

Rupika Ramisetty | Business Data Analyst

TX, USA | 832-598-4732 | rupika.rn28@gmail.com | [LinkedIn](#)

SUMMARY

- Over **3+ years** of dedicated experience as a **Business Data Analyst** analyzing complex healthcare and financial datasets, honing skills in uncovering insights and driving actionable outcomes.
- Mastery in **SQL, Python** and **R**, leveraging these tools to extract, clean and analyze data efficiently, ensuring accuracy and reliability in all analytical outputs.
- Proven ability to identify and interpret trends and patterns within data, providing strategic insights that facilitate informed **decision-making** and **drive business growth**.
- Proficient in creating visually compelling reports and interactive dashboards using **Tableau** and **Microsoft Power BI**, transforming complex datasets into easily digestible visual narratives for stakeholders.
- Demonstrated success in optimizing data workflows and processes, enhancing efficiency and productivity while maintaining **data integrity** and **quality standards**.
- Expertise in data governance, data warehousing, gap analysis, A/B testing, problem-solving, critical thinking, cost/benefit analysis, impact analysis, risk analysis, SWOT analysis, FRD, BRD, Software Requirements Specification (SRS), Use Case Diagram, enabling the delivery of precise and actionable insights that support **data-driven strategies**.
- Expertise in designing and implementing data models, optimizing queries, and ensuring data accuracy and consistency, and adept at leveraging these databases for complex **data analysis** and integration, facilitating effective **data management** and **supporting strategic decision-making**.
- Strong communication and collaboration skills, fostering **effective teamwork** and partnerships across departments to achieve shared objectives with precision and cohesion.
- In-depth understanding of the **development life cycle**, ensuring that data projects are efficiently planned, executed, and maintained throughout all stages, from initial requirements gathering to final deployment and support.

TECHNICAL SKILLS

Programming Languages:	Python, SQL, R, HTML, CSS, JavaScript
Visualization & Data Analysis	Tableau, Microsoft Power BI, MS Excel, RStudio IDE, Anaconda (Jupyter Notebook)
Database Tools:	Microsoft SQL Server, MySQL, AWS (S3, Redshift)
ETL / Optimization Tools:	PySpark, Azure Databricks, Power Query, Excel Solver
SDLC Methodologies:	Agile-Scrum, Waterfall, Scrum, SAFe and Kanban, Iterative Development Cycles
Analytical Skills:	Data Cleaning, Data Mining, Exploratory Data Analysis, Statistical Analysis, Gap Analysis, Regression Analysis, Problem Solving, Critical Thinking, Collaboration, A/B Testing, Cost/benefit analysis, Impact analysis, Risk analysis, SWOT analysis, FRD, BRD, Software Requirements Specification (SRS), Use Case Diagram
PM Tools & API Testing Tools:	Git, MS Office Suite, SAP, JIRA, MS SharePoint, Confluence, HP ALM/QC, HP Load Runner, Postman, and Swagger.
Methodologies	Agile (Scrum, Kanban, User stories, sprint planning, Retrospective meetings)

PROFESSIONAL EXPERIENCE

Syneos Health, TX

Business Data Analyst

Dec 2023 – present

- Automated healthcare **data analysis** with **Python** scripts, reducing manual effort by 30% and increasing efficiency in processing large datasets related to patient services and resource allocation while Conducting Cost/Benefit Analysis to assess the impact on operational efficiency.
- Implemented data warehousing solutions using **SQL** and **PostgreSQL** for large-scale EHR and PHR data analysis. Conducted **data cleaning** and preprocessing to ensure clinical and administrative data accuracy and reliability.
- Built predictive models using **Scikit-learn** for assessing credit risk in patient billing and insurance claims, enhancing the ability to identify and mitigate financial risks. Developed a comprehensive Use **Case Diagram** to map out risk assessment processes.
- Leveraged **SAP** and **SAS** to generate financial reports and analyze data, providing actionable insights from healthcare financial data.
- Created advanced MSBI reports utilizing Power BI, DAX queries, Power Query, and Power Pivot Excel add-ins. Developed tabular models to enhance data analysis and reporting capabilities
- Designed a **Tableau** dashboard providing real-time insights into patient care costs and service utilization rates. Implemented drill-through filters and interactive visualizations to enhance **data-driven decisions** by senior management. Utilized **SWOT Analysis** to identify areas for improving service efficiency.
- Established **data governance frameworks** and implemented **AWS Glue Data Catalog** for data cataloging and lineage tracking. Ensured data integrity, quality, and HIPAA compliance by developing and implementing **PL/SQL validation procedures**.
- Utilized **AWS S3** for **scalable storage** and implemented IAM for secure access management, enhancing the protection of sensitive healthcare information. Conducted regular **Risk Analysis** to ensure data security and compliance.
- Conducted **A/B testing** to optimize healthcare service investment decisions, improving outcomes by 20%. Worked closely with the Risk Management team to develop a comprehensive data governance framework, ensuring 100% regulatory compliance.
- Created detailed BRDs for various projects, ensuring clear **communication of business needs** to technical teams and stakeholders. Utilized Use Case Diagrams to visualize system interactions and requirements.

