

ROHITH KUMAR KOLEPAKA

📍 Denton, TX 76210 📞 +1-940-268-3143 ✉ rohithkk0909@gmail.com 🌐 <http://www.linkedin.com/in/rohith-kolepaka-8331a3210>

PROFESSIONAL SUMMARY

- Experienced Business Analyst with over 5 years of extensive experience in Business Analytics, Stakeholder Management, Agile Methodologies, and Data Analytics, US Healthcare. Proficient in Python, SQL, Power BI, Tableau, PowerPoint, Excel. Exceptional organizational skills, project management and leadership skills that will assure project success.
- Proficient in requirements gathering, functional analysis, and agile methodologies. My accomplishments include leading successful projects resulting in Bad Debts Saving of \$1.5M, reducing Unapplied Cash by \$96m, implementing multiple automated Robots in process resulting in high savings to the company. I possess strong analytical skills, excellent communication skills, and meticulous attention to detail.
- I am a dynamic individual with an excellent understanding of business process management with skills inclusive of Business Data Analysis, Operational Excellence, Process Improvement, Healthcare Data Analysis, Statistical Analysis, Accounts Receivables Management, Order to Cash, Denial Management, Billing and Collections, Revenue Cycle Management.
- Experience as a Data Analyst with good knowledge and expertise in all phases of SDLC methodology, including creating and maintaining data mapping documents and artifacts.
- Experience in the payer and health plan industry, including projects involving enrollment and billing, claims processing and adjudication, member/customer support, member care management, and wellness processes.
- Experience in preparing, analyzing, and distributing standardized monthly data operational reports and ad-hoc analysis for operations leadership.
- Technical expertise in Excel/PPT, Power BI, Tableau, Google Analytics, Adobe Analytics, SPSS, ArcMap, SQL, VBA, SAS, and Salesforce.
- Expertise in creating numerous artifacts such as Business Requirement Documents (BRD), Functional Requirement Documents (FRD), and writing and maintaining Test Matrices and Requirements Traceability Matrices.
- Expertise in conventional and non-conventional requirement elicitation techniques such as Joint Application Development (JAD) sessions, brainstorming, document analysis, project meetings, prototyping, questionnaires, focus groups, and interviews.
- Experience in creating Product Backlogs, Sprint Backlogs, and facilitating sprint planning and review meetings.
- Performed planning and development of Test Plans, Test Cases, and Test Scenarios to meet product business and solution requirements.
- Expertise in data analysis, including data profiling, data mapping, and data validation, to ensure data integrity and accuracy.
- Experience in data analysis and data visualization using Tableau/Microsoft Power BI, Visio model building with machine learning algorithms for prediction and forecasting using data and using statistical tools like SAS and R for data mining using Python and SQL.
- Experience in Data Extraction/Transformation/Loading (ETL), Data Conversion, and Data Migration using Microsoft SQL.
- Experienced in conducting user acceptance testing (UAT) and supporting end-users in adopting new systems and processes.
- Experience in claims adjudication, migration, provider eligibility, and prior authorization for Medicaid and Medicare programs.
- Developed use cases and user stories that capture functional and non-functional requirements.
- Experience in performing gap analysis, root cause analysis, risk analysis, and impact analysis to define boundaries, identify issues, minimize costs, and optimize solutions.
- Advanced knowledge of Agile frameworks, especially Scrum; skilled expertise in Sprint Planning, Sprint Review, Sprint Retrospective meetings, and Product Backlog Refinement
- Proficient in utilizing Microsoft Visio for creating and modifying diagrams, flowcharts, organizational charts, and other visual representations.
- Expert in writing SQL queries and optimizing them in Oracle and SQL Servers.
- Experience in designing SQL queries using joins, sub-queries, functions, indexes, views, materialized views, set operators, group by, and OLAP functions.
- Worked on complex ad-hoc SQL queries using joins, DML, DDL, pivots, views, constraints, and functions with Oracle, MS SQL Server, and MySQL.
- Experienced in working with Jira software, including creating and managing projects, workflows, custom fields, dashboards, and reports.
- Expertise in advanced MS Excel (G Suite, Sheets), PowerPoint, spreadsheets (Pivot Table & Pivot Charts, Macros, VLOOKUP)

