

SAAKSHI BHATT

saakshibhatt.14@gmail.com ♦ (781) 535 4884 ♦ [LinkedIn](#)

Data professional with 3 years of experience in data analysis, statistical modeling, and applied machine learning. Skilled in transforming raw data into actionable insights through data visualization, predictive modeling, and storytelling. Experienced in working with business teams to build data-driven solutions in marketing, operations, and product analytics.

EDUCATION

University of Texas at Arlington

Master of Science (MS) – Computer Science

Silver Oak University

Bachelor of Technology, Computer Science and Engineering

Arlington, TX

August 2024 – May 2026

Ahmedabad, India

July 2020 – June 2024

TECHNICAL SKILLS

- **Analysis & BI:** SQL, Excel (Pivot Tables, VLOOKUP), Tableau, Power BI, Google Data Studio
- **Programming & ML:** Python (Pandas, NumPy, Scikit-learn, Statsmodels, Matplotlib, Seaborn), R (basic)
- **Databases & Big Data:** PostgreSQL, MySQL, MongoDB, Spark (basic ETL, PySpark)
- **Cloud & Tools:** AWS (Redshift, S3, Lambda), Git/GitHub, Jupyter, APIs
- **Core Skills:** Data Cleaning, Feature Engineering, Statistical Analysis, Hypothesis Testing, A/B Testing, Predictive Modeling

PROFESSIONAL/INTERNSHIP EXPERIENCE

Global Advertisers Pvt Ltd | *Data Scientist (Full time)*

March 2024 to July 2024

- Designed customer segmentation models using clustering (K-Means) on ad campaign data to optimize targeting strategies. Built regression and time-series models in Python to forecast ad performance and spending trends.
- Automated data pipelines to extract, clean, and load large datasets from MySQL into dashboards. Created Tableau dashboards for campaign ROI, click-through rates, and user engagement metrics.

Tech4Quality Life LLP | *Data Analyst (Full Time)*

May 2021 to March 2024

- Collected, cleaned, and analyzed healthcare and e-commerce datasets to support business decisions. Designed KPI dashboards in Power BI and Tableau for sales trends, customer churn, and product performance.
- Conducted hypothesis testing and A/B experiments to evaluate impact of new features and campaigns. Partnered with product managers to translate findings into actionable business strategies.

Elite Evince Technologies | *Data Analyst Intern*

June 2022 to July 2022

- Analyzed medical imaging datasets for research teams, producing reports on classification accuracy and patterns.
- Built Python scripts for automating repetitive Excel-based reporting tasks, saving analyst time. Created visualizations in Seaborn and Matplotlib to communicate results to non-technical stakeholders.

PROJECTS

Customer Churn Prediction | *Python, Scikit-learn, PostgreSQL*

Built a predictive model to identify at-risk telecom customers. Engineered features from call records and customer history; achieved strong recall in identifying churn cases. Integrated results into Power BI dashboards for retention teams.

Royal Enfield (A Unit of Eicher Motors Limited) | *Website Development | Node.js, HTML, CSS, MongoDB*

- Developed and deployed a responsive website from design mock-ups to production. Built backend services and integrated database solutions to support user-facing features.

Sales Forecasting Dashboard | *Tableau, SQL, Python*

- Designed an interactive Tableau dashboard with sales trends, seasonality, and regional breakdowns. Implemented ARIMA and Prophet time-series models in Python to provide future sales predictions.

Healthcare Analytics Platform | *Python, Pandas, Power BI*

- Processed patient admission and diagnosis datasets for a hospital group. Built KPIs to track patient wait times, length of stay, and readmission rates. Shared interactive dashboards with executives to optimize resource allocation.

LEADERSHIP & INVOLVEMENT

- **Workshops:** Presented insights at internal workshops on SQL optimization and data visualization best practices., and IIT Bombay's entrepreneurship awareness program.
- **Participation:** Ideathon by E-cell, IGNITE for Start-up project (July 2022)
- **Award:** Recognized as Best Employee of the Year at Tech4Quality Life LLP (2023).
- **Hackathon Finalist (2024):** Finalist in National Hackathon 2023: Built a cloud-based resume screening system.
