

SAADHANA REDDY KOOTHATI

[LinkedIn](#) | +1 (908) 417-1802 | saadhanareddy329@gmail.com

EDUCATION

Master of Science in Computer Science, Rowan University, New Jersey.

December 2023

Coursework: Data Mining, Data Warehousing, Advanced Design and Analysis of Algorithms, Advanced Web Programming

Bachelor of Science in Information Science and Engineering, VTU, India.

August 2020

Coursework: Design and Analysis of Algorithms, Advanced DBMS, Object Oriented Programming, Big Data, Data Structures

TECHNICAL SKILLS

Programming Languages:	Python, SQL, Java, C, C++, JavaScript, Dart
Databases:	Snowflake, MS SQL Server, Oracle SQL, MySQL, NoSQL (Redis, MongoDB, PostgreSQL)
Data Science and Machine Learning:	Numpy, Pandas, PyTorch, PySpark, OpenCV, Tensorflow, Open AI
Web Development and Frameworks:	RESTful APIs, Fast API, Spring Boot, Flutter, SQL Alchemy, BeautifulSoup4, Postman
Cloud Platforms:	Amazon Web Services (EC2, Lambda, S3, RDS, DynamoDB, ELB, IAM, Redshift, Glue, EMR, RDS, Kinesis, Data Pipeline, QuickSight, CloudWatch, ECS, Athena, OpenSearch, CodeCommit), Google Cloud (Big Query), Microsoft Azure, Hadoop
ETL and BI:	Databricks, DBT, Alteryx, Tableau, PowerBI, Kibana, Apache Spark, Apache Kafka, Apache Airflow
DevOps Tools:	Docker, Kubernetes, CI/CD, Jenkins
Tools and Technologies:	Visual Studio Code, Google Colab, PyCharm, IntelliJ, Jupyter, Git, Jira, MS Office, ServiceNow

WORK EXPERIENCE

Data Engineer, YLift Inc., New York City, NY

September 2024 – Present

- Led the team of 5 for **migrating over 3TB** of on-premise **MySQL data** to **Snowflake**, developed robust data validation rules ensuring uptime of **data pipelines** by **99.8%**.
- Developed **Python scripts** to automate schema mapping, column matching, and data type conversion, significantly reducing manual effort and improving data readiness and consistency by **30%**.
- Accelerated report creation for **analysis sales and incentive data** by designing and creating **customizable dashboards**, reducing more than 20 manual work hours and enabling real-time insights for better decision-making.
- Handled code repository and production issues on daily basis while maintaining documentation for all implemented proof of concepts and services deployed in production.

Data Engineer, Quanti LLC, Philadelphia, PA

January 2024 – July 2024

- Enhanced **Snowflake** workflows by replacing over 100 **SQL** procedures with **Python**, utilizing **Snowpipe**, **Streams**, and **Tasks** to automate **API data ingestion** and transformed data using **Databricks**, increasing efficiency by **25%**.
- Enhanced efficient **data transfer** between **Databricks** and **Snowflake**, optimized performance for cost savings, and enabled real-time data insights for business decision-making.

Data Engineer, Nspark Software LLC, Glassboro, NJ

September 2023 – December 2023

- Optimized **ETL pipelines** with **Apache Spark**, and **Amazon RDS**, enhancing **data ingestion**, transforming, and performance. Developed **Power BI** dashboards, boosting operational insights accuracy by **20%**.
- Conducted **anomaly detection** and **exploratory data analysis** leveraging AWS services, employing **time series algorithms** like **ARIMA**, **SARIMA**, and **Prophet** to provide actionable insights.

Data Engineer II, Harman Connected Services Pvt. Ltd., India

October 2020 – July 2022

- Streamlined data workflows with **Python** and **C++**, managing both live and batch streams from **Kinesis** and **Firehose**, ensuring high data availability and integrity across automotive systems.
- Optimized real-time data processing for automotive infotainment systems, identifying and **resolving firmware issues**, reducing **data processing** errors by **35%**, and improving system performance and client network support.

PROJECTS

Comprehensive ETL Pipeline with Azure, Databricks, Snowflake, and PowerBI

- Managed crash reporting data from government websites into **Azure Data Lake Gen2**. Streamlined **data migration** to **Snowflake** via **Azure Data Factory** and **Blob Storage**, enabling warehousing and advanced analytics.
- Performed **data cleaning** and transformation in **Databricks**, resolving data quality issues, and building optimized fact and dimension tables. Developed complex **data models** with **DBT**, **Snowpark**, and **Snowflake**, ensuring efficient and accurate workflows.
- Designed interactive **PowerBI** dashboards and **orchestrated** the entire **ETL** process using **Apache Airflow**, enhancing data accessibility, operational efficiency, and real-time insights powered by Snowflake's capabilities.

CERTIFICATIONS

- AWS Certified AI Practitioner [Credential](#)
- AWS Certified Solutions Architect – Professional [Credential](#)
- AWS Certified Data Engineer – Associate [Credential](#)
- Snowflake SnowPro Core Certification [Credential](#)
