EXPERIENCE

University of Washington Research Assistant	Tacoma, WA Jun 2023-Present
• Performed data analysis on COVID-19's mental health impact using SAS and R, ensuring high data quality. Conducted Interrupted Time Series Analysis, providing robust statistical insights. Co-authored a research paper with the professor.	
VIRGINIA MASON FRANCISCAN HEALTH Business Analyst Consultant	Tacoma, WA Jun 2023-Jun 2024
• Led a cross-functional team in redefining project requirements and scope for reducing supply and implant costs, utilizing root cause analysis and segmentation techniques to identify and mitigate principal cost drivers in the supply chain. • Designed and implemented an EPIC data preprocessing and visualization workflow using Tableau, enhancing data analysis processes to generate actionable insights that significantly improved strategic decision-making across the organization. • Developed and optimized a predictive analytics framework using SQL Server Management Studio (SSMS) and R Studio, focusing on data accuracy and feature selection techniques to significantly enhance the precision of financial forecasts. • Conducted statistical testing and evaluated machine learning algorithms using R and Azure Machine Learning Studio, achieving a 99.4% accuracy rate with a Boosted Tree model. This improved the reliability of cost forecasts and developed a decision-support system that enhanced strategic decision-making in supply chain management. • Leveraged Power Apps for automated, advanced analytics to refine surgical supply cost forecasting, boosting operational efficiency. Created an interactive Power BI dashboard to visualize forecasts, significantly enhancing strategic planning.	
CAPGEMINI Senior Analyst	Pune, India May 2019-Mar 2022
• Optimized HRIS through the full SDLC with Excel, SQL, SharePoint, SFDC, and Google Analytics, reducing key position fill times by 15%. Delivered strategic insights into HR data processes, influencing data-driven HR policies and ensuring SLA. • Integrated SFDC to centralize candidate data and automate workflows, ensuring consistent, up-to-date information across all recruitment stages. Implemented automated notifications and task assignments, reducing manual efforts. • Configured Google Analytics to track candidate interactions, providing insights into user behavior and engagement. Analyzed data to identify drop-off points, optimizing the application process for a streamlined candidate experience. • Led UAT for HRIS and marketing systems, integrating user feedback to optimize functionalities and reliability. Applied Six Sigma methodologies to streamline HR and marketing processes, boosting efficiency by 30% and addressing data anomalies. • Developed and managed candidate lifecycle programs using advanced analytics, increasing engagement by 20%. Conducted workshops to integrate data insights into recruitment strategies. Designed A/B testing campaigns optimizing conversion rates. • Integrated LinkedIn analytics with SFDC to enhance targeted recruitment and optimize demand and supply. Configured SFDC to track candidate sources and engagement, improving targeting and outreach strategies. This integration resulted in a 40% improvement in recruitment efficiency and a 35% increase in candidate interaction through gamified workflows. • Managed cross-functional teams to enhance recruitment marketing, and balance candidate supply aligning with organizational goals. Facilitated workshops integrating data analytics and operational strategies using Jira and Agile tools. Implemented an SEO-driven content marketing strategy, increasing organic search traffic by 30% and candidate applications by 25%. • Developed and executed candidate retention strategies using feedback and behavioral data, boosting retention by 20%. Initiated segmented email marketing campaigns targeting passive candidates, resulting in a 25% increase in reactivation rates.	
CAPGEMINI Analyst Intern	Pune, India May 2018-Jul 2018
• Performed market research and provided pricing analysis to the client using Excel and R, leading to a 10% revenue increase through optimized strategies. I conducted sales analytics with SQL and Power BI, improving sales operations by 15%.
