SUMMARY

Full Stack Developer with an M.Eng. in Computer Science from Virginia Tech, focused on building robust backend systems using Python, Django, Flask, and FastAPI. Proven ability to design REST APIs, manage SQL-based data pipelines, and deploy scalable cloud applications on AWS. Built analytics dashboards and ETL workflows that informed strategic decisions for a student-led investment fund managing \$1.3M in assets. Complement backend strengths with frontend development in React and service orchestration using Node.js, delivering end-to-end, reliable, and maintainable solutions.

EDUCATION

Virginia Polytechnic Institute and State University (Virginia Tech)

Major: M.Eng. Computer Science

Cumulative GPA: 3.85 / 4.00

Blacksburg, VA

Graduation: May 2025

Majors: B.S. Computer Science | B.A. Economics

Cumulative GPA: 3.61 / 4.00 | Dean's List (Fall 2021 – Fall 2023)

Graduation: Dec 2023

EXPERIENCE

HangoutApp LLC

Full-stack Software Programmer

May 2025 – Sept 2025

- Developed a Flutter mobile app with Firebase Auth + OAuth for secure multi-factor authentication.
- Scaled backend on AWS EC2 with Auto Scaling Groups to support 10,000+ concurrent users.

Commodity Investing by Students (COINS)

Quant Junior Analyst

Sept 2023 – Dec 2024

- Designed Flask-based dashboards and automated ETL pipelines to support a student-managed \$1.3M investment portfolio
- Deployed scalable applications with AWS RDS (MySQL) and EC2, enabling real-time financial data analysis
- Scaled AWS infrastructure by 2.7× to handle increased traffic with health checks and zero-downtime deployment

PermitZip

Software Engineering intern

Dec 2022 – Oct 2023

- Independently reduced automation expenses by 25% by migrating to Python-based AWS Lambda functions.
- Delivered cloud solutions for 3 major projects, architecting systems that provided additional features to remove the need for manual folder ordering all together for the given project.
- Participated in over 7 Agile sprints, demonstrating technical improvement and took recommendations for the upcoming sprints.

RELEVANT WORK

Home Inventory Management

Capstone Project

Jun 2024 – Aug 2024

- Designed and implemented a React Native mobile application compatible with iOS using Expo.
- Integrated OCR technology to handle over 500 automatic receipt scanning and inventory management per hour.
- Managed a scalable Flask backend on AWS EC2 integrated with MySQL databases and pre-trained Large Language Models (LLMs), enhancing predictive analytics and providing intelligent purchasing recommendations.

MERN Stack Coursework

Front-End / UI classes

Jun 2024 – Aug 2024

- Built 8 full-stack web applications using React, TypeScript, and Node.js with an emphasis on RESTful API design, UI prototyping, and responsive design.
- Collaborated in a team setting to deliver performance, mobile-friendly interfaces and integrated backend logic, following best practices in testing and code review.

TECHNICAL SKILLS

- Languages:** Python, JavaScript, TypeScript, C, Java, Dart, HTML, CSS, React Native
- Frameworks & Libraries:** React, Flutter, Flask, FastAPI, Expo, Node.js, Android Studio, OAuth, JWT, Firebase Auth
- Cloud & DevOps:** AWS (Lambda, EC2, S3), Git/GitHub, GitHub Actions, Docker
- Data & ML:** SQL, MySQL, PostgreSQL, Pandas, NumPy, ETL Pipelines, OCR, LLM Integration, NPL, RAG, SpaCy
- Systems:** OpenMP, CUDA, AVX-512, Bash, Linux, RESTful APIs, Microservices

CERTIFICATIONS

IBM Generative AI Engineering Professional Certificate, [LangChain, RAG, Vector Database, Transformers, LLM]

Sept 2025

Meta Back-End Developer Professional Certificate, [Python, Django, REST APIs, MySQL, Git, Linux, Docker, AWS]

July 2025
