

ROHITH REDDY MARADE

Full Stack Python Developer

+1 7819644040 | rohithmarade@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

- Full Stack Python Developer with 5 years of experience delivering scalable, secure solutions for banking, finance, and healthcare sectors.
- Proficient in architecting microservices and REST APIs with FastAPI, Django REST Framework, and Flask.
- Skilled in building modern, responsive frontends with React and seamless API integrations using Bootstrap.
- Experienced with relational and NoSQL databases including PostgreSQL, SQL Server, and MongoDB with strong data modeling, migrations, query optimization.
- Strong background in cloud deployments on AWS ECS using Docker and Terraform with CI/CD automation through GitHub Actions.
- Adept in event-driven and asynchronous systems using Apache Kafka and Celery with monitoring and troubleshooting in Grafana and structured logging.
- Collaborative team player in Agile and Scrum working with cross-functional teams and driving process improvements using JIRA and Confluence.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, HTML, CSS

Backend Technologies: FastAPI, Django REST Framework, Flask, RESTful APIs, Pydantic, Marshmallow, SQLAlchemy, Apache Kafka, Celery, OpenAPI

Frontend Technologies: React, Redux, Bootstrap, Axios, HTML5, CSS3

Databases: PostgreSQL, SQL Server, MongoDB, Redis

Cloud & DevOps: AWS ECS, Docker, Docker Compose, Terraform, GitHub Actions, GitLab CI, Linux, Kubernetes

Testing & Monitoring: pytest, pytest-mock, Postman, Snyk, OWASP, Grafana

Project Management: JIRA, Confluence

Version Control: Git, GitHub

PROFESSIONAL EXPERIENCE

Full Stack Developer

Tech Mahindra | Hyderabad, India

May 2021 – Jul 2023

- Built FastAPI microservices for payments, reconciliation, and alerts incorporating OAuth2, JWT, and role-based access, supporting 500K+ daily transactions with zero duplication using Redis.
- Developed React and Redux dashboards reducing transaction monitoring delays by 30%, enabling real-time case management.
- Orchestrated asynchronous workflows with Celery for statements and improving batch exports.
- Streamed domain events via Kafka to decouple billing, fraud detection, and notification systems, increasing system scalability and fault tolerance.
- Automated CI/CD pipelines with GitHub Actions and deployed containerized services to AWS ECS, cutting release cycle time by 20%.

- Managed infrastructure as code using Terraform for ECS services and secrets, ensuring secure and repeatable deployments.
- Optimized complex SQL queries and wrote efficient migrations in PostgreSQL and SQL Server, reducing report generation times by 60%.
- Built Grafana dashboards for latency, error rates, and throughput monitoring, accelerating incident triage by 35%.
- Deployed staging workloads to Kubernetes clusters for smoke testing, validating releases before production rollout.
- Collaborated with cross-functional teams to deliver scalable, compliant solutions on schedule.

Environment: Python, FastAPI, React, Redux, PostgreSQL, SQL Server, AWS ECS, Docker, Terraform, Redis, Kafka, Celery, GitHub Actions, Kubernetes, Grafana, JIRA, Confluence

Python Developer

Tech Mahindra | Hyderabad, India

Jun 2019 – May 2021

- Built HIPAA-compliant patient and claims APIs using Django REST Framework, processing sensitive healthcare data securely.
- Architected a high-throughput ingestion service in FastAPI with Pydantic models, increasing data pipelines capacity by 30%.
- Designed ETL jobs persisting to PostgreSQL and MongoDB with query tuning, improving data retrieval speeds by 50%.
- Introduced Kafka topics to decouple services, enhancing system modularity and reliability.
- Wrote unit and integration tests with pytest, improving code coverage.
- Maintained and updated OpenAPI documentation, ensuring API specifications were accurate and developer friendly.
- Followed HIPAA and PHI compliance standards, documenting operational runbooks in Confluence.
- Collaborated with agile teams contributing to sprint planning and daily stand-ups to deliver features incrementally, adapting quickly to changing priorities.

Environment: Python, Django REST Framework, FastAPI, PostgreSQL, MongoDB, Docker, Docker Compose, Kafka, GitLab CI, pytest, Swagger, JIRA, Confluence

Junior Python Developer

GameNexa | Hyderabad, India

Jan 2019 – Jun 2019

- Developed RESTful endpoints with Flask, validating payloads using Marshmallow, supporting smooth data interactions.
- Implemented SQLAlchemy models and optimized SQL joins and filters to speed up data access for analytics.
- Built responsive UI views with HTML, CSS, JavaScript, and Bootstrap to enhance user experience.
- Used Git and GitHub for version control and tracked work in JIRA.
- Actively participated in Agile team discussions, aligning sprint goals and coordinating task deliveries.

Environment: Python, Flask, Marshmallow, SQLAlchemy, HTML, CSS, JavaScript, Bootstrap, Docker, Docker Compose, Git, GitHub, pytest, JIRA, Confluence

EDUCATION

Master's in Computer Science

Eastern Illinois University | Charleston, Illinois

Aug 2023 – May 2025

Bachelor's in Computer Science and Engineering

Bharat Institute of Engineering and Technology | Hyderabad, India

May 2015 – Mar 2019
