

SAHITHI ALASAKANI

Data Analyst | Business Intelligence Analyst | Reporting Specialist

 Sahithialasakani7@gmail.com |  930-267-9822 | [LinkedIn](#)

PROFESSIONAL SUMMARY

Detail-oriented and results-driven Data Analyst with over 3 years of progressive experience in business intelligence, data visualization, and advanced analytics. Skilled in transforming complex, large-scale datasets into actionable business insights through SQL, Python, and BI platforms such as Power BI and Tableau. Demonstrated expertise in building scalable dashboards, performing ad-hoc analysis, and developing analytical models to support data-driven decision-making across healthcare, retail, and financial services. Adept at data storytelling, stakeholder engagement, and cross-functional collaboration, with a proven track record of delivering high-impact solutions in fast-paced Agile environments.

CORE COMPETENCIES

- **Programming & Analytical Tools:** Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), R, and SQL (T-SQL, PL/pgSQL); Excel, Power Query, PivotTables, and VBA scripting.
- **Data Visualization:** Power BI, Tableau, Looker Studio, D3.js, Advanced Excel, KPI Dashboards
- **Database Systems:** PostgreSQL, SQL Server, MySQL, Oracle, MongoDB.
- **Cloud & BI Platforms:** AWS (Redshift, QuickSight, Glue, S3), Azure (Synapse, Data Factory, Databricks), Snowflake, and BigQuery for scalable data pipelines, analytics, and BI reporting.
- **Reporting & Analytics:** Ad-hoc reporting, A/B testing, and exploratory data analysis (EDA). predictive and descriptive analytics to support data-driven decision-making.
- **Soft Skills:** Data storytelling and business acumen, with the ability to convert complex data into insights. Agile/Scrum, cross-functional collaboration, and stakeholder communication.
- **Other Tools & Skills:** Git/GitHub, JIRA, Confluence, DAX (Power BI), UAT Testing, Data Governance, Business Process Optimization for improving efficiency and data reliability.

PROFESSIONAL EXPERIENCE

Data Analyst | Humana Inc. — Louisville, KY (Aug 2024 – Aug 2025)

- Performed advanced EDA on claims and enrollment datasets using SQL and Python (Pandas, NumPy), identifying patterns that improved care management outcomes.
- Partnered with clinical teams to design risk-scoring metrics and utilization forecasting models using regression and time-series analysis for resource planning.
- Engineered SQL triggers, stored procedures, and automated ETL workflows with dimensional modeling and indexing, improving claims validation accuracy by 30%.
- Built a predictive hospital readmission model with Python (Scikit-learn, Feature Engineering, Hyperparameter Tuning), achieving high accuracy (AUC = 0.91).
- Designed Power BI dashboards with DAX measures, KPI indicators, and drill-through features, enabling executives and clinicians to track program performance.

- Delivered real-time analytics in a HIPAA-compliant cloud ecosystem (AWS Redshift, Glue, Azure Databricks, Snowflake) to ensure secure, low-latency reporting.
- Enhanced governance by automating audit checks, CI/CD validation scripts, and metadata-driven pipelines, reducing manual quality review efforts by 25%.

Data Analyst | Cognizant Technology Solutions (CTS) — Chennai, India (April 2023 – Jan 2024)

- Built KPI dashboards in Power BI to track marketing campaign ROI, customer acquisition cost (CAC), and sales conversion metrics, driving targeted retail strategies.
- Developed parameterized and drill-through Power BI reports for real-time retail inventory monitoring at SKU and store levels, improving stock optimization.
- Delivered operational analytics by designing Tableau dashboards and SQL-based data transformations, providing insights into sales, pricing, and promotional effectiveness.
- Engineered Azure Synapse pipelines for high-volume customer transaction data, and implemented DAX models for profitability, cost-performance, and margin analysis.
- Automated stakeholder reporting with Python and SQL for monthly executive summaries, ad-hoc visualizations, and retail KPI scorecards, reducing manual effort by 40% while improving reporting accuracy, timeliness, and decision-making speed.

Associate Data Analyst | Wipro Technologies — Hyderabad, India (Sep 2021 – Feb 2023)

- Maintained technical documentation for ETL pipelines, data models, and reporting tools, ensuring compliance with telecom audits and seamless knowledge transfer.
- Integrated third-party APIs into Python-based reporting workflows to deliver real-time network performance alerts and customer issue escalations.
- Designed and optimized ETL workflows using Talend and SSIS to process telecom call center records and high-volume network log data in near real time.
- Conducted root cause analysis (RCA) and data quality validation using SQL and automated scripts, improving reporting accuracy and incident resolution.
- Migrated legacy dashboards to Power BI with DAX and star-schema modeling, reducing report load times by 50% and enhancing interactivity for business users.

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate – Microsoft (2024)

Google Advanced Data Analytics Certificate – Coursera (2024)

AWS Certified Data Analytics – Specialty – Amazon Web Services (2024)

EDUCATION

Master of Science in Information Technology and Management

Indiana Wesleyan University (USA), 2025
