

Ruiping Fang

r6fang@ucsd.edu | (858) 399-1727 | <https://github.com/ruiping-fang> |

EDUCATION

University of California San Diego

BS, Computer Science

GPA: 3.6

Course work:

Core: Advanced Data Structures, Design and Analysis of Algorithms, Software Engineering.

ML: Introduction to Machine Learning, Recommender Sys&Web Mining, Fairness, bias, and transparency in Machine Learning

INTERNSHIP

Qualcomm Institute - UC San Diego Division of Calit2

San Diego, CA

Software Engineer Intern

2024.1 - 2024.3

- Implemented machine learning models (TIM-Net) to classify emotional states from speech signals, applying temporal-aware multi-scale modeling for speech emotion recognition.
 - Built and tested a speech emotion recognition (SER) pipeline using TIM-Net, leveraging benchmark datasets for evaluation and real-time audio for inference.
-

SELECTED PROJECTS

Language - <https://fangyan.fangruiping.com>

An interactive web application that leverages the OpenAI services to provide independent access to Large Language Models including GPT4 etc.

- Developed and deployed a **REST API** using Python to interface with OpenAI services, enabling independent access to LLMs
 - Designed and implemented a responsive frontend using **React**, improving API response efficiency through modular queries
 - Designed and deployed a production-grade infrastructure on AWS EC2
 - Hosted on personalized domain **fangyan.fangruiping.com**.
-

Sephora Product Popularity Prediction: [Github Page](#)

- Built an ML model to predict the popularity of Sephora products based on customer engagement metrics.
 - Engineered features and **preprocessed large datasets** using **Pandas, NumPy, and Scikit-learn**.
 - Trained and optimized Linear Regression, Ridge Regression, and Decision Tree models, achieving an R^2 Score of 0.6362 after tuning.
 - Implemented cross-validation (5-fold) and hyperparameter tuning with **GridSearchCV** to improve generalization.
 - Identified overfitting and experimented with **Lasso Regression & Gradient Boosting** for better performance.
 - **Visualized insights** using **Matplotlib & Seaborn**, aiding feature importance analysis.
-

RESEARCH

Computer Science and Engineering Early Research Scholar Program (CSE-ERSP)

University of California San Diego, CA

2023.9 - 2024.6
