

Rucha Tirodkar Data Analyst

rucha@careeremail.net | (551) 344-8754 | USA | [LinkedIn](#) | [GitHub](#)

Summary

Detail-oriented and results-driven Data Analyst with 4+ years of strong expertise in data manipulation, statistical analysis, and business intelligence. Proficient in tools such as SQL, Python, Tableau, Power BI, and cloud technologies like Azure. Experienced in developing data-driven insights to support decision-making, optimize workflows, and improve business performance. Skilled in data integration, ETL processes, and report automation, with a proven track record of enhancing data quality and providing actionable insights across various industries. Passionate about leveraging data to drive business growth.

Technical Skills

- Data Analysis & Visualization:** Python (pandas, NumPy, Statsmodels, Seaborn), Tableau, Power BI, Excel
- Databases & Querying:** SQL, Amazon Redshift, Apache Hive, Azure Synapse Analytics
- Data Integration & Automation:** Azure Data Factory, Salesforce API, Google Analytics API
- ETL & Data Transformation:** DAX, Power Query, Regression Analysis
- Business Intelligence & Reporting:** Tableau, Power BI, Azure Synapse Analytics, AI Visuals
- Tools & Technologies:** Time-Series Analysis, Seasonal Decomposition, A/B Testing
- Certificates:** [Microsoft Excel](#), [Python](#), [IBM Data Science Orientation](#), [Business Analytics](#), [SQL](#)

Professional Experience

Data Analyst, Redfin

10/2023 – Present | Remote, USA

- Worked on Real Estate Market Trend Analysis, collaborating with cross-functional teams in an Agile environment to identify market dynamics, analyze price trends, and generate insights that enhanced decision-making, improving property valuation accuracy by 20%.
- Extracted and transformed data using SQL with Amazon Redshift for large-scale data handling and Apache Hive for efficient querying of real estate market data, reducing data processing time by 30% and increasing reporting efficiency.
- Applied time-series analysis and seasonal decomposition techniques to identify long-term housing price trends and fluctuations, achieving a 15% improvement in forecasting accuracy and enabling better market predictions for potential buyers and sellers.
- Utilized Python libraries such as pandas for data manipulation, NumPy for numerical operations, Statsmodels for statistical analysis, and Seaborn for advanced correlation analysis, resulting in more robust data insights and optimized forecasting.
- Ensured rigorous data validation through multiple ETL pipeline stages, incorporating DAX for robust metric calculations, reducing data discrepancies by 25% and improving the integrity of market trend reports and dashboards.
- Developed Power BI dashboard with real-time trend analysis, incorporating Power Query for dynamic data transformation, AI visuals for predictive insights, and interactive filters, increasing user engagement by 40% in tracking market fluctuations.

Data Analyst, Tata Consultancy Services

07/2021 – 07/2022 | Mumbai, India

- Initiated the development of merchandising strategies using regression analysis, identifying key attributes that boosted sales conversion, enhancing client engagement for increased revenue generation across multiple e-commerce platforms.
- Automated the generation of 5 critical Excel reports using Tableau, resulting in a 30% reduction in report creation time, optimizing business workflows, and allowing stakeholders to access real-time, accurate data for improved decision-making.
- Designed and optimized complex SQL queries and triggers, reducing computing time by 15%, improving database efficiency, and ensuring faster and more reliable data retrieval for business analysis and reporting processes within the company.
- Worked closely with Business and Product teams to gather requirements and develop ETL mapping processes, enabling seamless data transformation and integration from various sources to support critical business decision-making in real time.
- Utilized a combination of SQL, Google Analytics API, and Salesforce API to ingest data from multiple sources, creating structured data views that were used by business intelligence tools, thereby supporting deeper insights and more informed strategies.
- Leveraged Azure Data Factory and Synapse Analytics to automate data workflows and enhance data integration processes, improving scalability and falling processing time, allowing for more efficient data-driven insights and faster reporting for business stakeholders.

Data Analyst, Redwing Management Facilitators Pvt. Ltd

01/2020 – 06/2021 | Mumbai, India

- Automated SQL scripts for data wrangling tasks, resulting in a 20% improvement in process efficiency. This automation streamlined internal operations, minimizing manual intervention and enabling faster and more accurate reporting for the HR team.
- Collaborated with key business stakeholders to develop actionable insights, identifying growth opportunities that led to a 10% improvement in performance metrics. Regular discussions and data-driven strategies helped align team efforts with business goals.
- Provided analytical support to marketing team by brief A/B test results, analyzing customer data, and visualizing sales leads, leading to actionable tactics that improved client marketing campaigns and boosted sales performance across targeted demographics.
- Utilized business intelligence tools like Tableau to create interactive data visualizations, improving cost reporting and facilitating more informed decision-making processes, enabling departments to quickly adapt to market shifts and adjust strategies.
- Generated ad-hoc reports on key performance metrics, user experience, and client satisfaction, helping executive leadership make strategic decisions. These reports were crucial in evaluating performance and planning future growth plans for the client groups.

Education

Stevens Institute of Technology

Master of Engineering in Computer Engineering

Mumbai University

Bachelor of Engineering in Computer Engineering

Hoboken, New Jersey, USA

09/2022 – 05/2024

Mumbai, India

05/2017 – 07/2021
