SKILLS

Programming Languages: Python, C, C++, Java, JavaScript, TypeScript, SQL, Go

Databases: Oracle 21c, MySQL, Postgre, MongoDB, Redis, NoSQL

Frameworks & Platforms: FastAPI, React, Node.js, Docker, Linux, Angular, Spring Boot

Core Competencies: Data Structures, OOP Principles, Problem Solving, Analytical, System Design
Technical Documentation, Communication Skills

WORK EXPERIENCE

ChannelCore

June 2025 – Aug 2025

Software Development Intern

Irvine, California

- Led migration of a Replit created React + TypeScript application from Replit to **AWS**, designing a cloud-native architecture with VPC, subnets, and security groups to ensure scalability, reliability, and secure connectivity.
- Deployed backend APIs on **AWS Elastic Beanstalk**, frontend on **S3**, and provisioned **RDS (PostgreSQL)** along with Elasticsearch to enable fast, scalable search and a fully integrated end-to-end workflow.
- Built **AWS Lambda** functions for serverless database access, reducing infrastructure overhead along with **IAM**

FIS Global

Aug 2023 - July 2024

Software Engineer - Product Development

Pune, India

- Developed over 30 client-specific features for the FIS Apex Securities Finance platform across multiple browsers, utilizing a **C++ codebase**, **Java interfaces**, and **SQL** to enhance functionality and user experience.
- Delivered over 15 hot-fixes for production and User Acceptance Testing(UAT) defects, ensuring timely resolution of critical issues.
- Conducted detailed code reviews to ensure compliance with C++ coding standards and best practices, enhancing code quality and staying motivated, fostering team adherence to industry benchmarks.
- Automation of the upgrade of third-party libraries, including **zlib** and **cryptopp**, by developing Python-based Jenkins scripts, **boosting upgrade efficiency by 60%** and minimizing manual intervention.
- Resolved 50+ client production support tickets by reproducing and debugging issues using problem solving skills in the C++ codebase, performing root cause analysis, and delivering fixes that improved resolution efficiency.

FIS Global

June 2022 - Aug 2023

Information Technology Trainee

Pune, India

- Designed and executed unit tests using the **ApexGoogleUnitTest** Framework for C++ and **JUnit** for Java, achieving **80% code coverage**, which significantly improved feature reliability and quality assurance.
- Managed Oracle pluggable databases, ensuring 99.9% uptime and seamless connectivity for the Apex product.
- Employed Jenkins CI/CD and SVN version control to automate and manage build and deployment pipelines, improving code and project delivery, efficiency and traceability.

TECHNICAL PROJECTS

KnowledgeNest

- Built a microservices based online learning platform using Flask, React, MySQL and PostgreSQL, using authentication, course management, enrollment, content delivery, and reviews.
- Integrated services via an API Gateway, implemented dashboards, analytics, and CI/CD pipelines, ensuring scalability, observability, and end-to-end functionality.

EventHub

- Developed a fullstack event management platform using FastAPI, React, and PostgreSQL, supporting event creation, registration, and attendee management.
- Implemented real-time notifications, dashboards, and search/filter functionality, ensuring seamless event discovery

EDUCATION

University at Buffalo - The State University of New York

Aug 2024 - Dec 2025

Master's in Computer Science with Specialization in Systems

P.E.S Modern College of Engineering, India

Aug 2019 - May 2022

Bachelor of Engineering in Computer Engineering, Minor as Machine Learning

9.16/10 GPA
