

Rutuja Karad

Data Engineer

443-941-5143 | rutuja.k@mycvscout.com | Baltimore, MD | [LinkedIn](#)

SUMMARY

- **Data Engineer** with **3+ years** of experience designing data-intensive applications leveraging **Cloud Data Engineering**, Data Warehousing, Hadoop Ecosystem, Big Data Analytics, Data Visualization, and Data Quality solutions.
- Experience developing interactive dashboards using **AWS Quick Sight**, **Tableau**, and **Power BI**, visualizing key performance indicators (KPIs) from **Amazon Redshift & Snowflake** Data warehouses for business stakeholders.
- Engineered enterprise solutions by employing batch processing with Databricks and integrating streaming frameworks, including **Spark Streaming**, **Apache Kafka**, and **Apache Airflow**.
- Well-versed in multiple **Python** and **R** libraries such as **NumPy**, **Pandas**, **Matplotlib**, **ggplot2**, **SciPy**, **Seaborn**, and **TensorFlow**.
- Proficient in **ETL processes** and **data warehousing** with expertise in **AWS Redshift** and **Snowflake**, streamlining data storage and retrieval systems, and optimizing reporting accuracy through **SSIS** for **OLTP/OLAP databases**.

SKILLS

Methodologies: Agile/Scrum, Waterfall

Big Data Ecosystem: Apache Spark, Apache Kafka, Apache Nessie, Hadoop, Hive

Languages: Python, R, Scala, SQL, Spark SQL, DAX

ETL & Visualization Tools: SSIS, Tableau, Power BI (DAX, Power Query), Microsoft Excel, Alteryx, Qlik, SAS, DBT

Cloud Technologies: AWS (S3, Lambda, Glue, Athena, AWS Pipeline, Redshift), Azure Databricks

Databases: Oracle, SQL Server, MySQL, PostgreSQL, MongoDB, Snowflake

Data Skills: Data Warehousing, ETL, Statistical Analysis, Data Modeling, Data Cleaning, EDA, A/B Testing, Time Series Analysis

Libraries: NumPy, Pandas, Matplotlib, SciPy, ggplot2, Seaborn, TensorFlow, Keras

ML Models: Linear Regression, Logistic Regression, Decision Trees, Random Forest, K-Means, SVM, Gradient Boost (XGBoost)

Other Tools: Git, GitHub, Microsoft Office Suite (Word, Outlook, PowerPoint), Apache Airflow

EDUCATION

Master of Science in Data Science

University of Maryland, Baltimore County, MD

May 2024

Bachelor of Technology in Engineering

Cummins College of Engineering for Women, Maharashtra, India

May 2021

WORK EXPERIENCE

Principal Financial, NY | Data Engineer

Sep 2023 – Present

- Built and deployed **ETL** (Extract, Transform, Load) jobs using **AWS Glue crawlers** and Spark scripts, automating data ingestion from various sources into a data warehouse, saving 2 hours of manual workload per week.
- Optimized **AWS Redshift** performance by identifying and resolving performance bottlenecks using query plans, workload management, and index creation, resulting in a 20% increase in query execution speed.
- Migrated data aggregation layer from legacy services to Snowflake unitizing Data Build Tool (**DBT**) models resulting in up to 70% cost savings and improved query performance.
- Designed and implemented a robust data pipeline using **Snowflake**, **Apache Airflow**, and **Python** to ingest, transform, and load 5 TB daily, improving data processing efficiency by 25%.
- Orchestrated a complex data processing workflow consisting of multiple stages (data extraction, transformation, loading) using AWS Pipeline, improving data pipeline reliability and 40% reduction in data processing errors.
- Designed interactive dashboards in **Power BI**, leveraging **DAX** and **advanced DAX** concepts to monitor **KPIs** like market trends and portfolio performance, providing actionable insights to senior management.
- Utilized **Excel** and **SQL** to query, sort, and manage data with less than 2% discrepancies, while enhancing database performance by optimizing **SQL queries**, resulting in a 35% reduction in execution time.

KPIT Technologies, India | Data Engineer

Aug 2020 – Jul 2022

- Constructed various **ETL/ELT pipelines** using **Databricks notebooks** and SQL to extract, transform, and load data from multiple sources into the data warehouse and lakehouse environments.
- Engineered **ETL pipelines** using **Azure Data Factory** to extract, transform, and load data from various sources into **Azure data stores**, automating data integration processes and reducing manual effort by 50%.
- Designed and implemented an end-to-end data pipeline using **Azure Data Factory (ADF)**, automating data movement from multiple sources (databases, APIs) to ADL, reducing manual intervention by 70% and increasing data ingestion efficiency by 35%.
- Architected interactive **dashboards** in **Tableau**, **QlikView**, **Looker**, and **SAS Visual Analytics**, translating complex datasets into actionable insights, and empowering stakeholders to make informed **business decisions**.
- Crafted **ad-hoc SQL queries** using joins, database connections, and **transformation** rules to fetch and transform data from legacy **MySQL** and **SQL Server systems**, improving data retrieval speed by **20%** and automating repetitive tasks.
- Collaborated with marketing to design and execute **A/B tests**, measuring the impact of marketing campaigns on ROI.