- Leveraged **Python** for extensive data manipulation and cleansing, applying statistical analysis to derive actionable insights that influenced strategic decisions.
- Engineered and optimized complex **SQL queries** and managed databases using **MySQL**, enhancing data retrieval efficiency and storage capabilities by improving performance and scalability.
- Applied **NumPy and Pandas** to clean and preprocess data, reducing processing errors and executing extensive data cleaning, wrangling, and mining on datasets, which streamlined data processing workflows and cut data analysis turnaround time.
- Created and implemented interactive dashboards and comprehensive reports using **Tableau** improving data visualization clarity and accessibility for over 100 users across the organization.
- Utilized advanced **text mining** techniques to analyze customer support tickets and social media mentions, identifying recurring issues and sentiment shifts that guided service enhancements and customer satisfaction strategies.
- Monitored data pipeline health and performance using **AWS CloudWatch**, proactively identifying and resolving data flow issues, increasing data availability, and minimizing business disruptions.
- Enhanced the effectiveness and scalability of data processes by using **S3** for scalable storage solutions and **AWS Lambda** for serverless computing to automate data processing operations.
- Managed version control using **Git**, ensuring seamless code integration and collaboration across development teams, which reduced code conflicts and enhanced project transparency.
- Championed the adoption of **agile methodologies** within the data team, leading bi-weekly sprints that improved project delivery times and enhanced collaboration with product managers and stakeholders.

- Developed and modified comprehensive reports using **MS Excel** and **PowerPoint**, enhancing data presentation and decision-making processes.
- Conducted complex **SQL database queries** and established a comprehensive data dictionary repository, significantly improving data quality standards and achieving 100% data transparency across the organization.
- Created dynamic scorecards and executive summary dashboards in **Power BI**, enabling real-time **performance monitoring** and **strategic decision-making** for senior management.
- Designed and developed interactive and insightful **Power BI dashboards** and **visualizations**, translating detailed business requirements into actionable insights, thereby improving operational efficiency.
- Utilized MS Visio and Rational Requisite for advanced **UML modeling**, including creating detailed use cases, process flows, screen flows, and comprehensive business requirements documentation to streamline system development specifications.
- Generated detailed weekly and monthly spending reports, abstracts, and charts, providing critical insights that guided strategic investment decisions and financial planning, while performing thorough **ad-hoc data analysis** and reporting.
- Prepared and maintained data rules spreadsheets in **MS Excel** to systematically update allowed values, findings, and profiling results, ensuring data integrity and accuracy.
- Led change management initiatives, including assessing and effectively communicating the impact of changes to stakeholders, resulting in smooth transitions and minimized disruption to **business operations**.

EDUCATION & CERTIFICATIONS

Accenture North America Data Analytics and Visualization Job Simulation on Forage	May 2024
Master's in Information Systems and Technology	May 2024
University of North Texas, TX	
Bachelor of Technology in Civil Engineering	May 2021
CVR College of Engineering, India	

ACADEMIC PROJECTS

User Data Analysis for Online Retailer

- **Objective:** Analyzed user data from an online retailer to understand user behavior and predict future user outcomes.
- **Methods:** Applied statistical modeling and machine learning techniques to extract insights from user data.
- **Outcome:** Demonstrated how advanced analytics can enhance user comprehension and improve predictive accuracy for user behaviors.

Development of Smart Village

- **Objective:** Focused on the development and study of a smart village aimed at enhancing resource-use efficiency, local self-governance, access to basic amenities, and promoting responsible behavior.
- **Tools Used:** Utilized AutoCAD to design comprehensive plans for smart village infrastructure.
- **Outcome:** Contributed to creating a sustainable and self-sufficient village model that promotes a higher quality of life and community well-being.

Identification and Mitigation of Road Safety Hazards

- **Objective:** Examined fundamental concepts of road traffic injury control and assessed the current state of traffic accidents.
- **Methods:** Identified key road safety hazards and proposed strategic countermeasures to mitigate these risks.
- **Outcome:** Developed actionable strategies to reduce traffic accidents and enhance road safety and transportation.
