

Skills

- SQL (SQL Server, MySQL, PostgreSQL)
- Python
- Tableau
- Excel (VLOOKUP, Conditional Formatting, Pivot Tables)
- Microsoft Azure (DataBricks, Azure Data Lake, Azure Data Warehouse)
- Microsoft Power BI

Projects

AMD STOCK MARKET RISK ANALYTICS

December 2025

- Utilized Python to import and transform CSV financial data into normalized SQLite database
- Used SQL to implement data validation checks, calculated key financial metrics including moving averages and volatility, and created reusable ETL processes for reproducible analysis
- Designed interactive Tableau dashboard visualizing price trends, annuals returns and volatility patterns, helping stakeholders to identify 156% growth period and make data-driven investment recommendations based on statistical insights

Work Experience

DATA OPERATIONS SPECIALIST/MEDICAL RECORDS ANALYST – Advanced Sleep Neurodiagnostic – Farmington Hills, MI

March 2022 - October 2024

- Analyzed and validated 500+ patient records monthly, used Excel cross-referencing to catch patient record discrepancies, resolving 50+ errors weekly before they hit the billing stage and achieved 99.8% accuracy rate in clinical data reporting and regulatory compliance audits
- Identified and corrected data entry errors across patient referrals, insurance documentation and clinical reports through root cause analysis, reducing billing cycle time by 15%
- Maintained comprehensive electronic health records (EHR) databases and ensured data integrity

ADMINISTRATIVE DATA COORDINATOR – Michigan Muslim Community Council – Royal Oak, MI

December 2018 - February 2020

- Utilized Excel to organize, analyze, and visualize financial and operational data to create summary reports and dashboards to track organizational metrics and support leadership decision-making
- Designed and maintained complex filing systems and databases for donor records, correspondence tracking, and program documentations, ensuring data accessibility and supporting retrieval time reduction of 40%
