EXPERIENCE

Software Engineer | Yani Lawn Care Inc

August 2023 - September 2023

Multi-page informational business website

HTML | CSS | JavaScript

- Led the end-to-end design, development, and launch of Yani Lawn Care's responsive website within two months, independently managing all phases from planning to deployment.
- Developed Yani Lawn Care's public site with clean, semantic HTML and optimized styling, resulting in a 25% improvement in Lighthouse SEO and accessibility scores.
- Engineered Yani Lawn Care's customer-facing website using HTML, CSS, and JavaScript; achieved a 95% reduction in page load times by refactoring back-end database queries and optimizing image delivery.
- Ensured mobile responsiveness and consistent UI across devices, delivering a smooth user experience and professional presentation for the client's online presence.
- Live Site: yanilawncare.com

PROJECTS

Software Engineer | ChefSearch

September 2024 - December 2024

Personalized Recipe Finder Website

JavaScript | React | Firebase Authentication | Firestore | API Integration | EmailJS

- Developed ChefSearch, a responsive, user-centric recipe app that dynamically generates personalized meal suggestions by filtering dietary needs, cuisine types, and meal categories.
- Engineered a responsive interface for ChefSearch using React and JavaScript, contributing to a 30% increase in average session duration and a 25% reduction in bounce rate during user testing.
- Integrated real-time recipe APIs, delivering 10+ unique recipe results and improving user search satisfaction scores by 40% based on feedback from usability tests.
- Forged a streamlined communication channel via EmailJS integration, enabling swift resolution of user inquiries; this reduced the backlog by 20 tickets per week and allowed support to focus on complex issues.
- Performed cross-device testing using npm start and browser dev tools, verifying responsive design and visual consistency across desktop and mobile environments.

Front-End Software Engineer | Jasper Link

February 2023 - April 2023

Social Media Mobile Application

JavaScript | React Native Expo | Firebase | Firestore | Algolia

- Co-led the creation of Jasper Link, a React Native mobile app for over 3,000 Manhattan College students, featuring personalized achievement highlights; user testing showed a 50% increase in daily app interactions during launch week.
- Pioneered front-end development of Jasper Link, crafting interactive mobile UI components using React Native Expo, which resulted in a 40% increase in user engagement within the first quarter.
- Boosted discoverability of student accomplishments by integrating Algolia-powered search, resulting in faster queries and a smoother browsing experience across the app.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: React, React Native, Material-UI

Backend & Databases: Firebase Authentication, Firestore, RESTful APIs, MySQL

Developer Tools: Git, npm, VS Code, Chrome DevTools

Other: Responsive Design, Agile Methodology, Debugging, Performance Optimization

EDUCATION

Manhattan College - Bachelor of Science, Computer Science