ACADEMIC QUALIFICATIONS:

Master of Science: Information Science (Information Systems),
University of North Texas - Denton, TX

May 2024

GPA: 3.7/4.0

Bachelor of Engineering Technology: Electronics and Communication,
MLR Institute of Technology - Hyderabad, India

May 2020

GPA: 6.78/10

TECHNICAL SKILLS

Databases & Database Tools	MS AND SQL servers Oracle MS Access, My SQL, SAP, SAP S/4 HANA
Reporting Tools	Tableau, Power BI, Alteryx
Programming Languages	Base SAS, SQL, PL/SQL, Python
ETL Tools & Others	MS Office, SharePoint, SPSS, Visio, Python, R, SAS
Data Modeling	Logical Model, Conceptual Model, Physical Model, Star-Schema Modeling, Snowflake Schema, FACT & Dimension
MS Tools	Word, Excel, Project, Visio, PowerPoint, Access

PROFESSIONAL EXPERIENCE:

Client: Poolcorp

Jan 2023 - Present

Role: Business Data Analyst, Operational Excellence

Responsibilities:

- Worked as a **Data Analyst** in **Operational Excellence, Customer Experience and Quality** and driving multiple projects for different clients.
- Worked on a project to understand **Productivity Variations** amongst employees and was able to determine factors contributing to the deviations and identified the issues and recommended solutions resulting in **Production Improvements by 15-22%**.
- Extensive collaboration with Operations team across different lines of business to **Improve Productivity and Increase EBIDTA**.
- Addressed and resolved incidents reported by users and escalating complex issues to **Scrum Masters** or **Project Leaders** as necessary.
- Managed navigation of migration paths, overseeing the **Change Control Process/Governance**, and handled ticket management processes effectively.
- Load the **Source-To-Target Mapping** documents from source systems into the enterprise data warehouse.
- Collaborate with the **ETL team** to ensure the source-to-target mapping documents are in correct ETL code.
- Ensure the **ETL code aligns with STM** requirements.
- Perform data validation, to insure correct data movement into the enterprise **Data Warehouse Architecture**.
- Consult with reporting teams to develop a general understanding for the **Data Warehouse Model** / optimal ways to use it.
- Possess optimal knowledge for concepts and frameworks for **Data Warehousing, ETL, and BI Architectures**.
- Implemented a strategic data integration solution that streamlined operations and saved the company **~\$200k** annually.
- Identified inefficiencies in current processes related to documentation maintenance for audit and the response time taken by the team and implemented changes that led to significant decrease in **TAT resulting in 20-30% less time** for the response of the final audit and led to cost savings with **Productivity Improvements by around 10%**.
- Experience in preparing, analyzing, and distributing standardized **Monthly Data Operational Reports** and ad-hoc analysis for **Operations Leadership**.

