SUMMARY

- Results-driven Software Engineer with 3+ years of experience in developing and deploying scalable, cloud-native applications.
- Skilled in building microservices and optimizing system performance, achieving 99.99% uptime and reducing infrastructure costs through AWS-based solutions.
- Proven expertise in CI/CD automation, boosting deployment efficiency and minimizing release errors.
- Adept at implementing event-driven architectures with Kafka, SNS, and SQS, ensuring real-time data consistency.
- Strong background in database optimization with Redis caching and SQL tuning, reducing query latency by 50%.
- Collaborative team player with a track record of delivering high-quality, fault-tolerant applications in Agile environments, meeting project deadlines and enhancing overall system reliability.

TECHNICAL SKILLS

- Backend: Java, Spring Boot, Microservices, Python, Django, Flask, Node.js, Express.js
- Frontend: HTML, CSS, JavaScript, TypeScript, Angular, React.js, Vue.js
- Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, IAM), CI/CD (Jenkins, GitHub Actions), Docker, Kubernetes, Terraform, Ansible
- Databases: SQL, MySQL, PostgreSQL, MongoDB, Redis, DynamoDB
- Messaging: Kafka, AWS SNS, AWS SQS, JMS
- Version Control: Git, GitHub, GitLab, Bitbucket
- Testing: JUnit, PyTest, Selenium, Cypress, REST Assured, Postman
- Networking & OS: Linux (Ubuntu, Red Hat), Windows Server, Load Balancing, VPN, Firewalls
- Methodologies: Agile, Scrum, SDLC, TDD
- Soft Skills: Problem-Solving, System Design, Code Review, Collaboration

EDUCATION

Indiana Wesleyan University ` Aug 2024
Masters in Information Technology

Malla Reddy Engineering College May 2020
Bachelors in Computer Science

PROFESSIONAL EXPERIENCE

Capital One Financial, USA **Oct 2024 - Current**
Software Engineer

- Developed and deployed scalable microservices using Java (Spring Boot) and Python (Django/Flask), reducing system latency by 35% and improving request throughput by 40%, resulting in faster transaction processing.
- Designed and implemented cloud-native solutions on AWS (EC2, Lambda, RDS, S3), achieving 99.99% uptime and reducing infrastructure costs by 30% through auto-scaling and instance optimization.
- Built and automated CI/CD pipelines using Jenkins and GitHub Actions, increasing deployment frequency by 60% and reducing manual release errors, accelerating time-to-market for new features.
- Developed event-driven data pipelines with Kafka, AWS SNS, and SQS, enhancing message reliability by 45% and reducing data synchronization lag, ensuring real-time data consistency.
- Containerized applications with Docker and orchestrated them using Kubernetes, streamlining deployments and ensuring zero-downtime during production releases.
- Optimized database performance by introducing Redis caching and fine-tuning SQL queries, reducing response times by 50%, improving customer experience.

- Collaborated with cross-functional teams on system design, code reviews, and performance enhancements, delivering robust, fault-tolerant applications.

Capital One Financial, USA

Apr 2024 - Aug 2024

Software Engineer Intern

- Assisted in developing and deploying serverless APIs using AWS Lambda and API Gateway, contributing to 30% infrastructure cost reduction and ensuring low-latency performance.
- Implemented asynchronous messaging features with AWS SNS and SQS, improving event processing reliability and reducing lag by 25%.
- Supported application security enhancements by integrating OAuth 2.0 and JWT authentication, ensuring secure access and data protection.
- Automated infrastructure provisioning with Terraform, streamlining environment setup and boosting consistency by 70%.
- Collaborated with senior engineers in Agile sprints to deliver new features, meeting 100% of project deadlines.
- Performed load testing and API benchmarking using Postman and REST Assured, identifying bottlenecks and suggesting optimizations to improve performance.

Hexaware Technologies, India

Nov 2019 – Aug 2021

Software Engineer

- Developed and deployed scalable RESTful APIs using Java (Spring Boot) and Python (Flask), boosting application performance by 35% through efficient data processing and caching.
- Engineered and deployed cloud-based solutions on AWS (EC2, S3, RDS) with auto-scaling and load balancing, ensuring 99.9% uptime and enhancing application scalability.
- Automated CI/CD pipelines with GitLab CI/CD and Jenkins, reducing deployment time by 60% and accelerating release cycles.
- Containerized applications using Docker and orchestrated them with Kubernetes, achieving zero downtime deployments and improving system reliability.
- Optimized database performance by refactoring SQL queries and introducing Redis caching, reducing response times by 40%.
- Integrated messaging queues with Kafka and AWS SQS, enhancing real-time data processing and asynchronous communication reliability.
- Collaborated with cross-functional teams (Product, DevOps, QA) to deliver fault-tolerant applications, meeting 100% of project deadlines and improving system stability.

Citius Tech, India

Jan 2019 – Oct 2019

Back-End Developer

- Developed and optimized RESTful APIs using Java (Spring Boot) and Node.js (Express.js), enhancing response times by 35% and ensuring seamless integration with front-end services.
- Built and deployed serverless applications on AWS Lambda with API Gateway, reducing infrastructure costs by 20% and improving scalability for high-demand workloads.
- Enhanced database performance by refactoring SQL queries, adding indexing, and implementing caching strategies, reducing data retrieval times by 30%.
- Automated CI/CD pipelines using GitLab CI/CD and containerized applications with Docker, reducing deployment time by 45% and ensuring consistency across environments.
- Implemented asynchronous messaging queues with AWS SQS and Kafka, improving data processing reliability and reducing latency by 50%.
- Conducted unit and API testing with JUnit, PyTest, and Postman, ensuring 99.9% uptime and delivering high-quality, defect-free code.
