

RUGVEDA SAMHITHA PALADUGU

DATA ANALYST

rugvedasamhitha@gmail.com | +1(9452671757)

PROFFESIONAL SUMMARY:

- **5 years of hands-on experience with Power BI, SQL, and Python**, specializing in BI reporting, BI analysis, and dashboard creation to deliver actionable insights across FinTech, healthcare, and technology domains, with transferable skills to the semiconductor industry.
- Proven track record of developing **interactive dashboards using Power BI**, optimizing SQL queries, and automating workflows with Python to improve decision-making and operational efficiency.
- Skilled in designing **ETL pipelines** and scalable data architectures in **Snowflake, AWS, and Azure** to ensure timely, accurate, and secure data availability.
- Strong background in **data governance**, quality assurance, and collaboration in Agile Scrum environments.
- Experienced in writing complex **SQL queries** to extract, filter, and manipulate data from relational databases, providing actionable insights and supporting business intelligence efforts.
- Specialized in **Snowflake** and **AWS Redshift**, designing optimized data models and architectures that support high-performance querying and data analytics in cloud environments.
- **Proven ability to manage data pipelines** in both cloud-based environments (e.g., **AWS Glue, Azure Data Factory**) and on-premises systems, ensuring seamless integration and consistency across data flows.
- Strong understanding of **CI/CD principles**, leveraging **Azure DevOps** and **Git** to automate data processes, ensure version control, and maintain the integrity of data pipelines.
- Actively collaborated with business stakeholders to gather requirements and develop customized **data solutions** tailored to the needs of different teams within the organization.
- In-depth experience working with **large-scale data sets**, utilizing **Python (Pandas, NumPy, PySpark)** for data manipulation, data wrangling, and big data analytics, providing valuable insights for operational and strategic decisions.
- Experience working in **Agile Scrum environments**, ensuring iterative development, timely delivery of data solutions, and continuous collaboration with business and technical teams to meet project goals.
- Delivered **real-time reporting and analytics** for business units, enhancing the speed of decision making and increasing operational efficiency through data-driven insights.

WORK EXPERIENCE:

Synergy Data | Texas, USA

July 2023- Present

Role: Data Analyst

Project 1:

Key Responsibilities:

- Developed a **Dynamic Currency Conversion (DCC)** Tool using **Python** and **SQL** to facilitate efficient data handling, migration, and validation processes.
- Led the migration of on-premises databases to **AWS cloud infrastructure**, optimizing scalability and performance for big data analytics in the organization.

- Developed custom **Snowflake data models** to support the company's growing data analytics needs, resulting in improved reporting and data retrieval efficiency.
- Designed **ETL workflows** to automate data ingestion and transformation processes, integrating external APIs and databases into the company's centralized data platform.
- Designed **real-time Power BI dashboards** for operational and financial reporting in a FinTech setting.
- Worked closely with the data engineering team to implement **data governance** best practices, ensuring the security and privacy of sensitive data in the analytics environment.
- Applied advanced **Python libraries (Pandas, NumPy)** to analyze large datasets, uncovering trends, opportunities, and insights that informed strategic decision-making.
- Conducted **ad-hoc analysis** for multiple business units, delivering actionable insights that led to more targeted marketing campaigns and improved operational performance.
- Implemented **AWS S3** and **AWS Lambda** to automate the extraction of data from various sources, reducing manual intervention and improving the accuracy of data ingestion.
- Played a key role in the **data modeling and architecture** decisions, contributing to the design of a robust, scalable, and secure data infrastructure for the company's analytics needs.
- Actively participated in **Agile Scrum** sprints, contributing to the planning, development, and delivery of new data analytics features, reports, and visualizations.
- Worked with business stakeholders to define new **reporting requirements**, ensuring all **Power BI reports** were aligned with their needs and provided the most valuable insights.
- Continuously monitored the **performance** and **stability** of the **data warehouse** and related solutions, ensuring minimal downtime and high availability for business users.

Project 2:

Role: Data Analyst

Key Responsibilities:

- Designed and implemented data validation rules to ensure data accuracy before integration into business intelligence dashboards.
- Optimized **SQL** queries to enhance the performance of data retrieval processes, reducing execution time by handling indexing and joins efficiently.
- Automated data cleansing processes using **Python and SQL**, eliminating manual intervention and improving dataset reliability.
- Conducted **exploratory data analysis (EDA)** on raw datasets to detect trends, anomalies, and business insights for decision-making.
- Collaborated with data engineers to refine **ETL** processes, improving data pipeline efficiency and ensuring seamless data transformations.
- Developed **KPI** tracking reports that provided senior analysts with insights into operational efficiency and financial performance.
- Built custom data transformation scripts in Python to preprocess and standardize unstructured data from multiple sources.
- Created a structured data repository for historical business insights, enabling efficient trend analysis and reporting.
- Worked on **API data integration, extracting, transforming, and loading external data sources** into the company's data warehouse.
- Presented actionable insights to stakeholders, translating complex data findings into strategic recommendations for business growth.