- Assisted in the **Planning, Analysis, Design, Implementation, and/or Maintenance** of operational analytic data sources, reports, and tools.
- Orchestrated cross-functional collaboration among **Data Architects, Developers, and Business Stakeholders** to conceptualize, engineer, and deploy scalable, secure, and high-performance BI solutions.
- Oversaw activities pertaining to **Data Collection, Analysis, Synthesis, And Narrative Development** to support project deliverables and presentation content for clients.
- Collaborated closely with the **product owner in creating and grooming user stories** and prioritizing project tasks for sprint goals.
- Gathered requirements through brainstorming sessions, focus groups, observations, and interviews with **Subject Matter Experts (SMEs), stakeholders, and business users**.
- Used **JIRA for product and sprint backlog management**, dashboard reports creation and themed **user stories** to effectively sort and filter for reporting.
- Responsible for the creation of **EPICs**, writing **user stories**, defining **acceptance criteria** and estimating the level of effort with the scrum team for the completion of the **user stories**.
- Collaborated with the **scrum master** in conducting scrum ceremonies including **sprint planning, sprint review and sprint retrospective sessions**. Participated in daily **stand-up meetings** to assist the **scrum** team in removing roadblocks.
- Performed BPM using **gap analysis of asset movement process** to analyze and document existing business flows and to check the compatibility of the **existing AS-IS** system infrastructure with the **new TO-BE** business requirements.
- Analyzed business data for all regions of the province, report sales, PPT production using **EXCEL (Pivot tables, VLOOKUP, other calculation formula, etc)**, PowerPoint.
- Assisted in the **planning, analysis, design, implementation, and/or maintenance** of operational analytic data sources, reports, and tools.
- Collaborated with the **product owner** to create PBIs (Product Backlog Items) and stakeholders to conduct user story-writing workshops.
- Developed key performance indices and designed operational control dashboards using **SQL and Tableau** to provide operation team members with real-time actionable data.
- Used **python packages (Pandas, Numpy, Scikit learn)** for feature engineering and machine learning models.
- Used **machine learning algorithms (Logistic regression as Baseline Model)** to analyze the user demographics and trends.
- Experienced in **data cleaning, transformation, and preparation** within **IBM-SPSS** to ensure data quality and accuracy for analysis.
- Proficient in creating **clear and effective visual representations of data**, including charts, graphs, and histograms, using **IBM-SPSS**
- Reviewed payer reports and identify trends across contracts, patient populations, practices, and physicians.
- Maintained all tables in the System, i.e., procedure charge-map, procedure name, payer, and cost, when requested.
- Worked on developing the business requirement and using cases for FACETS batch process, automating the billing entities and commission process.
- Followed **AGILE methodology and created User Stories**, assisted the business analyst in creating Product backlog, sprints and sprint backlog.
- Assisted in the meetings with the technical team as well as the clients regularly to assess the current process and how it could be changed in making a better proposed process.
- Worked on member enrollment processing and member enrollment module.
- Collaborated closely with QA to ensure accurate translation of **requirements documentation into test plans** and test cases. Conducted **sanity testing, functional testing, integration testing, and UAT**, providing assistance as needed to ensure comprehensive testing coverage.
- Led the documentation efforts for **use cases, translating them into Business Requirement Documents (BRD) and Functional Requirement Documents (FRD)**. Took full ownership of documenting waterfall artifacts.
- Worked extensively on functional and technical specifications and mapped the process using MS Office (**Word, Excel, Access, Visio**).
- Performed **data analysis and data profiling using complex SQL** on various source systems.
- Utilized advanced features like **Tableau, Power BI** software like linking data from different connections together on one dashboard and filtering data in multiple views at once.
- Provided **business intelligence analysis to decision-makers using an interactive OLAP tool**.
- Designed and implemented basic **PL/SQL** queries for testing and report/data validation.
- Created **SAS Datasets, Data manipulation**, and developed datasets for the preparation of reports, tables & graphs.
- Created **SQL statements (select, insert, update, delete)** and stored procedures.
- Worked on **SQL Server Integration Services (SSIS)** to integrate and analyze data from multiple heterogeneous information sources (Oracle).
- Monitored the Data quality and integrity of data maintained to ensure the effective functioning of the department.
- Developed and maintained **stored procedures and implemented changes to database design, including tables and views**.

- Analyzed State Medicaid payment systems requirements and worked with development team to implement regulatory changes into payment systems.
- Extensively used SSIS transformations such as Derived column, Data conversion, SQL task, Script task and Send Mail task, Data Flow task etc.
- Participated in determining the appropriate configuration of the claims payment process in the appropriate subsystem of the claim payment information system in conjunction with health plan.
- Conducted **ad-hoc data analysis requests and provided insights** to address specific business challenges.
- Identified **Key Performance Indicators (KPIs) and developed reports and dashboards** for monitoring and tracking performance.

Client: Genpact Pvt Limit, India

May 2020 –Jul 2022

Role: Business Analyst

Genpact Limited - Registered on NASDAQ is a professional services company with its headquarters in New York City, New York. The company currently employs more than 125,000 people and provides services to clients in over 30 countries worldwide.

