

# RUTHIKA REDDY ALIMINATI

[raliminati18@gmail.com](mailto:raliminati18@gmail.com) | +1 (774) 494-0197 | [LinkedIn](#) | [GitHub](#)

## TECHNICAL SKILLS

**Languages/Database:** Python, PowerShell, R, SQL, TSQL, NoSQL, MySQL, SAS

**Frameworks/Tools:** AWS (S3, Lambda, Glue), Tableau, Excel, Power BI (DAX), Salesforce, Snowflake, Hadoop, Git

**ML/Gen AI Frameworks:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, TensorFlow, NLTK, PyTorch, Langchain, OpenAI, MLOps

**Skills:** Data Cleaning, Data Mining, Dashboards and Reporting, Statistical Analysis, Relational Databases, Data Structures

**Certifications:** AWS Certified Cloud Practitioner, AWS Certified Data Engineer – Associate

## PROFESSIONAL EXPERIENCE

**Business Intelligence Analyst Intern** | Intuitive Surgical, California

**June 2025 – Present**

*AWS, MySQL, Automation, Snowflake, Product Lifecycle Management, PowerShell, SAP BOXI, SDLC/Agile*

- **Cross-Functional Analytics:** Designed multiple reports to support stakeholders in cross-functional teams such as supply chain and mfg. engineering, translating their business needs on supplier risk, part lifecycle management into dashboard solutions.
- **Data Engineering & ETL Optimization:** Collaborated with IT data engineers to optimize ETL workflows, integrating third-party lifecycle, supplier risk from various sources, and BOM data into enterprise databases.
- **SQL & Data Analysis:** Wrote advanced SQL queries built statistical process control charts to identify process limits in medical device testing and highlight anomalies in equipment inefficiency, helping engineers make strategic decisions.
- **Process Improvement and Documentation:** Automated Agile workflows to generate reports on contingent change orders, prioritized releases, and maintained documentation of data processes and workflows.

**NLP Research Volunteer** | University of Massachusetts Boston

**Oct 2024 - June 2025**

*Python, Natural Language Processing, Logistic Regression, Naïve Bayes, BERT, A/B Testing*

- **Data Mining & Preprocessing:** Processed large-scale real-world tweet datasets by applying tokenization, sentiment scoring, and regular expressions to extract key features for advanced text mining applications.
- **Predictive & Statistical Analysis:** Deployed machine learning models (Logistic Regression, Naïve Bayes, BERT) that detected types of misinformation (satire, fabricated, imposter), and applied hypothesis testing to identify factors influencing misinformation.
- **Experimentation & Model Benchmarking:** Conducted A/B testing and evaluated BERT-based models to benchmark classification performance, improving accuracy in detecting satire, misinformation, and fabricated content by 25%.

**Data Intern** | Social Alliance for Impact Research

**Sep 2022 - June 2023**

*Python, SQL, Power BI, Market Research, Pricing Analytics, Product Strategy*

- **Dashboard Development:** Designed interactive Power BI dashboards that visualized key market trends, customer behavior, and competitor benchmarks, which provided actionable insights to clients and enabled informed product, marketing.
- **Pricing & Competitive Benchmarking:** Designed pricing models and performed comparative pricing analytics across multiple products, to help identify optimal pricing strategies and improve revenue potential by up to 15%.

## PROJECTS

### • Massachusetts BlueBikes Dashboard | Tableau, Excel

Created an interactive dashboard to analyze ride patterns, peak usage hours, station demand, and bike-type utilization, offering actionable insights for operational planning and resource allocation.

### • Cold Email Generator using Gen AI | Python, LangChain, Prompt Engineering

Developed a B2B email automation tool using GPT and LangChain for intelligent recipient profiling, personalized content generation, and auto-customized templates, reducing manual workload and enhancing outreach effectiveness.

### • Yelp Business Reviews Pipeline | Python, AWS S3, Snowflake

Designed and deployed an end-to-end pipeline to store, clean, and analyze Yelp reviews, combining sentiment analysis in Python with Snowflake's warehousing capabilities for scalable business insights.

### • Historical Gas Prices & World Events Dashboard – Tableau

Developed an interactive Tableau dashboard visualizing U.S. gasoline prices from 1939–2010 alongside major world events, enabling viewers to explore correlations between geopolitical milestones (wars, oil crises, revolutions) and historical price trends.

## EDUCATION

**University of Massachusetts Boston**

**Graduation Date: Dec 2025**

Master of Science in Business Analytics | Concentration in AI and Big Data | GPA: 4/4

- Beta Gamma Sigma Member for Academic Excellence

**St. Francis College for Women**

**Aug 2020 - Apr 2023**

Bachelors in Economics and Statistics | Gold Medalist | GPA: 3.6/4
