

Romil Mehta

Chicago, IL | +1 (224) 227-9257 | romil1698@gmail.com

SUMMARY

Software Engineer with 3+ years of full-stack and systems engineering experience, skilled in Python, Java, and cloud-based solutions. Proven ability to design, develop, and optimize scalable architectures while integrating modern UI frameworks and automation tools. Experienced in applying design thinking to deliver high-quality, client-centric products and eager to support generative AI projects in a dynamic, cross-functional environment.

EDUCATION

DePaul University

2023 - 2025

MASTER, IN COMPUTER SCIENCE

- **GPA:** 3.5/4.0
- **Coursework:** Object Oriented Software Development, Cloud computing, Networking, Database programming, Distributed system

EXPERIENCE

JPMorgan Chase & Co

Jan 2025 - Present

Sr. System Engineer

NEW YORK, NY

- Architected and deployed secure enterprise systems across multi-cloud (AWS, Azure) and on-prem environments, ensuring high availability, compliance, and optimized performance for critical banking operations while applying principles akin to IBM's Design Thinking.
- Engineered scalable network and infrastructure solutions leveraging Cisco, QRadar, VMware, and Kubernetes to enhance threat detection, automation, and resource efficiency across multi-region data centers, aligning with best practices in systems design and security.
- Developed automation scripts using Python and PowerShell to streamline deployment, monitoring, and incident response workflows, reducing operational overhead and improving system reliability.

Infosys

Sep 2020 - Mar 2023

System Engineer

PUNE, INDIA

- Optimized multi-platform system performance (Linux, Unix, Windows) by executing upgrades, security hardening, patching, and continuous monitoring, ensuring compliance with industry standards and supporting scalable product operations.
- Enhanced infrastructure scalability and efficiency by deploying virtualization and cloud solutions (VMware, Hyper-V, Citrix) and utilizing automation tools, reinforcing robust and secure system architectures.
- Developed and maintained robust infrastructure solutions through production-grade coding, SQL-based database integration, and middleware configuration, delivering high-availability systems that meet critical business requirements.

Fingertips Ltd

Feb 2020 - Aug 2020

Data Science Intern

AHMEDABAD, INDIA

- Developed predictive ML models and deep learning architectures (Python, TensorFlow) for financial market analysis and seizure prediction, applying statistical modeling and advanced data analysis to improve forecasting accuracy.
- Designed and delivered interactive dashboards (Tableau, Power BI) that transformed large, complex datasets into actionable insights for stakeholders, streamlining decision-making and enhancing project efficiency.

PROJECTS

Traffic Management

- Led a Python/TensorFlow project for image-based traffic control, integrating AWS S3 for scalable real-time data storage; applied expertise in machine learning, computer vision, and data analysis.

Banking Software

- Developed core banking software in C/C++ with secure authentication, robust data storage, and strong security protocols, ensuring seamless transactions and system reliability.

TECHNICAL SKILLS

- **Security & Testing:** OWASP Top 10, Threat Modeling, SAST, DAST, Secure Architecture, Vulnerability Management
- **Programming:** Java, Python, C++, JavaScript, Bash, PowerShell, SQL
- **Frameworks:** React, Node.js
- **Cloud & DevOps:** AWS, Azure, Docker, Kubernetes
- **Monitoring:** Prometheus, Datadog, Power BI, Tableau
- **Database:** SQL, PostgreSQL, MongoDB
- **Tools:** Git, CI/CD, JUnit, Selenium, VS Code, Rapid 7, QRadar
- **OS & Systems:** Windows Server, Linux, Unix, VMware, Hyper-V

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional, Certified AI Foundations Associate, AI Vector Search Certified Professional
- Applied Cybersecurity Essentials, Infosys Cybersecurity Foundations, Ethical Hacking, Vulnerability Management, Infosys Enterprise Security
