(934)949-8516 | rushikeshp0308@gmail.com | [LinkedIn](#) | Flushing, NY 11367

EDUCATION

The City University of New York, Queens College

Bachelor of Science in Computer Science

Flushing, New York

Expected: December 2025

Stony Brook University

Bachelor of Science in Computer Science and Applied Mathematics

Stony Brook, New York

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Business Analytics, Machine Learning, Cybersecurity, Software Engineering, Database Systems

WORK EXPERIENCE

Database Engineer & Analytics Developer

Queens, NY

Queens College – VP of Student Affairs & Enrollment – Queens, NY

March 2025 - Present

- Developed automated ETL pipelines using Python and SQL, enabling real-time analytics for student enrollment.
- Built and optimized PostgreSQL databases, improving query performance and reporting speed by 35%.
- Designed interactive dashboards in Power BI and Tableau, providing insights for decision-making across departments.
- Conducted large-scale data validation, schema optimization, and created regular backup/recovery systems.

Software Engineering & IT Audit Intern (Trading Systems)

Mumbai, India

Nomura Holdings – Mumbai, India

May 2024 - August 2024

- Automated data extraction and audit pipelines using Python and SQL, improving data quality tracking.
- Migrated reporting databases to AWS RDS (PostgreSQL), reducing retrieval times and increasing scalability.
- Tuned SQL queries to enhance data audit performance by 40% and collaborated on regulatory data reporting initiatives.

Full Stack Developer & Data Security Analyst

New York, USA

Stony Brook University VIP Research Program – New York, NY

August 2023 - May 2024

- Built backend services and data access controls for health-related datasets, ensuring security and compliance.
- Created secure APIs and handled health data in compliance with privacy protocols.
- Supported database operations and contributed to scalable system deployment through CI/CD pipelines.

Courage Vibrates Pipes

Maharashtra, India

Product Management & Supply Chain Intern

February 2021 - August 2021

- Developed Python automation scripts for inventory analysis, improving reporting accuracy by 35%.
- Analyzed supply chain data trends and provided recommendations to optimize procurement workflows.
- Built Excel-based automation scripts, accelerating weekly reporting cycles by 50%.

PROJECTS & TECHNICAL WORK

PostgreSQL-Based Hash Table Compiler

April 2025 - Present

- Created a file-backed hash table system mimicking PostgreSQL storage operations.
- Used C++ to simulate compiler-level memory access and data indexing behavior.
- Benchmarked and profiled custom storage against PostgreSQL performance metrics.
- Designed and tested schema access patterns based on real-world database loads.

NASA + Spotify Mashup Application

August 2024 – December 2024

- Integrated NASA APOD and Spotify APIs using OAuth 2.0 with FastAPI and AWS Lambda.
- Built a responsive frontend using React, Next.js, and TypeScript for seamless user experience.
- Implemented caching and async processing to improve performance and API reliability.
- Designed a modular, scalable system for secure data flow and error handling.

SKILLS

- Data Analytics:** Power BI, Tableau, SQL Analysis, ETL Pipelines
- Programming:** Python, SQL, Java, C++, Bash
- Database Systems:** PostgreSQL, MySQL, AWS RDS
- Cloud Tools:** AWS (Lambda, RDS), Docker, Kubernetes
- Other:** Data Modeling, Data Validation, Reporting Automation, Business Analytics
