SUMMARY

Software Engineer with 3+ years of experience building scalable backend and full-stack applications in Telecom, media, and edtech domains. Experienced in Full-stack development, automated testing, and cloud deployment. Proven ability to deliver high-performing solutions aligned with compliance and architectural integrity.

EDUCATION

California State University, Long Beach Master of Science - Information Systems	Aug. 2023 – May. 2025 Long Beach, CA
• Coursework: Wireless Systems and Mobile Applications, Distributed Computing, Object-Oriented Design, Artificial Intelligence.	
University of Mumbai Bachelor of Engineering - Computer Engineering	Aug. 2017 – May. 2021 Mumbai, IN
• Coursework: Data Structures, Algorithms, Database Management Systems, Networks, Embedded Systems, Web Development.	

WORK EXPERIENCE

Web3Fusion Software Developer	Jul. 2025 – Present Long Beach, CA
• Designed event-driven microservices with Java , Spring Boot , Kafka , and PostgreSQL , supporting asynchronous data flows across services.	
• Ingested 1M+ events/day into Druid via Kafka and Spark Streaming , enabling sub-second dashboard queries.	
• Automated infrastructure provisioning with Terraform and CI/CD pipelines via GitHub Actions , reducing deployment time by 50%.	
California State University, Long Beach Student Assistant	Dec. 2023 – May. 2025 Long Beach, CA
• Developed an Android app using Java and Kotlin , implementing Material Design and ARIA semantics for WCAG 2.2 AA compliance.	
• Integrated accessibility tests with Espresso , Android Accessibility Test Framework, and Firebase Test in CI/CD pipeline to enforce standards.	
• Deployed Trino query gateway on AWS EKS with Helm, cutting ad-hoc query latency by 60%.	
Jio Platforms Ltd Software Engineer	Aug. 2022 – Jul. 2023 Mumbai, IN
• Processed 10M+ records/day in an Apache Spark ETL pipeline on AWS EMR , improving throughput by 50%.	
• Created Power BI dashboards and SSRS reports used by 5+ departments to monitor trends and reduce bottlenecks by 40%.	
• Tuned SQL queries with partitioning and pagination, reducing latency by 400ms and improving responsiveness of operational reports.	
Bin-dass-deal Software Engineer	Jul. 2021 – Jul. 2022 Mumbai, IN
• Containerized Java microservices with Docker and Kubernetes , deploying to EKS clusters for zero-downtime upgrades.	
• Integrated Redis as a caching layer across Java microservices, enabling 5,000+ concurrent sessions & reducing latency by 45%.	
• Integrated Spring Batch for 10K+ entity uploads, eliminating timeouts and boosting system uptime to 99.9% .	
Bin-dass-deal Software Engineer Intern	Dec. 2020 – May. 2021 Mumbai, IN
• Engineered RESTful APIs with Java and Spring Boot (Layered MVC) and delivered dynamic front-end modules using Angular .	
• Integrated APIs into the Apigee API Gateway with OAuth 2.0 and mTLS, ensuring secure and reliable data exchange.	
• Optimized complex Hibernate entity mappings and Oracle SQL queries (indexes, execution plans), improving query performance by 40%.	
• Implemented Memcached-backed distributed caching to reduce database load and enhance API response times.	

ACADEMIC & PERSONAL PROJECTS

Cloud Identity Management Service – Java, Spring Boot, PostgreSQL, MongoDB, OAuth2, Jenkins, Kubernetes	Jun. 2024 – Aug. 2024
• Developed OAuth2-based RESTful microservices with Spring Boot and PostgreSQL to secure user identity workflows.	
• Automated Jenkins CI/CD pipelines deploying Dockerized services to Kubernetes clusters, enabling zero-downtime multi-region releases.	
Real-Time Analytics Pipeline – Java, Kafka, Druid, Trino, AWS EKS, Helm, Prometheus, Grafana	Jan. 2023 – Mar. 2023
• Designed event-driven Kafka ingestion processing one million daily events, storing optimized segments in Druid for analytics.	
• Deployed Trino query gateway on AWS EKS with Helm charts, reducing average query latency by sixty percent.	

SKILLS

Languages & Frameworks: Java (Spring Boot/MVC/Data, J2EE), C/C++, Scala, Go, Python, Swift, Rust
Web & Front-End: React, Angular, JavaScript (ES6+), TypeScript, HTML5/CSS3, Redux, async programming
Architecture & APIs: Microservices, event-driven design, REST/RPC/GraphQL, OpenAPI/Swagger
Cloud & DevOps: AWS (EKS, Lambda, SQS), GCP, Azure, Docker, Kubernetes (EKS/GKE/AKS), Helm, Terraform, Jenkins, GitHub Actions
Distributed Systems & Observability: Kafka, Druid, Trino, Prometheus, Grafana, fault tolerance, resiliency, ELK
Data & Persistence: PostgreSQL, MySQL, MongoDB, Cassandra, Redis, Memcached, JDBC, Hibernate
CI/CD & Testing: Jenkins, GitHub Actions, JUnit, Mockito, TestNG, Selenium
Containerization & Orchestration: Docker, Kubernetes, Helm, Spinnaker
Networking & Security: OAuth2, mTLS, HTTP/HTTPS, load balancing, JVM internals
