

SABARISH KUMAR

Java Full Stack Developer

Mobile: +1 832-431-0753 Email: sabarishka99@gmail.com Location: United States LinkedIn: [LinkedIn/In/Sabarish](https://www.linkedin.com/in/Sabarish)

SUMMARY

Experienced Java Full Stack Developer with 5 years of expertise in designing and implementing scalable web applications. Achieved a 40% improvement in system performance through advanced microservices architecture. Capable in accelerating deployment cycles with optimized CI/CD pipelines. Proficient in Java, Spring Boot, Angular, and cloud platforms like AWS and Azure. Competent in leveraging advanced SQL and containerization technologies to boost application efficiency and streamline processes.

TECHNICAL SKILLS

- **Programming Languages:** Java, J2EE
- **Cloud Platforms:** AWS, Azure, Amazon CloudWatch, Azure Monitor, Azure Insights, Azure Advisor
- **Databases:** Oracle, MySQL, MongoDB, Cassandra, PostgreSQL
- **Frameworks & Libraries:** Spring, Spring Boot, Spring JPA, Spring Batch, Angular, React
- **Web Technologies:** HTML, CSS, SOAP, REST, XML, JSON, JavaScript
- **IDE & Development Tools:** Eclipse, IntelliJ, Visual Studio, STS (Spring Tool Suite)
- **Application Servers:** Apache Tomcat, IBM WebSphere
- **Build & CI/CD Tools:** Maven, Jenkins, Git, Bitbucket, Harness, Bitbucket Pipeline, BMC
- **Containerization & Orchestration:** Docker, Kubernetes, OpenShift
- **Project Management Tools:** Jira, Confluence
- **Operating Systems:** Windows, macOS, Linux

PROFESSIONAL EXPERIENCE

CVS

Java Full Stack Developer

Irving, Texas
July 2023 – Present

- Developed frontend features using Angular and backend functionalities with Java, Spring Boot, and Hibernate, enhancing application efficiency.
- Designed microservices architecture, resulting in a 40% increase in system scalability and modularity, boosting application performance.
- Applied OpenShift for containerization and AWS S3 for file storage, streamlining deployment processes and attaining a decrease in deployment times.
- Worked on integration of CI/CD pipelines using Jenkins and managed branching strategies with Bitbucket, accelerating deployment cycles and ensuring robust code quality.
- Operated advanced SQL techniques, including Stored Procedures, Functions, and Triggers, to enhance database performance and security, reducing query execution time by 20%.

Technologies: Angular, Java 11, Spring Boot, Hibernate, RESTful APIs, OpenShift, Jenkins, AWS S3, SQL, Oracle, JUnit, SLF4J, Apache Kafka, Tomcat, Bitbucket, JIRA

Tech Mahindra

Software Developer

Hyderabad, India
June 2019 – December 2021

- Maintained a strong microservices architecture using Java Spring Boot and Hibernate ORM, enhancing system scalability and reducing downtime.
- Developed and deployed RESTful APIs and responsive user interfaces with Angular, improving user experience and functionality.
- Led the deployment and scaling of microservices on OpenShift through containerization, achieving a 40% increase in application availability.
- Planned high-performance data models with Cassandra, ensuring data integrity and processing efficiency for high-throughput applications, while executing comprehensive testing with JUnit.
- Integrated AWS solutions including EC2, S3, RDS, and EBS, optimizing cloud infrastructure and reducing operational costs by 20%, while adhering to Agile development practices and SCRUM methodologies.

Technologies: Java Spring Boot, Hibernate ORM, Multithreading, RESTful APIs, Angular, OpenShift, Cassandra, JUnit, Mockito, Selenium, Cucumber, Log4j, XML, AWS (EC2, S3, RDS, EBS, Elastic Load Balancer, Auto Scaling, CloudWatch), Agile (SCRUM), JIRA, Confluence

Swagg Technologies Pvt Ltd
Software Engineer Intern

Bangalore, India
July 2018 – May 2019

- Developed dynamic user interfaces by designing and developing responsive, high-performance applications using React, boosting user engagement through improved UX/UI.
- Created strong web applications by crafting and optimizing backend functionalities with Java, Spring, and Hibernate, increasing application efficiency and reducing load times by 25%.
- Implemented seamless APIs by developing and integrating RESTful APIs and SOAP protocols, enhancing data exchange and interoperability across systems, which streamlined communication.
- Leveraged Spring Framework expertise by applying Spring MVC, JDBC Template, and DAO classes to ensure reliable and scalable application architecture, cutting development time by 20%.
- Optimized technology stack by utilizing IntelliJ IDEA and Spring/Maven configurations to create seamless single-page applications integrated with REST services, enhancing development speed and reducing errors,

Technologies: React, Java 8/J2EE, Spring (MVC, JDBC Template), Hibernate, MySQL, SQL Server, RESTful APIs, SOAP, JSP/Servlets, IntelliJ IDEA, Maven, XML/WSDL

PERSONAL PROJECTS

Amazon product categorization

February 2022 – March 2022

- This program was created to use neural networks to classify products into two categories (good/bad) based on user reviews and ratings.
- Languages used: Python.

Insider Attack Protection and Secure Authentication

February 2019 - May 2019

This project has been developed to prevent insider attacks and to provide secure authentication for clients using cryptographic techniques.

- Languages Used: Java.

CERTIFICATIONS

- Completed Full Stack: Angular and Java Spring Boot E-Commerce Website – Udemy.
- Earned Cyber Security Expert Certification – Simplilearn.

EDUCATION

Master of Science
University of Houston

January 2022 – May 2023
