OBJECTIVE

Entry-Level **Software Engineer** with strong foundations in **Java, Python, and SQL**, passionate about building scalable backend systems and contributing to collaborative software teams. Experienced in **Spring Boot, RESTful API design, debugging, and Agile development**. Seeking a Software developer role to design efficient software solutions, learn from senior engineers, and grow in a culture of innovation and professional excellence.

EDUCATION

Cleveland State University, Cleveland, OH

Jan 2024 – Dec 2025 (Expected)

Master of Science in Computer Science, GPA: 3.48

Relevant Coursework: Software Architecture & Design, Distributed Systems, Machine Learning, Database Systems, Algorithms

Vellore Institute of Technology, Amaravati, India

Aug 2019 – May 2023

Bachelor of Technology in Computer Science and Engineering

Relevant Coursework: Object-Oriented Programming, Data Structures, Algorithms, Database Management, Software Engineering

SKILLS

Languages: Java, Python, JavaScript, SQL, HTML, CSS

Frameworks & Tools: Spring Boot, Hibernate, Maven, Git, Docker, Jenkins, React (familiar)

Databases: MySQL, PostgreSQL, MongoDB

Concepts: REST APIs, Object-Oriented Design, Debugging, CI/CD, Agile (Scrum), SDLC

EXPERIENCE

Open Source Contributor

Aug 2019 – Dec 2020

Remote

- Built and maintained backend modules using **Java (Spring Boot)** and **Python**, improving API reliability and scalability.
- Designed and optimized SQL queries, reducing database response times by 15%.
- Implemented CI/CD pipelines using **Maven, Jenkins, and GitHub Actions** to automate builds and deployments.
- Collaborated in Agile sprints, reviewed code, and contributed to documentation for open-source projects.

PROJECTS

Bank Chatbot Application

2025

Java, Spring Boot, Python (FastAPI), SQL, Docker, AWS

- Developed a **Spring Boot backend** integrated with a Python NLP microservice for intelligent customer support.
- Created secure RESTful APIs and managed data persistence using **AWS RDS**.
- Automated deployment with Docker and integrated CI/CD pipelines for continuous delivery.
- Collaborated in Agile environment, writing test cases and debugging services to maintain 99% uptime.

Dynamic Price Modeling API

2024 – 2025

Python, Flask, SQL, Redis, AWS

- Built a forecasting API for real-time price predictions, improving model accuracy by 20%.
- Implemented caching with **Redis** and query optimization to reduce response latency by 25%.
- Deployed the solution on AWS with automated testing and CI/CD integration for high availability.

Online Auction System

2023

Java, Spring Boot, MySQL, Hibernate

- Designed backend APIs for user registration, listing, and real-time bidding with concurrency control.
- Applied transaction management, ensuring data consistency under simultaneous bid submissions.
- Performed integration and unit testing using **JUnit**, achieving robust system performance.
