SUMMARY

Detail-oriented and analytical Data Analyst with a strong foundation in Microsoft Excel, SQL, Python, and Power BI. Known for applying advanced problem-solving skills and a customer-centric mindset developed through a background in healthcare sales and customer service. Adept at transforming complex data into actionable insights to improve patient care, streamline workflows, and support strategic decision-making.

SKILLS

Data Analysis • SQL • Python (Programming Language) • Tableau • Microsoft Excel

TECH PROJECTS

New York City AirBnB Data Analysis | [Spreadsheet project](#) 05/2025 | Spreadsheet | GitHub

Analyzed data from AirBnB to advise a potential host on location and property types that would make a good investment.

- Purpose: Advised a potential investor about property type and location in New York City.
- Methods/Techniques: Cleaned data and created new columns and pivot tables.
- Results: Provided analysis of NYC neighborhoods, property types, and occupancy levels.
- Recommendations: Suggested investing in 1-bedroom properties in the Lower East Side neighborhood, with an average estimated annual revenue of \$61,333.12 and a high occupancy rate of 57.36%

Business Analytics Project [Excel Sheet](#) | 06/25 | Report

Created an excel sheet to find the purchase activities and retention rates for a company sales team to build the needed reports.

- Purpose: help to understand how well the website is converting product page views into purchases.
- Methods/Techniques: Cleaned data and created new columns and pivot tables.
- Results: shows that month 1 is the highest retention month from 09/2020 - 02/2021.
- Recommendations: total conversion from viewing to shopping cart is 29% and from shopping cart to an actual purchase is 36%. so the total conversion for purchases from 09/2020 to 02/2021 is roughly 11%

Return Rates [Tableau Project](#) | 07/25 | Tableau Public | Report

Tableau project for a company going over there Profits & losses, Advertising, Returned items.

- Purpose: review the superstore's operations and increase its profitability to avoid bankruptcy.
- Methods/Techniques: Created new columns and pivot tables.
- Results: We can see that the sales still proceed the returns, so we are not losing enough money for it to hurt the company. The most returned category is Technology. The returns are not geographic concentrated, and we even have a few states that have no returns. Corporate returns are almost as high as the consumer returns.
- Recommendations: - We can dig deeper into this and figure out what we can do to fix the Technology issue. For the customers that return 100%, we can send them a survey to find out what is the reason the returns are happening so we can come up with a solution. We can also send surveys to people in these states to find out what we can do differently in the other states. While not all returns are done over seasons, a lot of them do happen from

September and December. We should send a mass email to all corporations to find out the reasons why these returns are happening.

EXPERIENCE

Unified Growth Partners | Medicare Sales Specialist | 08/2024 – 03/2025 | Remote

- Skills Used: Critical Thinking | Teamwork | Time Management
- Needs Analysis: Conducted in-depth assessments to align clients with optimal Medicare plans based on coverage and cost-benefit criteria.
- Data-Driven Decision Making: Guided clients through enrollment using current policy data to ensure CMS compliance and minimize documentation errors.
- Compliance Monitoring: Maintained up-to-date knowledge of annual CMS regulation changes, achieving 100% accuracy in licensing and documentation.
- Client Communication: Delivered clear, accurate explanations of complex benefit structures, enhancing trust and customer satisfaction.

Clearlink | Medicare Sales Specialist | 08/2023 – 03/2024 | Remote

- Skills Used: Microsoft Excel | Problem Solving | Organization
- Customer Data Analysis: Conducted personalized needs assessments to recommend suitable Medicare options tailored to client demographics and health history.
- Regulatory Compliance: Ensured all enrollments were fully CMS-compliant, maintaining documentation accuracy across internal systems.
- Knowledge Management: Consistently passed regulatory tests and applied insights to optimize plan recommendations and reduce enrollment errors.
- Process Optimization: Used Excel to track client inquiries and streamline the follow-up process, improving lead-to-enrollment conversion rates.

Alight | Medicare Sales Specialist | 04/2022 – 04/2023 | Remote

- Skills Used: Critical Thinking | Customer Service | Time Management
- Client Needs Assessment: Utilized data-gathering techniques to analyze client health and financial situations, providing tailored plan recommendations.
- Compliance Reporting: Completed accurate documentation in alignment with CMS standards, contributing to risk mitigation and audit readiness.
- Regulatory Tracking: Maintained awareness of evolving Medicare policies, improving plan suitability and client retention.
- Stakeholder Communication: Fostered positive client experiences through proactive education and guidance, leading to increased satisfaction and referrals.
