

SAHIL RAORANE

Location: Chicago, IL | **Phone:** (773) 842-8295 | **Email:** Sahilraorane2201@outlook.com | [LinkedIn](#)

SUMMARY

Data Analyst with hands on experience in **data analytics**, **ETL development**, and **predictive modeling** across transportation, logistics, and consulting domains. Proficient in **Python**, **SQL**, and data visualization tools like **Power BI** and **Tableau**. Experienced in building automated **ETL pipelines** using **AWS Glue** and **Azure Data Factory**, and applying **statistical analysis** and **machine learning models** for forecasting and anomaly detection. Skilled in creating **KPI dashboards**, automating reports, and delivering actionable insights through **EDA** and **business intelligence** practices. Strong academic foundation with a **4.0 GPA** and certifications in **Python**, **data visualization**, and **AI analytics**.

EXPERIENCE

Business Analyst | Saayam For All | IL, USA

June 2025 - Current

- Assisting in project coordination, process mapping, and creation of BRDs and FRDs to document system and business requirements.
- Supporting dashboard development and reporting to track project progress and stakeholder KPIs.
- Participating in QA activities including test planning, execution, and issue tracking for system enhancements.
- Contributing to operational efficiency and stakeholder communication in a cloud-native project environment.

Data Analyst Intern (Software) | UBER | IL, USA

October 2024 - December 2024

- Automated **15+ SQL-based ETL pipelines** to monitor trip volume, rider churn, and driver utilization, reducing dashboard latency and manual refresh efforts across analytics dashboards.
- Designed and maintained **20+ KPIs** for tracking fleet efficiency, surge pricing, and rider experience, visualized using **Tableau** and **Power BI** to support compliance and business reviews.
- Built **Python scripts** to detect anomalies in routing and delivery delays, enabling operations teams to identify service disruptions **30% faster** and enhance customer experience.
- Produced monthly analytics reports using **Python**, **EDA**, and **SQL**, delivering actionable insights on wait times, geographic trends, and operational performance.

Data Analyst | Adani | INDIA

October 2022 - June 2023

- Developed and optimized ETL pipelines to process **1.2M+ records** from financial and logistics sources, improving data refresh rates and enabling timely reporting.
- Created **12+ Tableau dashboards** to visualize KPIs, compliance metrics, and operational performance across business units, supporting executive decision-making.
- Built predictive models using **Python (Pandas, scikit-learn)** to forecast resource utilization and streamline budget planning for logistics operations.
- Automated monthly reporting workflows using **Power BI** and **Excel macros**, reducing manual effort by **15+ hours/month** and improving data reliability.
- Performed in-depth **exploratory data analysis (EDA)** to identify process inefficiencies and drive improvements in on-time delivery metrics.
- Conducted statistical analysis using **SciPy** and **NumPy** to evaluate policy adherence trends, contributing to improved audit readiness and data compliance.

Data Analyst Intern | KPMG | INDIA

October 2021 - October 2022

- Analyzed over 100,000 data points using **SQL** and **Python (Pandas, NumPy)** to identify key performance trends and guide data-driven business decisions, resulting in more accurate forecasting models.
 - Designed interactive dashboards in **Power BI** to track operational KPIs, improving team efficiency by streamlining reporting processes and reducing data retrieval time.
 - Built and optimized **ETL pipelines** in **AWS Glue** and **Azure Data Factory**, ensuring efficient data flow between systems and improving data processing time by 30%.
 - Collaborated with cross-functional teams to refine data models and reporting templates, enhancing business intelligence workflows and ensuring alignment with project goals.
 - Conducted exploratory data analysis (EDA) and **statistical analysis** using **Python** and **SciPy** to support actionable insights for senior stakeholders, driving targeted improvements in product features.
 - Utilized **machine learning** techniques, including **supervised learning** and **predictive modeling**, to forecast customer behavior, leading to the creation of a predictive model that improved sales targeting.
 - Automated data validation and reporting processes using **Excel (Macros, Pivot Tables)**, reducing manual work by 10 hours per week and increasing accuracy in client reports.
 - Led the documentation of data dictionaries and process workflows to ensure transparency and effective knowledge transfer within the team.
-

PROJECTS

Portfolio Forecasting Tool – Python, REST API, Excel Modeling

- Collected and processed historical stock data using **Python (Pandas, NumPy)**, applied feature engineering, and trained multiple time series models (**ARIMA, LSTM**) to forecast next-day closing prices with validated accuracy.
- Selected the best-performing model based on test results and interpretability, enabling identification of performance patterns and supporting investment decision-making through predictive insights; visualized results using **Matplotlib** and **Seaborn**, with deployment-ready scripts exposed via **REST API** and **Excel integration**.

Chicago Crime Data Analysis – Python, Power BI, R, ETL

- Built a **city-wide analytics dashboard** with **Python** and **Power BI**, analyzing 100K+ **crime records** to identify hotspots and optimize deployment strategies, reducing **manual reporting effort** by 40%.
- Conducted **geographic** and **temporal pattern analysis** using **R** to support **strategic planning** and **compliance reporting** for law enforcement agencies.

LinkedIn Data Mart Development – SQL, Power BI, Proxycurl API

- Designed and implemented a **data mart** using **SQL** and **Power BI**, enabling streamlined analysis of LinkedIn data for targeted marketing and strategic insights.
- Utilized **Proxycurl API** to extract and process LinkedIn data, enhancing data flow efficiency and improving the accuracy of business intelligence reports.

TECHNICAL SKILLS

- Languages & Tools:** SQL, Python, Pandas, NumPy, Matplotlib, Seaborn, Snowflake, SSMS, Jupyter Notebook, Excel (Pivot Tables, VLOOKUP, Macros)
- Data Analytics & Visualization:** Power BI, Tableau, KPI Dashboards, Exploratory Data Analysis (EDA), Statistical Analysis, A/B Testing, Time-Series Analysis, Data Storytelling, Sentiment Analysis
- Cloud & Data Platforms:** Microsoft Azure, AWS (Amazon S3, Redshift, Glue), Azure SQL Database, Azure Data Factory, ETL Pipelines, Data Warehousing, Terraform, CI/CD
- Data Management & Reporting:** Data Modeling, Report Automation, Data Cleaning, Data Validation, KPI Tracking, Compliance Reporting, FOIA Requests, Performance Metrics
- Business Intelligence & Methodologies:** Data Governance, Agile, Scrum, Waterfall, Strategic Planning, Process Improvement, Service Delivery

EDUCATION

Illinois Institute of Technology | GPA: 4.0 | Chicago, IL

August 2023 - May 2025

MAS. Information Technology and Management Information Systems

University of Mumbai | GPA: 3.87 | Mumbai, India

August 2022 - May 2023

Post-Graduate Diploma in Data Science and Business Analytics

University of Mumbai | GPA: 3.81 | Mumbai, India

July 2019 - April 2022

Bachelor of Science in Computer

CERTIFICATIONS

IBM Python Project for Data Science – Statistical modeling & predictive analytics with Python.

Data Visualization and Dashboards (Excel & Cognos) – Advanced data visualization using Excel & Cognos.

Python for Data Science, AI & Development – Python for AI & ML development.
