

Ruchitha Kurapati

Leawood, KS 66209 | kurapatiruchi13@gmail.com | +19134860024

Professional Summary

- **Data Engineer with 4+ years of hands-on experience** building scalable data pipelines, cloud data platforms, and ETL frameworks in AWS and Azure environments.
- Proficient in **Python, SQL, Azure Synapse, Databricks, AWS Redshift/S3, Kafka, and Apache Spark**. Consistently delivered automated, high-quality data solutions that improved processing efficiency, data quality, and stakeholder decision-making.
- Seeking Data Engineering roles focusing on cloud infrastructure, streaming, and end-to-end data architecture.

Technical Skills

Platforms & Tools: AWS (S3, Redshift, Glue), Azure (Data Factory, Synapse Analytics, Databricks, Stream Analytics)

Programming & ETL: Python, SQL, Apache PySpark, Apache Airflow

Big Data: Apache Kafka, Apache Spark, Hadoop ecosystem

Data Modeling & Storage: OLAP/OLTP, Star/Snowflake schema, Snowflake, Azure Data Lake, Redshift

DevOps & CI/CD: Azure DevOps, Git, Terraform (optional mention if applicable)

Data Quality & Governance: Metadata management, compliance, testing frameworks

BI & Visualization: Power BI, Tableau

Work Experience

Data Engineer

Aetna, MO

01/2025 – Present

- Developed and managed **automated ETL pipelines** using Python, SQL, and Azure Data Factory to ingest and transform data from on-premise and SaaS sources, reducing manual hand-offs by **70%**.
- Built **streaming ingestion workflows** with Azure Stream Analytics and Apache Kafka to support real-time dashboards with < 1 second latency.
- Implemented **data governance** processes including schema versioning, metadata pipelines, and automated data quality validation, resulting in a **30% reduction in data errors**.
- Designed **rest APIs** and data models in Azure Synapse Analytics for consistent historical and incremental reporting.
- Conducted **A/B testing** to evaluate the impact of website changes on user engagement, leading to a 15% increase in conversion rates.
- Created interactive dashboards in Tableau and Power BI to monitor KPIs and pipeline performance, accelerating stakeholder decision-making cycles by **25%**.
- Collaborated with cross-functional teams to architect **data warehousing solutions** and optimize Spark-based transformations, improving query efficiency by **35%**.

Azure Data Engineer

DXC Technology, India

12/2019 – 07/2023

- Architected and deployed automation via **Azure Data Factory** pipelines to orchestrate data workflows into Azure Data Lake Storage, Azure Blob Storage, and centralized warehouse.
- Engineered **ETL jobs in Databricks (Python, PySpark)** to standardize and cleanse large datasets, reducing processing time **by 20%**.
- Implemented **DAX calculations** for time-series analysis (YoY, MAs) to support business analytics and trend reporting.
- Set up **Azure Virtual Networks (VNet)** and managed **Azure VMs** for secure, scalable computing resources.
- Led **metadata and data quality initiatives**—identifying, tracking, and resolving data defects and mismatches in collaboration with QA and stakeholders.
- Trained junior analysts on **ETL** best practices and onboarding to **Azure** tools, improving team productivity and data maturity.
- Developed hands-on experience with **Azure SQL Database** and **Azure Stream Analytics** for data processing.
- Performed **data mining** and **statistical analysis** to identify trends and patterns in large datasets.
- Cleaned and transformed raw data to ensure accuracy and consistency for reporting purposes.
- Supported the development of data models to facilitate efficient data storage and retrieval.

Education

Masters of Science in Computer Science

University of Central Missouri, Warrensburg, MO

08/2023 – 05/2025

Certifications

- **Microsoft Certified: Azure Fundamentals (AZ-900)**
- **Microsoft Certified: Azure Data Fundamentals (DP-900)**
- **Microsoft Certified: Azure Data Engineer Associate (DP-203)**
- **Microsoft Certified: Power BI Data Analyst (PL-300)**
