

# Sadvik Reddy Mandadapu

## Data Analyst

**Location:** Chicago, USA | **Email:** msadvikreddy@gmail.com | **Phone:** +1 (815) 408-1816 | [LinkedIn](#)

## SUMMARY

- Data Analyst with 3 years of experience in data analytics, cloud computing, and business intelligence.
- Proficient in Python, SQL, and R, with hands-on expertise in ETL pipelines, data engineering, and predictive modelling.
- Experienced in data visualization using Power BI and Tableau, enabling real-time insights for business decision-making.
- Strong background in machine learning techniques, including regression, decision trees, and anomaly detection for advanced analytics.
- Optimized cloud resource utilization at VMware, reducing excess cloud spending through cost forecasting models.
- Developed real-time manufacturing analytics, implementing predictive maintenance to reduce machine downtime by 15%.
- Skilled in cloud platforms, including AWS Redshift, S3, Athena, and Lambda, for scalable data solutions.
- Hands-on experience in data engineering, working with Talend, Informatica, and dbt for seamless data integration.

## SKILLS

- **Programming Languages:** Python, SQL, R
- **Databases & Data Warehouses:** PostgreSQL, SQL Server, MySQL, Snowflake, Teradata, BigQuery
- **Data Visualization:** Power BI, Tableau, Advanced Excel
- **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Plotly, Seaborn, Streamlit, FastAPI, NLTK
- **Data Engineering:** Alteryx, Talend, Informatica, Apache Airflow, dbt
- **Cloud Platforms:** AWS (Redshift, DynamoDB, S3, Athena, Lambda)
- **Methodologies:** SDLC, Agile (Scrum), Waterfall
- **Version Control:** Git, GitHub
- **Machine Learning Techniques:** Regression, KNN, Decision Tree, Naive Bayes, Random Forest, LLM
- **Healthcare Technologies:** HIPAA, EMR, HER
- **Analytical Skills:** Data Mining, Data Cleansing, Statistical Analysis, Data Wrangling, Time Series Analysis, A/B Testing, Text Mining, ETL, Data Warehousing, SAP, SAS

## WORK EXPERIENCE

### PPG Group

July 2024 – Present

#### Data Analyst

- Developed real-time analytics dashboards to monitor and optimize manufacturing operations across multiple production plants.
- Designed SQL-based ETL pipelines to aggregate sensor data from factory equipment, enabling predictive maintenance and reducing machine downtime by 15%.
- Built Power BI dashboards to visualize production performance metrics, reducing downtime and improving efficiency.
- Implemented data-driven anomaly detection using Python to identify bottlenecks and optimize production workflows.
- Collaborated with operations and engineering teams to integrate real-time analytics into manufacturing decision-making.

### VMware

July 2020 – December 2022

#### Data Analyst

- Developed a data-driven model to analyse cloud resource utilization and optimize cost efficiency, reducing excess cloud spend.
- Analysed historical cloud usage patterns using Python, SQL, and AWS Redshift, identifying cost-saving opportunities.
- Built interactive Tableau dashboards to visualize cloud expenditure trends and forecast future resource allocations.
- Designed SQL-based ETL pipelines to integrate multi-cloud billing data from AWS, Azure, and GCP.
- Implemented predictive analytics models to estimate future cloud expenses based on workload patterns.
- Automated anomaly detection using Python scripts, flagging unexpected cost spikes for proactive resolution.
- Collaborated with DevOps and Finance teams to align cloud budgets with business objectives.
- Optimized data retrieval processes, reducing query execution time by 30% for real-time cost analysis.
- Documented analytical insights and presented cost-saving recommendations to senior leadership, leading to informed decision-making.

## PROJECTS

### Energy Consumption Optimization in Manufacturing

- Built Power BI dashboards to track energy usage patterns, identifying areas for cost reduction.
- Implemented time-series forecasting models in Python to predict peak energy consumption and optimize resource allocation.

### Supplier Performance Analytics

- Designed SQL-based ETL pipelines to consolidate vendor performance metrics from multiple data sources.
- Developed Tableau visualizations to track supplier lead times, on-time delivery rates, and quality compliance.

## EDUCATION

- **Master's in Information Systems**  
DePaul University | Chicago, IL
- **Bachelor's Degree in Computer Science**  
GITAM University | Visakhapatnam, India

Jan 2023 – Nov 2024

June 2018 – April 2022

## Certificates

- **Microsoft Certified: Azure Data Engineer Associate** | [LINK](#)
- **Data Visualization: Empowering Business with Effective Insights** | [LINK](#)
- **Carrier Essentials for Data Analysts** | [LINK](#)
- **Python for Data Engineering** | [LINK](#)
