Education

University of Houston, Main Campus

August 2023 – May 2025

Master of Science in Computer Science

GPA: 3.6 / 4.0

Coursework: Software Design, Cloud Computing, Visualization, Computer Architecture

GITAM University, Hyderabad

June 2019 – April 2023

Bachelor of Technology in Computer Science and Engineering

GPA: 9.12/10

Coursework: Data Structures and Algorithms, Machine Learning, Artificial Intelligence

Technical Skills

Languages: Python, Java, C

Web Technologies: HTML5, CSS3, JavaScript, ReactJS, Node.js, Next.js, Typescript

Database: SQL, MySQL, Oracle, PostgreSQL, Dynamo DB

Cloud Technologies: AWS

Methodologies: Agile, Scrum

Developer Tools: Visual Studio Code, StarUML, Git

Libraries: Tensorflow, OpenCV, Keras, PyTorch

Certifications: Certified AWS Cloud Practitioner, Machine Learning with Python

Experience

Kognitive LLC

May 2022 – December 2022

Software Developer Intern

Remote

- Revamped a responsive website using **React.js** and **React Native**, implementing responsive design principles with **Hooks**, **Redux**, and **Material-UI**, boosting engagement by 25% and reducing bounce rate by 10%.
- Enhanced performance and interactivity by 15% by integrating **AWS services (Amazon S3, AWS Lambda, DynamoDB, API Gateway, Cognito, Connect)** and building an interactive IVR dashboard with **custom APIs**.
- Engineered a scalable **event management platform** using **API-driven design**, resulting in a 35% surge in community participation in **temple activities**, and improved **user satisfaction** by 10%.

F13 Technologies

June 2022 – August 2022

AWS Cloud Intern

Remote

- Spearheaded AWS application development, boosting functionality by 40% and improving system efficiency.
- Coordinated a four-person team, accelerating project delivery by 30% through effective task management.
- Documented operational processes and proposed enhancements from AWS mini projects, improving performance metrics by 25% within three months.

Projects

ManaInvite Web Application

May 2024 - Present

- Designed and developed **ManaInvite.com**, a no-code, high-performance **consumer software application** using **React.js**, **Next.js**, **TypeScript**, and **Redux** for state management, and **Tailwind CSS**, empowering users to create visually stunning event websites, manage RSVPs, and streamline event planning.
- Achieved a 40% improvement in load times and ensured scalability and high availability by deploying on **AWS** with **Cognito & Amplify** for authentication/hosting, **DynamoDB & S3** for data/media storage, and leveraging **AWS Lambda, API Gateway**, and **RESTful APIs** for microservices.
- Streamlined collaboration and boosted team efficiency by 35% through rigorous **code reviews**, robust **debugging**, and **Agile development methodologies** using **Git** and **Jira**, expanding template offerings by over 50% to expedite user-centered event template creation.

Cloud-based Applicant Tracking System

January 2024 – May 2024

- Piloted the creation of a **cloud-based job portal** with complete CRUD functionality as part of a **three-person team**, enhancing recruitment efficiency by 20% and optimizing workflows through **effective communication and collaboration**. Demonstrated the ability to **work in teams** using **Git** and **AWS services**.
- Streamlined application processes by designing a responsive **React JS**-based interface and optimizing state management with **React Redux** and **Redux hooks**, achieving a 25% reduction in refactoring time.
- Deployed a scalable **Node.js** RESTful API on AWS Elastic Beanstalk, integrating **Amazon S3** and **DynamoDB** to cut data latency by 50% and ensure high availability. Leveraged **AWS Lambda** and **API Gateway** to enhance functionality, handling **JSON** data efficiently via RESTful APIs.

Master Mind Game

October 2024 – November 2024

- Leveraged **Python** to build Mastermind game using **Test Driven Development** with 15+ **unit tests** for reliability.
- Boosted game performance by 30% through optimized logic and real-time feedback with **Agile practices**.
- Implemented an **interactive GUI hint system**, increasing user engagement by 40%.
