

RUSHWANT KOPPOLU

Fairfax, Virginia ♦ +1 5712016208 ♦ koppolurushwant@gmail.com ♦ [Github](#) ♦ [LinkedIn](#)

SUMMARY

Results-driven Software Engineer with a strong foundation in computer science and mathematics, complemented by a background in data science. Proficient in Java, Python, and C with expertise in Angular, React, Spring Boot, and Node. Demonstrated ability to collaborate with cross-functional teams to deliver innovative solutions in fast-paced environments. Skilled in object oriented design, and database systems. Passionate about solving complex technical challenges while maintaining high standards for code quality, system reliability, and customer experience

EDUCATION

George Mason University

Master of Science in Computer Science; GPA: 3.87/4
Outstanding Academic Achievement Award Recipient

Aug 2023 - May 2025
Fairfax, Virginia

Shiv Nadar University

Bachelor of Technology In Computer Science and Engineering; GPA: 8.4/10
Minor in Mathematics and Specialization in Data Science

Aug 2019 - May 2023
Uttar Pradesh, India

SKILLS

Languages	Java, Python, Javascript, Typescript, PHP, SQL, HTML, CSS, C
Frameworks & Libraries	Node.js, Express, Angular, Spring Boot, Flask, React, Bootstrap
Tools	AWS, Kubernetes, Docker, GIT, Figma, RASA, Postman, MATLAB, PrimeNG, Swagger, JIRA
Relevant Coursework	Analysis of Algorithms, Component-Based Software Development, Software Development for the Web, Database Systems, Data Structures, Natural Language Processing, Optimization

EXPERIENCE

Dell Technologies

Software Development Engineer

2023

Bangalore, India

- Engineered a scalable, distributed analytics tool using Angular and Spring Boot that streamlined inter-team workflows and increased user engagement by 23%
- Led end-to-end product development including UI/UX design in an agile environment, collaborating with cross-functional teams to design, develop, and deploy innovative data visualization solutions
- Built interactive dashboards with D3.js and PrimeNG that transformed complex system metrics into actionable insights, enhancing decision-making capabilities across teams

Key Technologies: Angular, Spring Boot, Cypress, D3.js, NgxCharts, PrimeNG, Postman

Dell Technologies

Software Development Engineer Intern

2022

Bangalore, India

- Engineered a microservice architecture solution using Node.js, Express and Angular that efficiently processed large-scale distributed data operations, enhancing system reliability and backend scalability
- Optimized bulk query execution through efficient batching techniques, significantly reducing API calls and improving performance on large datasets
- Enhanced system efficiency by 17% through redesigning data processing workflows and implementing fault-tolerant solutions in a cross-functional team environment

Key Technologies: MongoDB, Express, Angular, Node.js, Postman, PrimeNG

PROJECTS

SNU ARC(HTML, CSS, PHP, JavaScript)

- Designed and developed a comprehensive web application that unified multiple campus services—including digital gate pass issuance, deferred payment processing, and public space reservation into a centralized platform.
- Engineered modular, database-driven components to support dynamic workflows and role-based access, improving operational efficiency and accessibility for over 5,000 students and earning formal adoption by the university administration.

University FAQ Chatbot(React, Redux, Python, RASA, MySQL, Machine Learning libraries)

- Engineered an AI-driven LLM chatbot using the Python RASA framework that efficiently processed and responded to prospective student queries, leveraging a custom-built university information database to ensure accurate and contextually relevant responses.
- Developed React front-end with Redux for state management; connected to a Python-based backend via REST APIs. Handled UI responsiveness and dynamic message rendering for seamless user interaction across devices.

On-Campus COVID Monitoring System(Javascript, HTML, CSS(Bootstrap), MySQL, PHP)

- Developed and deployed a comprehensive web platform to monitor campus COVID-19 testing processes, providing real-time pandemic situation updates and streamlining testing experiences for over 450 campus individuals through an intuitive interface and user-centric design.
