

Rukmini Bala

(469) 417-8434 | rukmini.dev29@gmail.com | Dallas, TX, USA

SUMMARY:

Software Developer with 6 years of experience in building and maintaining scalable microservices, RESTful APIs, and cloud-based applications using Java, Spring Boot, and Apache Kafka. Experienced in backend development, cloud deployment (AWS and Azure), Docker, Kubernetes, and CI/CD pipelines. Skilled in front-end development with React and Angular, and experienced in all SDLC phases, including requirement analysis, design, coding, implementation, unit testing with JUnit, and production support.

TECHNICAL SKILLS:

- **Languages:** Java, JavaScript (ES6), TypeScript, Python, C
- **Frameworks & Libraries:** Spring Boot, Spring MVC, Spring JPA, Hibernate, Angular, React, jQuery, GraphQL, Kafka
- **Web Technologies:** HTML5, CSS3, Ajax, Handlebars, REST API, JSP
- **Databases & Cloud:** MySQL, Cosmos DB, Postgres, MongoDB, IBM DB2, Azure SQL Database, PostgreSQL
- **Cloud:** OpenShift, AWS, Azure
- **DevOps & Tools:** Docker, Kubernetes, Jenkins, Azure DevOps, Terraform, Flux, Ansible, Git, GitHub, IntelliJ, VS Code, Kibana, Splunk, Log4j, Grafana
- **Build Tools:** Apache Maven, Gradle

EDUCATION:

Master's in computer science	Southern Arkansas University, AR	GPA: 4.0	Jan 2023 – Dec 2024
Bachelor's in computer science	Osmania University, India	GPA: 3.5	Aug 2014 – May 2018

PROFESSIONAL WORK EXPERIENCE:

Sr. Full Stack Java Developer , Staples , Dallas, Tx May 2024 – Till Date

- Developed an end-to-end automated solution to scale Staple's Fulfillment by Amazon program, optimizing inventory management, order fulfillment, and third-party logistics integration across multiple networks.
- Built a responsive front-end using **React.js**, Bootstrap, and JavaScript to ensure seamless user experience.
- Developed and integrated RESTful APIs with Java and Spring Boot, utilizing **Azure Cloud**, Azure Data Factory, and Event Hubs for real-time data ingestion.
- Designed a microservices architecture deployed on **Azure Kubernetes Service (AKS)**, ensuring scalability and resilience.
- Automated report generation using **Temporal workflows** and Spring Boot to enhance business intelligence capabilities.
- Implemented CI/CD pipelines with Azure DevOps, **Terraform**, and Flux to automate testing, building, and deployment processes, significantly reducing time to market.
- Implemented **Resilience 4j** for fault tolerance in distributed systems, ensuring high availability and reliability.
- Developed scalable data pipelines with Azure Synapse Analytics, improving processing and query speed.
- Created interactive **Power BI dashboards**, enhancing real-time decision-making.

Consultant Technology , Virtusa Consulting Services ,Hyderabad, India Jan 2022 – Sept 2022

- Migrated a monolithic application to microservices using Spring Boot, enabling centralized authentication across multiple channels.
- Implemented **OAuth2** with **JWT** for secure access management in Spring Boot microservices.
- Built a responsive UI with **Angular** and Bootstrap, integrating with Spring Boot RESTful APIs.
- Developed a **GraphQL API** POC, exploring its potential for efficient data querying and manipulation.
- Integrated **Zipkin** and Spring Cloud Sleuth for distributed tracing and observability.
- Implemented **AWS solutions** (EC2, S3) and built CI/CD pipelines with Jenkins and GitHub Actions.
- Deployed scalable applications on AWS using Docker and Kubernetes.

Software Engineer, OPTUM Global Solutions (UHG) , Hyderabad, India July 2018 – Jan 2022

MRCP(Medicare Retirement and Claim Processing)

- Developed web services for claims processing and adjudication of physician and hospital claims, handling Medical &

Retirement (M&R) plans. Processed 837p and X12 data formats, validating eligibility and provider mapping.

- Built user interfaces for insurance agents and clients using Angular, enhancing accessibility and user experience for quoting and policy purchasing.
- Designed and developed **microservices** using Java, Spring Boot, following Agile methodology and Test-Driven Development (TDD).
- Developed **Apache Kafka**-based microservices for real-time inventory events streaming across multiple systems.
- Designed and implemented RESTful APIs using Spring Boot and Spring Data JPA for scalable backend solutions.
- Configured **Gradle** builds to compile, pack, and deploy Spring Boot microservices to an enterprise Docker registry for efficient containerized deployment.
- Implemented centralized configuration using **Spring Cloud Config Server** and logging with **Splunk** for better observability.
- Developed a **Grafana** dashboard by scraping **Prometheus** metrics, enabling real-time monitoring of microservices performance.

CPA(Claim Processing Applb dfgrication)

- Developed a cloud-based, multi-layered application for claims processing, migrated the legacy CPW (Claim Processing Workstation) desktop system (built with PowerBuilder) to a web-based solution with seamless system integrations.
- Implemented servlets as front controllers and developed responsive UIs using **jQuery, JSP, HTML, and CSS**, with **JavaScript** and Java for client-side validations.
- Automated deployments with Jenkins CI/CD, configuring pipelines to execute test suites periodically, ensuring 95% test coverage across the application.
- Developed and executed comprehensive test cases using **JUnit**, Mockito, and Selenium, covering functional, integration, and end-to-end testing.
- Deployed and monitored applications on **OpenShift**, ensuring scalability and efficient cloud management.
- Provided technical support for production environments, analyzing and resolving defects, ensuring system stability and optimal performance.