- Responsibility towards identifying automation opportunities and working closely with **Platform Solutions Group** to execute those opportunities to improve **Service, Quality, and Customer Experience** enabling improvement in productivity and profit margin for the client.
- Responsible for execution of **Project Life-Cycle** including **Scope Definition, Business Requirements, Quality Assurance (QA) Testing, User Acceptance Testing (UAT)**, implementation and post-mortem analysis.
- Expertise in conventional and non-conventional requirement elicitation techniques such as **Joint Application Development (JAD)** sessions, brainstorming, document analysis, project meetings, prototyping, questionnaires, focus groups, and interviews.
- Conducted in-depth **Data Analysis** using **SQL and Python** to identify trends, issues, and opportunities within the healthcare domain.
- Developed and implemented **Procedures and Workflow** for gathering and writing **Business Requirements**, working with subject matter experts and interacting with **Application Development** team.
- Coordinated and led **Cross Functional Upgrade** and enhancement projects involving **Application Development, Business Excellence**.
- Expertise in writing **Request for Proposals (RFP), Statement of Work (SOW), and Standard Operating Procedures (SOP)**, conducting **JAD sessions**, creating **Use Cases, Workflows**.
- Experienced in performing **Gap Analysis** by identifying existing technologies, documenting the enhancements to meet the end-state requirements and preparing **Business Requirements Documents, Functional Requirement Documents**.
- Utilized **Agile Software Methodology** using **Scrum Framework** and act as a liaison between business stakeholders and IT teams, translating business requirements into technical solutions and vice versa.
- Experience in creating **Product Backlogs, Sprint Backlogs**, and facilitating sprint planning and review meetings.
- Analyze data to draw insights and support **Decision-Making Processes** using tools and techniques such as **SQL Queries, Data Visualization, and Statistical Analysis** to interpret data and present findings.
- Collaborating with **Data Scientists and Analysts** to understand data requirements. **Cleaning, Transforming, and Aggregating** data for analysis and reporting. Ensuring data quality and integrity through validation and testing processes.
- Identify and mitigate **Potential Risks** and issues that may impact project scope, timeline, or budget and Develop Contingency Plans and strategies to address risks proactively.
- Expertise in creating numerous artefacts such as **Business Requirement Documents (BRD), Functional Requirement Documents (FRD)**, and writing and maintaining **Test Matrices and Requirements Traceability Matrices**.
- Used **JIRA** for product and sprint backlog management, dashboard reports creation and themed user stories to effectively sort and filter for reporting.
- Experienced in working with Jira software, including creating and managing projects, workflows, custom fields, dashboards, and reports.
- Experience in designing **SQL queries** using joins, sub-queries, functions, indexes, views, materialized views, set operators, group by, and OLAP functions.
- Worked on complex ad-hoc SQL queries using joins, DML, DDL, pivots, views, constraints, and functions with **Oracle, MS SQL Server, and MySQL**.

- Collaborated with the scrum master in conducting scrum ceremonies including **Sprint Planning, Sprint Review** and **Sprint Retrospective Sessions**. Participated in daily stand-up meetings to assist the scrum team in removing roadblocks.
- Performed planning and development of **Test Plans, Test Cases, and Test Scenarios** to meet product business and solution requirements.
- Experience in data analysis and data visualization using **Tableau/Microsoft Power BI, Visio** model building with machine learning algorithms for prediction and forecasting using data and using statistical tools like SAS and R for data mining using **Python and SQL**.
- Experience in **Data Extraction/Transformation/Loading (ETL), Data Conversion, and Data Migration** using Microsoft SQL.
- Writing **Complex SQL queries in Teradata** to pull the records with data issues reported by the users using complex joins, partitions, ordered analytical functions, aggregate functions etc.
- Implementation of **Agile Framework** (SDLC) using Scrum methodology in **Payer** domain.
- Conducted thorough data cleaning processes to address **Missing Values, Outliers, Duplicates**, and **Inconsistencies** within datasets, ensuring data accuracy and integrity before analysis.
- Create innovative executive **Dashboards, Scorecards**, and **Weekly/Monthly Reports** on the status of key business measurements using Tableau features such as such as parameters, sets, calculated fields and table calculations, user filters, action filters and applying advanced technical charts.
