OBJECTIVE

Recent Computer Information Systems graduate with hands-on experience in cloud computing, site reliability engineering, and enterprise architecture through internships and professional roles. Proven ability to design and deliver scalable, enterprise-grade solutions through cross-functional collaboration, agile methodologies, and a strong foundation in IT service operations.

SKILLS

- **Tools:** Amazon Web Services, Eracent, GitHub, Jira, Power BI, ServiceNow & Microsoft Office Suite
- **Programming Languages:** Python, NodeJS, MySQL, HTML, JavaScript, & CSS
- **Industry Certifications:** [AWS Certified Solutions Architect-Associate](#), [AWS Certified Cloud Practitioner](#) and AWS Certified AI Practitioner

EDUCATION

University of Houston: Cullen College of Engineering

B.S. Computer Information Systems

Minor in Finance

Houston, TX

December 2024

- Courses: Information System Analysis, Cloud Computing Architecture & Implementation, Database Management, Advanced Information Systems Development, Enterprise Application Development, & Project Management & Practice

WORK EXPERIENCE

Amazon Web Services (AWS)

Cloud Support Associate (Big Data)

Dallas, TX

February 2025— Present

- Resolved complex technical issues for enterprise customers by applying advanced troubleshooting techniques across Amazon DynamoDB, Lex, and Bedrock, delivering tailored solutions and accelerating resolution through deep root cause analysis
- Partnered with cross-functional leaders, including Solution Architects and Account Managers, to design and deliver enterprise-level solutions, enhancing team alignment and speeding up implementation by aligning architecture with business goals
- Advised Business and Enterprise-level AWS customers via chat, email, and video on cloud architecture best practices, improving customer satisfaction and driving increased adoption of AWS services

Axiom

Site Reliability Engineer Intern (SRE)

Conway, AR

January 2024 — December 2024

- Utilized ServiceNow to pinpoint 15+ servers within their relationships; enabling a thorough understanding of application dependencies, streamlining incident responses & significantly boosting operational efficiency
- Collaborated with cross-functional teams to design & implement a new system architecture & infrastructure, resulting in a 30% increase in system performance & a 20% reduction in operational costs
- Contributed to documentation efforts surrounding the SRE standard, methodologies, runbooks, & technical guides using Jira; fostered a centralized repository to facilitate knowledge transfer of procedures & operational best practices

Invesco

Enterprise Architect (EA) Intern

Houston, TX

June 2023 — August 2023

- Orchestrated as Project Coordinator the rationalization of 30+ products; optimized operational efficiency by eliminating 15% of redundant applications & achieved a 20% cost reduction using analysis in PowerBI & Excel
- Overhauled Software Asset Management (SAM) procedures via a comprehensive strategy of retiring legacy software and tools, which resulted in operational efficiencies, cost reduction & stricter license compliance

PROJECT EXPERIENCE

UH Cloudathon (Placed 2nd)

Lead Cloud Architect

Houston, TX

March 2024

- Led the swift development of 12 AWS services including EC2, S3 & Lambda functionalities, while concurrently designing & implementing a microservices-based architecture achieving significant scalability improvements by integrating auto-scaling groups
- Demonstrated a rigorous commitment to security standards through AES encryption & IAM roles ensuring compliance

CRM Implementation & Database Management Solutions

Project Manager

Houston, TX

August 2022 — May 2023

- Led an 8-member team to deliver a school project database system semester, boosted productivity by 30% & reduced project duration by 20% using agile & scrum methodologies
- Managed an 8-person team to deliver a CRM database project, increasing team productivity by 30% and shortening delivery time by 20% through agile methodologies
