

Ruthvik Rao Bobbili

Data Analyst

ruthvik@mywebemails.com | (405)-762-5233 | Seattle, USA | LinkedIn

Summary

Results-driven Data Analyst with 3+ years of experience in statistical analysis, machine learning, and data visualization. Proficient in Python, R, SQL, and BI tools like Tableau, Power BI, and Qlik Sense. Expertise in ETL processes using Apache Airflow, AWS Glue, and Apache NiFi, with advanced machine learning frameworks including TensorFlow, Scikit-Learn, and H2O.ai. Skilled in data management with AWS and Google Cloud Platform, and implementing data quality frameworks with Great Expectations and Talend. Adept at optimizing data pipelines and automating workflows using CI/CD tools and RPA Technologies.

Technical Skills

- **Programming Languages & Libraries:** Python, SQL, R, NoSQL, DAX, HTML, CSS; TensorFlow, Scikit-Learn, XGBoost, LightGBM, CatBoost, H2O.ai, NumPy, Pandas, Dask, Matplotlib, Seaborn
- **ETL & Data Engineering:** Apache Airflow, AWS Glue, Apache NiFi, dbt, Talend Data Quality, Google BigQuery, Snowflake, AWS Redshift, Azure Data Factory
- **Databases & Data Warehousing:** MySQL, MS SQL, PostgreSQL, MongoDB, Redshift, Snowflake, BigQuery, SparkSQL
- **Data Visualization & BI Tools:** Tableau, Power BI, Qlik Sense, Looker, Google Analytics, MS Excel
- **Cloud Platforms, Automation & Project Management:** AWS (S3, Athena, Lambda), Google Cloud Platform, Azure, Databricks; CI/CD (Jenkins, Git), RPA (UiPath), Apache Kafka, Alteryx, Docker; Jira, Confluence, Trello, Bitbucket

Professional Experience

Data Analyst, Capital One

10/2023 – Present | Remote, USA

- Designed and implemented robust ETL pipelines using Python, SQL, and AWS Glue to integrate and manage diverse data sources. Leveraged AWS S3 for scalable storage and AWS Redshift for data warehousing.
- Led advanced data cleaning and transformation efforts, addressing over 1,000 instances of missing values, outliers, and inconsistencies. Utilized Pandas and NumPy in Python for data manipulation, and SAS for statistical analysis. Automated processes with Jenkins CI/CD pipelines, enhancing efficiency and accuracy.
- Conducted comprehensive data analysis using Python and SQL, employing machine learning algorithms with Scikit-Learn and TensorFlow to generate predictive insights. Applied statistical techniques with R to improve data accuracy by 85% and relevance by 92%.
- Developed interactive dashboards and detailed reports using Power BI, Tableau, and Matplotlib. Generated 25 insightful reports for stakeholders, effectively communicating data-driven findings and supporting strategic decision-making.
- Ensured data integrity and compliance by implementing data quality checks and validation processes with AWS Athena and Apache Airflow. Monitored and enforced data standards, adhering to regulatory requirements such as GDPR and CCPA.
- Automated data cleaning, integration, and deployment processes, integrating CI/CD pipelines with Jenkins and using Git for version control. Streamlined workflows with Alteryx and Apache Kafka, reducing manual tasks by 50% and enhancing operational efficiency.
- Collaborated with cross-functional teams to gather requirements and ensure data solutions met business needs. Documented data-cleaning methodologies, transformations, and data pipelines using Confluence and JIRA for knowledge sharing and project management.

Data Analyst, Amazon

09/2022 – 09/2023 | Seattle, USA

- Developed and deployed machine learning models using Scikit-Learn and TensorFlow for customer behavior prediction, achieving 85% accuracy and significantly improving targeting strategies.
- Engineered ETL workflows with Apache Airflow and AWS Glue, optimizing data pipelines and reducing processing times by 40%. Utilized AWS Lambda for serverless computing, enhancing scalability and efficiency.
- Built and maintained RESTful APIs using Node.js and TypeScript, integrated with AWS API Gateway and DynamoDB for seamless and high-performance data retrieval.
- Enhanced data storage and query performance with AWS Redshift and Snowflake, improving data management and reducing retrieval times by 30%.
- Implemented real-time data streaming and processing using Apache Kafka and Apache Flink, enabling low-latency data ingestion and actionable insights.
- Designed and developed interactive dashboards and BI reports with Tableau and Power BI, increasing stakeholder engagement by 25% and reducing marketing costs by 20%.
- Leveraged Looker for advanced data exploration and visualization.
- Boosted SQL query performance through indexing, partitioning, and advanced optimization techniques, achieving a 30% improvement in data processing efficiency. Used dbt (data build tool) for data transformation and version control.
- Utilized GitHub for version control and collaborative development, ensuring code quality and streamlined integration with continuous integration/continuous deployment (CI/CD) pipelines.
- Managed projects with Jira for agile project management and Confluence for comprehensive documentation, facilitating clear communication and effective project execution.
- Applied data quality and governance best practices, implementing data validation processes with Great Expectations and maintaining compliance with GDPR and CCPA.

Data Analyst, Reliance

- Designed and deployed advanced machine learning models using CatBoost and H2O.ai for large-scale data analysis, enhancing data accuracy by 95% through precise classification and prediction techniques.
- Automated ETL processes with Apache NiFi, integrating with Google BigQuery for scalable data warehousing and real-time analytics. Achieved a 40% reduction in processing time through streamlined data pipelines.
- Processed and analyzed over 10TB of data using Python libraries such as Dask for parallel computing, along with Pandas and NumPy for comprehensive data manipulation, feature extraction, and model validation.
- Created and optimized interactive dashboards and visualizations using Qlik Sense, leading to a 30% increase in data-driven decision-making efficiency. Communicated complex insights effectively to stakeholders through dynamic reporting.
- Collaborated with cross-disciplinary teams, including data engineers, software developers, and business stakeholders, to enhance and integrate Gradient Boosting and Random Forest models, improving system performance by 25%.
- Implemented data quality checks and validation frameworks using Talend Data Quality to ensure data integrity and consistency, addressing data anomalies and improving overall data reliability.
- Utilized SQL and Apache Impala for high-performance data querying and exploration, alongside dbt (data build tool) for data transformation and documentation, streamlining data workflows and enhancing analytical capabilities.
- Managed code and project workflows using Bitbucket for version control and continuous integration/continuous deployment (CI/CD) pipelines, ensuring robust code management and smooth deployment processes.
- Coordinated with project teams using Trello for task management and Confluence for project documentation, ensuring clear communication and effective execution of analytics initiative.

07/2019 – 12/2020

Hyderabad, India

Education		
Master of Science , <i>Oklahoma State University</i>	01/2021 - 07/2022 Oklahoma, USA	
Computer Science		
Bachelor of Technology , <i>Jawaharlal Nehru Technological University</i>	08/2016 - 07/2020 Hyderabad, India
