Summary

- Over all Around 5 years of IT experience in Application Analysis, Design, Development and Deployment of enterprise application using Java technologies.
- Proficient in Java 8/11/17, Spring Boot, Spring MVC, and REST APIs for backend development.
- Skilled in Angular 12+ and React.js for creating modern, responsive, and dynamic front-end applications.
- Strong knowledge of database design and optimization using MySQL, PostgreSQL, MongoDB, and Oracle.
- Skilled in building cloud-native microservices deployed on AWS, Azure, utilizing Docker, Kubernetes, and CI/CD pipelines with Jenkins or GitHub Actions.
- Strong experience in integrating with relational (MySQL, PostgreSQL) and NoSQL (MongoDB, Redis) databases using JPA/Hibernate and optimizing data access layers.
- Hands-on experience in message-driven systems using Apache Kafka and RabbitMQ for real-time data streaming and asynchronous communication.
- Adept at following Agile/Scrum methodologies, practicing Test-Driven Development (TDD) using JUnit 5, Mockito, and ensuring code quality through SonarQube and static analysis.
- Familiar with frontend technologies like React.js / Angular to build and maintain full-stack applications, consuming REST APIs and enhancing user experience.

Professional Experience

Centene Corporation, Saint Louis, MO

Feb 2024 – Present

Java Full Stack Developer

- Involved in various phases of Software Development Life Cycle (SDLC) of the application like Requirement gathering, Design, Analysis and Code development.
- Implemented application using Spring boot with JPA, Spring Framework, Spring dependency injection, Spring MVC for Rest APIs and integrated with the Hibernate.
- Developed Angular 14 components for user self-service portals with responsive UI and accessibility standards.
- Extensively used Java17+ features such as lambda expressions, Parallel operations on collections, multithreading and for effective sorting mechanisms.
- Developed CI/CD pipelines using Azure DevOps and Terraform Cloud to automate infrastructure provisioning and application deployments
- Involved in designing and developing Amazon EC2, Amazon S3, Amazon RDS, Amazon Elastic Load Balancing, Amazon SWF, Amazon SQS, and other services of the AWS infrastructure.
- Used AngularJS, JavaScript, HTML, and CSS for developing Single Page Application and achieving two-way data binding between html and JavaScript objects.
- Designed and managed relational databases like MySQL and NoSQL databases like MongoDB, ensuring data integrity and optimal performance.
- Optimized CI/CD pipelines using GitHub Actions, incorporating blue-green deployments, automated rollbacks, and safe-release strategies
- Deployed containerized applications on AWS EKS using Docker and Kubernetes
- Wrote SQL queries and stored procedures in PostgreSQL for customer data and transactions
- Integrated RESTful services with Swagger/OpenAPI documentation.
- Designed and developed business and persistence layer components using Spring IoC and Hibernate.
- Written JUnit Test cases to perform unit testing and tested web services with REST Client.
- Experience in working with GIT and GIT Bash as the version control tools.
- Collaborated with cross-functional teams in Agile sprints to deliver business-critical features

DXC Technologies, Hyderabad, India

Jun 2021 – Aug 2023

Java Developer

- Participated in the daily stand-up, preplanning and retro meetings as a part of Agile.
- Developed Web Applications using RESTFUL web services plus Ajax and AngularJS.
- Designed and developed business and persistence layer components using Spring IoC and Hibernate.
- Automated deployments with Azure DevOps CI/CD pipelines, reducing release cycle time
- Developed Hibernate DAO classes and with the Spring framework manager classes retrieve and save the data from the database.
- Experienced in Development, testing, and deployment of enterprise applications on Windows and UNIX platforms using IDEs such as Eclipse, NetBeans, WebStorm, Spring Tool Suite, IntelliJ.
- Created User Stories in JIRA and followed agile scrum development process.
- Having knowledge on (JMS) MQ's like Kafka, Rabbit MQ, IBM MQ and Active MQ.

LIC, Hyderabad, India

Sep 2020 – May 2021

Associate Java Developer

- Assisted in developing Spring MVC modules for policy management, claims processing, and premium calculations.
- Built JSP/Servlet-based front-end pages integrated with backend APIs for insurance workflows.
- Designed and executed SQL queries and stored procedures in MySQL to support reporting and data retrieval.
- Implemented form validations and error handling to improve customer data accuracy.
- Worked on writing the Jenkins file using Groovy script for multistage build and deployments for CI/CD
- Worked on SOAP web services to integrate with third-party payment and verification systems.
- Participated in Agile sprints, collaborating with senior developers and QA engineers for timely deliveries.
- Documented technical workflows, created test cases, and supported UAT (User Acceptance Testing) cycles.
- Gained strong foundational exposure to full stack Java development practices in an enterprise environment.

Education

- **Texas Tech University**
Master of Science in Computer Science Aug 2023 – May 2025
- **Vel Tech Rangarajan Dr. Sagun Thala R&D Institute of Science and Technology, Chennai, India**
Bachelor of Technology in Computer Science Jul 2018 – Aug 2022

Technical Skills

- **Programming Languages:** Java 8/11/17+, Python, Shell Scripting
- **Web Technologies:** HTML5, CSS3, Java Scripts, JQuery, Angular, Core Spring, Spring MVC and Spring Boot.
- **Backend:** Java 8/11/17, Spring Boot, Spring MVC, Hibernate, JPA, REST APIs, Microservices
- **Frontend:** Angular 12+/14, React.js, HTML5, CSS3, JavaScript, TypeScript, Bootstrap
- **Databases:** PostgreSQL, MySQL, Oracle, MongoDB and Cassandra
- **Cloud & DevOps:** AWS (EC2, S3, RDS, Lambda), Azure (AKS, App Services), Jenkins, GitHub Actions, Docker, Kubernetes
- **Messaging & Integration:** Kafka, RabbitMQ, SOAP, GraphQL
- **Testing & Tools:** JUnit, Mockito, Selenium, Postman, Swagger, Log4j, Splunk
- **Agile & Collaboration:** JIRA, Confluence, Git, Bitbucket
