkins, Maven, Git, Log4J, JUnit, Postman, Power BI, Jira, Confluence
- **Methodologies:** Agile (Scrum), CI/CD, TDD
- **Others:** JWT, OAuth2, Kafka, Microservices Architecture, Event-driven Architecture, Payment Processing, PCI-DSS

Projects

Educational Certificate validation using blockchain

- Developed a decentralized Ethereum blockchain-based solution for educational certificate validation, reducing the risk of counterfeit certificates and human verification errors by 95%.
- Designed an intuitive front-end interface using React, allowing institutions and employers to seamlessly verify certificates without requiring blockchain expertise.
- Implemented Solidity smart contracts to automate the issuance, verification, and revocation of certificates, ensuring 100% tamper-proof validation.
- Utilized Truffle as the development framework to enable rapid prototyping and testing of smart contracts.
- Reduced certificate verification time by 80% by enabling safe, real-time validation.

Movie Ticket Booking

- Created a user-friendly, interactive web application for buying movie tickets, featuring seat selection, movie options, and location selection.
- Deployed the application using Elastic Beanstalk on AWS, ensuring scalability and reliable performance.
- Implemented a caching mechanism using Redis to optimize frequently accessed queries, reducing database load and improving page load speed by 40%.
- Connected the application to an Amazon RDS-hosted MySQL database, leading to a 25% reduction in query response times and faster data retrieval.
- Developed a smooth, secure Stripe payment interface, which improved payment dependability and reduced transaction failures by 30%.

Reducing Noise Based on Dynamic User Interests in Web Data

- Developed and implemented the Reduce Web Data Noise (RWDN) algorithm to filter irrelevant content based on dynamic user interests, improving content relevance.
- Utilized K-means clustering and time-series analysis to track and adapt to user behavior, leading to a 20% increase in engagement and a 25% reduction in bounce rate.
- Developed a real-time data pipeline using Kafka to handle high-velocity user interaction data, enabling continuous adaptation to evolving user preferences.
- Achieved 30% reduction in irrelevant content, enhancing the accuracy of content recommendations.
- Evaluated model performance using precision (85%) and recall (75%), ensuring effective noise reduction without losing valuable information.
- Integrated SQLite for efficient data storage and real-time querying of user interaction data.

EDUCATION

University of Missouri-Kansas City
(GPA: 3.85)

Jan 2023 - Dec 2024

Gandhi Institute of Technology and Management

2016 - 2020
