## EDUCATION

08/2023 – 12/2024  
New York, USA

### **Business Analytics | Master of Science Adelphi University**

Relevant Courses: Data Visualization for Business Analytics, Applied Machine Learning, Optimization & Prescriptive Models, Text Analytics, Statistical Methods, Uses & Abuses of Data in Business, Database Management System, Introduction to Computer Programming.

08/2014 – 11/2019  
Pune, India

### **Computer Engineering | Bachelor of Engineering P.E.S Modern College of Engineering**

## PROJECTS

08/2024 – 12/2024  
Adelphi University

### **Patient No-Show Prediction**

- Leveraged real-world healthcare data from Kaggle to develop a robust predictive analytics model, identifying key drivers of patient no-shows and enabling actionable insights to improve operational efficiency and resource utilization.
- Data Preparation: Performed advanced data cleaning and feature engineering and handled class imbalance using SMOTE (Synthetic Minority Oversampling Technique) to ensure model reliability.
- Machine Learning Models: Built and optimized models like Gradient Boosting, XGBoost, and Random Forest, achieving an AUC of 0.84 and identifying critical predictors such as prior no-show history and waiting times.
- EDA and Visualization: Conducted exploratory data analysis to uncover demographic and behavioral trends impacting appointment adherence using Tableau.
- Association Rule Mining: Applied Apriori algorithm to identify relationships between chronic conditions and no-show tendencies for targeted interventions.

08/2023 – 12/2023  
Adelphi University

### **Netrality Prospect Finder**

- Developed a predictive model using machine learning algorithms to identify potential customers from a prospect list for the Netrality Data Center Business Challenge at Adelphi University (Oct 2023 – Dec 2023)
- Conducted comprehensive Exploratory Data Analysis (EDA) utilizing advanced visualization tools such as Tableau, Matplotlib library, and coding platforms including R Studio and Jupyter Notebook
- Applied robust data cleaning and preprocessing techniques to handle missing values and outliers, ensuring data integrity
- Implemented various regression and classification algorithms to determine the most effective model for predicting potential customers
- Evaluated model effectiveness through key performance indicators, refining and optimizing strategies based on outcomes
- Delivered actionable business insights to improve customer prediction accuracy

## WORK EXPERIENCE

01/2024 – 12/2024  
New York, USA

### **Student Technologist (Graduate Assistant) Adelphi University**

## WORK EXPERIENCE

Faculty Center for Professional Excellence

- Assisted professors with Moodle course grader. Troubleshooting and support for technical issues within Moodle, improving user experience and learning efficiency
- Updated support materials such as guides and FAQs to facilitate independent navigation of Moodle
- Managed backend setup of Moodle and Turnitin for university, conducting trials to check AI detection percentage and creating reports based on findings.

09/2023 – 12/2024  
New York, USA

### **Graduate Assistant Adelphi University**

Hy Weinberg Center Communication disorders

- Managed data records for clients and collaborated with Clinicians to create personalized plans for clients.
- Developed and executed a module to scan barcodes and monitor Clinic Manuals check-ins/outs utilizing Python, JavaScript, and SQL.

06/2021 – 05/2023  
Pune, India

### **Process Executive Cognizant Technologies**

- Successfully provided solutions for Salesforce infrastructure for the client, demonstrating proficiency in building process models and triggers for the UI.
- Played a key role in enhancing customer satisfaction by implementing a tailored service model.
- Managed the set-up and configuration of North American Salesforce users, addressing their requirements and troubleshooting operational analytics and security issues
- Obtained Salesforce Admin and Advance Admin certification, showcasing expertise in Salesforce administration and advanced functionalities.

09/2020 – 06/2021  
Pune, India

### **Operations Representative Concentrix India PVT LTD**

- Implemented process improvements that led to enhanced efficiency and a reduction in operational costs.
- Analyzed and resolved customer issues in a timely manner, maintaining a 95% customer satisfaction rate.
- Collaborated with cross-functional teams to streamline communication and optimize workflow processes.
- Utilized effective inventory management techniques and streamlined shipping coordination to significantly reduce recurring shipping errors, ultimately improving overall operational efficiency. Reduce recurring shipping errors, ultimately improving overall operational efficiency.

06/2017 – 05/2018  
Ahmednagar, India

### **Junior system analyst Ombiz Techno Services**

- Conducted weekly aggregation and examination of data across all telecom sectors, including Prepaid, Postpaid, DTH, and others, utilizing analytics tools to interpret vast datasets and generate actionable insights for strategic decision-making
- Collected and synthesized customer feedback from various platforms to accurately capture the voice of the customer and communicate it to management for continuous improvement and heightened customer satisfaction
- Monitored and reported on key performance indicators for the company's services, tracking transaction volumes, service adoption rates, and billing efficiency within the retailer and distributor network
- Analyzed the effectiveness of different service platforms (Android App, Online, SMS) to optimize operational strategies for broader outreach and enhanced service delivery.

## **SKILLS**

Salesforce  
Tableau  
Power BI  
SQL

Data Visualization  
Microsoft Excel  
Python  
Machine Learning

## **CERTIFICATES**

06/2021

**Salesforce Admin Certification**  
**Salesforce**

07/2021

**Salesforce Advanced Admin Certification**  
**Salesforce**
