
TANMAY ANAND - PYTHON DEVELOPER

Illinois US ♦ (312) 889 4477 ♦ tanmay812024@gmail.com

PROFESSIONAL SUMMARY

- 2+ years of experience as a Python Developer in multiple languages and experience in the Design, Development, and implementation of Python, Django, Flask client-server technologies-based applications, RESTful services, and SQL, NoSQL.
- Proficiency in each phase of the software development life cycle (SDLC) in Agile and waterfall methodology.
- Working Knowledge of developing web applications implementing Model View Control architecture using Django and Flaskweb application frameworks.
- Capable of IDEs like PyCharm and Jupyter Notebook.
- Proficient in data analysis and machine learning techniques used in various Python libraries like NumPy, Pandas, Matplotlib, SciPy, and TensorFlow.
- Well-versed in developing front-end applications using HTML, CSS, JavaScript, Ajax, JSON, Bootstrap, and Restful.
- Proficiency in working with different databases like Microsoft SQL Server, MySQL, and SQLite.
- Proven Knowledge of version control systems using Git/GitHub and issue-tracking tools like Jira.

SKILLS

Methodology: SDLC, Agile, Waterfall

Languages: Python, SQL, C++

Frameworks: Django, Flask

IDEs: Visual Studio Code, Jupyter Notebook, PyCharm

Package & Tools: NumPy, Pandas, Web2py, CherryPy

Application Server: Apache Tomcat, Web Sphere

Cloud: AWS, Azure

Web Technologies: HTML, CSS, JavaScript, Bootstrap, jQuery, Angular.js, React.js, Node.js

Databases: SQL, MySQL, NoSQL, MongoDB, PostgreSQL

Version Control Tools: Git, GitHub, Jenkins

Operating Systems: Windows, Linux

Tools: Jira, Asana, Trello

WORK HISTORY

Python Developer, 01/2024 - Current

Northern Trust – Illinois, USA

- Designing developing and testing Python applications in as Agile environment using JIRA.
- Generate a property list for every application dynamically using Python.
- Enforce security best practices within VMware environments, including access control, network segmentation, and vulnerability management.
- Developing entire frontend and backend modules using Python on Django Web Framework.
- Developed applications using the Python ecosystem package Jupyter Notebook.
- Use several Python libraries like Pandas, NumPy, Python, and CherryPy.
- Collaborate with operations teams to identify automation opportunities and streamline workflows using PowerShell.
- Using web technologies like HTML, CSS, Bootstrap, JavaScript, and jQuery user interactive web pages were designed.
- Develop tools using Python, Shell scripting, and XML to automate some of the menial tasks

Python Developer, 01/2020 - 05/2022

Mphasis – India

- Worked in agile and waterfall methodologies with high-quality deliverables delivered on time with CI/CD.
- Designed and developed web applications using Flask web framework for Python models or scripts.
- Implemented backup and disaster recovery solutions for VMware environments, scripting backup jobs, and data restoration processes.
- Worked with Requests, NumPy, SciPy, Matplotlib, and Pandas Python libraries during the development lifecycle.
- Implemented user interface guidelines and standards throughout the development and maintenance of the website using HTML, CSS, JavaScript, and jQuery.
- Developed PowerShell scripts to automate various system administration tasks, such as user management, file operations, and system monitoring.
- leveraged Python's graphics APIs for creating graphics and serialization libraries for encoding data in XML/JSON formats.
- Modified queries, functions, cursors, triggers, and stored procedures for MySQL database to improve performance, while processing data.
- Optimized SQL queries used in batch processing and Wrote validation scripts in SQL to validate data loading

EDUCATION

Master of Science: Computer Science, 12/2023

Illinois Institute of Technology, Chicago - Chicago, US

Bachelor of Engineering: Computer Science, 05/2022

MIT ADT University - India
