PROFESSIONAL SUMMARY

As a .NET Full Stack Developer with 4 years of experience, I excel in C#, Angular, React, HTML, CSS, JavaScript, Node, Java and databases like SQL, MySQL, and MongoDB. I navigate all software development stages, from planning to testing, with a detail-oriented, creative, and solution-focused approach.

TECHNOLOGICAL SKILLS

Programming Languages:	C#, C, C++, AngularJS, JavaScript, HTML5, jQuery, Java, ReactJS, NodeJS, Angular, JSON, XML
Database Concepts:	RDBMS / SQL, MySQL, MongoDB, TOAD, PostgreSQL
Web Development Concepts:	WEB API MVC, Junit, MERN Stack, Agile development, Scaled Agile Framework, Waterfall, RUP
Software Tools:	Justin Mind, SVN, TFS, OpenShift, Git, Azure, Jenkins, JIRA, Visual Studio (2012/15/19/22)

EDUCATION

Pace University, Seidenberg School of Computer Science & Information Systems (CSIS)	New York, NY
Master of Science (MS) in Computer Science Concentration: Software Development GPA: 3.7	January 2022 – December 2023

L.J Institute of Engineering and Technology (GTU)	Ahmedabad, India
Bachelor of Engineering (BE) in Information Technology GPA: 3.5	August 2016 – June 2019

RELEVANT EXPERIENCE

UPS, Louisville, KY, Software Engineering Intern	June 2023 – December 2023
---	---------------------------

- Collaborated with a 20-member team to create a web application utilizing C#, Angular16, OpenShift, Jenkins, Visual Studio 2022, and TOAD, aimed at monitoring and organizing packages on hold in the warehouse, which enhanced operational efficiency by 50%.
- Developed an eco-friendly web app with Angular16, Tailwind, and TypeScript that computes and exhibits customers' carbon emissions from shipments, leading to 70% user engagement. The project earned third place among over 50 teams at the UPS UTG Hackathon, marking a notable accomplishment in fostering environmental awareness.

Benetrends Financial, Edison, NJ, .NET Developer (Consultant)	June 2022 – November 2022
--	---------------------------

- Crafted a 401k retirement plan management app using .NET Core, C#, REST APIs, .NET MVC, Visual Studio 2022, and Microsoft SQL Server, which led to a 50% surge in user engagement in just three months. Expertly utilized AngularJS (85%) to create dynamic and interactive user interfaces, guaranteeing smooth and responsive operations across full-stack applications.
- Developed an application with Azure for secure logins, complete CRUD functionality for managing 401k via REST APIs, and SharePoint integration for document storage, all developed with Scrum-Agile approaches, which resulted in a significant 60% increase in user engagement.

Azilen Technologies Pvt. Ltd, India, Software Engineer	April 2021 – November 2021
---	----------------------------

- Crafted a tier program using the .NET framework 4.5, LINQ, JSON, XML, HTML5, JavaScript, Visual Studio 2019 and MS SQL Server, designed to segment players into different ranks for escalated rewards according to their activity level, leading to a 25% boost in player loyalty and engagement.
- Improved web applications with C# and REST APIs to handle listings, finances, moves, and rewards for casino players, while also creating compelling complimentary offers, boosting user retention by 30%. Furthermore, facilitated client discussions to prioritize enhancement tickets for quarterly updates, ensuring 50% alignment with client requirements. Provided support for user acceptance testing to guarantee optimal delivery.

SPEC INDIA, Ahmedabad, India, Software Engineer	January 2019 – March 2021
--	---------------------------

- Revamped the website UI using AngularJS, JavaScript, HTML5, CSS, and jQuery to enhance interaction on client and admin panels. I also optimized web interfaces with HTML, CSS, and JavaScript, making them visually appealing and responsive. This resulted in a 40% reduction in load time and a 30% increase in user engagement by incorporating advanced features to improve user experience and interactivity.
- Upgraded an HRMS platform with C#, AngularJS, JavaScript, Entity Framework, and jQuery, leading to a 40% increase in user engagement through performance enhancements. This overhaul resulted in a 40% reduction in page load times and a 30% improvement in MSSQL query response times, enabling efficient management of employee records, invoicing, projects, estimations, and business relationship management, thus offering a holistic management solution.