Key Responsibilities:

- Led the development of **real-time dashboards** using **Power BI**, allowing business users to monitor key operational metrics, improving decision-making for management teams.
- Implemented and optimized **AWS Redshift** data warehouse, streamlining data storage and enhancing performance for complex queries and large data volume handling.
- Integrated data from **multiple sources** (CRM systems, ERP databases, etc.) into a unified **data warehouse**, using **ETL processes** in **AWS Glue** and **SQL**.
- Created a **Power BI** report suite for sales forecasting and performance analysis, leading to improved sales tracking and enhanced business strategy execution.
- Spearheaded the creation of data models in **Snowflake**, enabling faster, scalable, and cost-effective data processing solutions for Capgemini's clients.
- Managed **AWS EC2 instances** and **S3 buckets** for hosting analytics solutions, optimizing storage and ensuring secure and efficient data access.
- Coordinated with **business teams** to translate complex business requirements into actionable data insights, enabling improved customer targeting and operational efficiency.
- Conducted **data validation** and quality checks to ensure consistency and reliability of data, minimizing errors and enhancing data-driven decision-making.
- Utilized **SQL** and **Python** to automate manual reporting processes, reducing time-to-insight and increasing efficiency for internal stakeholders.
- Collaborated in an **Agile Scrum** environment, working closely with developers, business analysts, and stakeholders to define and implement data-driven solutions for client projects.

Technical Expertise:

- **Databases & Data Warehousing:** Snowflake, AWS Redshift, MySQL, SQL Server, PostgreSQL
- **Cloud Platforms:** AWS (S3, EC2, Redshift, Glue, Lambda), Azure (Data Factory, Databricks)
- **Data Analytics & Visualization:** Power BI, Excel (Advanced Functions, PivotTables, Power Query, Macros)
- **Programming & Scripting:** Python (Pandas, NumPy, PySpark, Scikit-learn, Matplotlib, Seaborn), SQL, Shell Scripting
- **ETL & Data Integration:** Python, Apache Airflow, AWS Glue, Azure Data Factory
- **Version Control & CI/CD:** Git, Azure DevOps, Jenkins
- **Data Security & Governance:** Role-Based Access Control (RBAC), Data Encryption, GDPR Compliance
- **Collaboration Tools:** Jira, Confluence, Microsoft Teams, Slack
- **Project Management:** Agile Scrum, Kanban, Sprint Planning, Retrospectives

CERTIFICATIONS:

- Business Intelligence using Power BI | Feb 2024.
- ChatGPT and AI Tools | Feb 2024.
- The Raspberry Pi Platform and Python Programming for the Raspberry Pi | May 2019.
- Introduction to the Internet of Things and Embedded Systems | Certified by Coursera, an online learning initiative of "University of California" | May 2019.
- The Arduino Platform and C Programming | May 2019.
- Programming for the Internet of Things | May 2019.

INTERNSHIP:

BHARAT SANCHAR NIGAM LIMITED (BSNL) | Hyderabad, India
Role: Data Analyst Intern

Feb 2019 - Jan 2020

Key Responsibilities:

- Designed and maintained **Power BI** dashboards for real-time business insights.
- Extracted, transformed, and loaded (**ETL**) large datasets using **SQL** for reporting.
- Wrote complex SQL queries to fetch, clean, and analyze structured data.
- Used Python for data automation, reducing manual data processing time.
- Conducted exploratory data analysis (**EDA**) to uncover trends and correlations.
- Implemented A/B testing frameworks to evaluate product and marketing strategies.
- Developed predictive models **in Python** to forecast business trends.
- Created reports and presentations to communicate findings to stakeholders.
- Worked with cross-functional teams to improve data accuracy and reporting.
- Documented best practices for data analytics workflows and **SQL queries**.

EDUCATION:

- Bachelor's from Prasad V Potluri Siddhartha Institute of Technology in Electronics and Communication Engineering, Vijayawada, India 7.00 GPA .
- Master's from Fitchburg State University in Computer Science, Fitchburg, MA, USA 3.95 GPA .
