

Technical Skills

- **Programming Languages:** Python, SQL, NoSQL, R
- **Cloud Technologies:** AWS, Azure
- **Frameworks & Tools:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-Learn, PySpark, Snowflake, Hadoop, Hive, Data Bricks, GitHub, Docker, CI/CD, Statistics, KPI Analysis, Automation, Power Query, Agile, Jira
- **Databases:** MySQL, MS-SQL, Redshift, BigQuery, PostgreSQL, MongoDB, SparkSQL
- **Data Analysis & Visualization:** Power BI, Tableau, MS Excel, Google Analytics, Data Modeling, Data Mapping, Data Mining, Data Extraction & Transformation, Salesforce, Zendesk, Confluence, Postman, SAP ERP

Professional Experience

Data Analyst, IQVIA

06/2024 – Present | Remote, USA

- Developed a high-performance ETL pipeline using Python and SQL, processing 50,000+ patient records daily, accelerating data retrieval by 40%, and enhancing healthcare predictive analysis through seamless data integration.
- Optimized AWS Redshift data storage with automated ingestion and transformation workflows, reducing processing times by 50% and improving system efficiency in managing large-scale patient datasets.
- Implemented advanced data cleaning and preparation using Pandas, improving dataset accuracy by 35%, ensuring reliable patient segmentation, and enhancing predictive healthcare insights.
- Built a Scikit-Learn-based patient segmentation model, categorizing 200,000+ patients into risk groups with 85% accuracy, enabling targeted healthcare interventions and improved patient care strategies.
- Applied time series forecasting for patient admission trends, achieving 92% accuracy, aiding hospital resource planning and optimizing bed management for better operational efficiency.
- Designed Tableau dashboards to visualize healthcare metrics, improving decision-making by 15%, while statistical analysis identified key patient behavior factors, enhancing retention by 20% through data-driven treatment strategies.

Data Analyst Intern, Northwell Health

01/2024 – 04/2024 | New York, USA

- Conducted comprehensive analysis of patient data using tools like SQL and Python to extract actionable insights, driving operational improvements and enhancing patient outcomes through data-driven strategies.
- Developed automated reporting dashboards in Tableau, significantly increasing reporting efficiency and accuracy. Regularly updated visualization materials to reflect evolving business needs and improve stakeholder engagement.
- Utilized advanced statistical techniques and data manipulation methods to analyze patient demographics, diagnoses, treatments, and outcomes, ensuring high data integrity and facilitating informed decision-making.
- Collaborated on performance metrics reporting that achieved a 10% increase in data-driven decision-making. Supported the business control team by assuming 20% of team responsibilities to optimize operational workflows.

Business Analyst, Vodafone Intelligent Solutions

09/2019 – 08/2022 | Ahmedabad, India

- Analyzed customer feedback data from 5,000+ responses using Excel and Power BI, identifying trends that drove product and service enhancements, leading to a 15% increase in customer satisfaction over six months.
- Developed automated Power BI dashboards, improving reporting efficiency by 30% and enhancing business control team processes by 20%, ensuring streamlined documentation and better decision-making.
- Extracted and analyzed key performance metrics from Salesforce CRM using SQL queries, including joins, subqueries, and aggregations, ensuring accurate reporting and data-driven strategic planning.
- Built statistical models with Python, leveraging Pandas and NumPy for forecasting analysis, improving predictive accuracy by 25% and aiding business strategies.
- Identified customer behavior trends through historical data analysis, providing actionable insights that optimized product features and increased retention rates by 10% within one quarter.
- Created detailed reports and presentations for 20+ stakeholders, effectively translating complex data insights into strategic recommendations to foster continuous improvement across teams.

Education

Master of Science, Hofstra University
Business Analytics & Information System

08/2022 – 05/2024 | New York, USA

Bachelors in Management, Gujarat University
Business Management

03/ 2012 – 04/2015 | Gujarat, India

Certificates

- [Tableau A-Z: Hands-On Tableau Training for Data Science](#)
- [The Complete SQL Bootcamp](#)
- [Microsoft Certified: Dynamics 365 Fundamentals \(ERP\)](#)
