

SAHITHI BABULGAMA

Java Full Stack Developer

(510) 962-1837

sahithib925@gmail.com

OBJECTIVE

Highly skilled and detail-oriented Java Full Stack Developer with **5+ years** of extensive experience in designing, developing, and maintaining scalable web applications. Proficient in both front-end and back-end technologies, including Java, Spring, Hibernate, JavaScript, Angular/React, and database management.

PROFILE SUMMARY

- Software Application Developer with **5+ years** of strong IT experience in development and implementation of enterprise applications using **JAVA, J2EE**.
- Experience in developing applications using **Java/J2EE (Servlets, JSP custom tags, Struts, Spring, Hibernate, EJB's, Java Beans, JDBC, JMS, JSF), XML, Bamboo, JavaScript, HTML, Hibernate, Eclipse3.x, Tomcat6/7/8.0, WebLogic, Oracle and Unix Korn Shell Scripting**. Well versed with **J2EE Design Patterns** like **DAO, Service Locator, Value Object, Business Delegate Pattern, Front Controller Pattern, Singleton, MVC, Session facade** etc.
- Expertise in developing, Testing, Debugging, Integrating and Deploying Enterprise applications using **Integrated Development Environments (IDE) IntelliJ IDEA, Eclipse and Rational Application Developer (RAD)**.
- Expert level skills on **Angular, Angular, CSS3, HTML5, Node JS, jQuery, JavaScript, React JS, AJAX, JSON, Tag Libraries**.
- Used **Docker** Container to address every application across the hybrid cloud and **Docker** for better collaboration and innovation. Good Knowledge on **Flex 4.0**. Worked on packages like **socket, REST API, Django**.
- Experience working in environments using **Agile (SCRUM)** and **Test-Driven development (TDD)** methodologies.
- Experienced with developing rich user interface applications using **HTML5, CSS3 and JavaScript, JQuery, Angular 4.0,2.0, JS, Node JS, React JS, Backbone JS, Twitter Bootstrap, JQuery Mobile, XML, JSON** that follows **W3C** Web Standards and are browser compatible. Expertise with employment of **Spring Kafka and Zookeeper** apart from **JMS** as messaging service.
- Expertise in Core **Java** Such as **OOPs, Collections, Exceptions Handling, Input/output (I/O) System, Swing, Annotations, Enums, Concurrency, Multi-Threading, Lambda and Generics**.
- Setting up **AWS Oracle** RDS databases for new project, use data pump to migrate data to Relational Database Service (RDS). Good understanding of Redux concepts such as State Store, Action Creator, Reducer and Container.
- Hands-on experience in version control tools like **Git, GitHub, SVN and CVS**.
- Created and triggered automated builds and continuous deployments using **Jenkins/looper and OneOps** cloud.
- Expertise in java 8 features such as **Lambdas, Parallel Streams**, filters & functional interfaces.
- Used Maven to build and deploy the application and used **Jenkins** as Continuous Integration platform (**CI/CD**) to setup the automated builds. Experience with Performance Tuning for **Oracle RDBMS** using Explain Plan and HINTS.
- Strong experience in Spring framework modules such as **Spring MVC, IOC, AOP, JDBC, JTA, IO, Spring Boot, Spring microservices, Spring REST, Spring Eureka, SpringRibbon, Spring Netflix, Spring Zuul, Spring Security**.
- Used testing frameworks like **JUnit, Selenium, HTTP Unit, DB Unit, STIQ, and JMock**. Involved in all phases of Software Development Life Cycle (**SDLC**) in large scale enterprise software using **Object Oriented Analysis and Design**.

EDUCATION

- Masters in Computer Science from California State University, USA

PROFESSIONAL EXPERIENCE

Client: Sutter Health

Role: Java Full Stack Developer

Jul 2023 - Present

San Francisco, California, USA

Description: Sutter Health is a not-for-profit healthcare network based in Sacramento, California, offering a wide range of medical services and known for its comprehensive care facilities. Contributed to the design, development, and deployment of scalable and secure web applications while ensuring efficient data processing and user interface development.

Responsibilities:

- Involved in designing the user interfaces using **Struts Tiles** Framework, **HTML**, and **JSP**. Designed the Front-end screens using **JSF**, **HTML**, **CSS**. Implemented **RESTful** web services which produces both **XML** and **JSON** files to perform tasks, **RESTful** web service using Jersey for **JAX-RS** implementation, which leveraged both web & mobile applications.
- Used **Java** Messaging Services (**JMS**) for reliable and asynchronous exchange of vital information such as payment status report. Setup the Continuous Integration (**CI**) & Continuous Development (**CD**) for the application using **Jenkins**.
- Strong experience on Devops essential tools like **Kubernetes**, **GIT**, **Jenkins**, **Ant**, **Maven** and deployed/managed applications to managed cloud services in **Pivotal Cloud Foundry**.
- Implemented authentication and authorization for the application using **Spring Security** and **Oauth2**.
- Implement **API** Service using **Apache Camel**. Developed **REST APIs** using **Java 8**, **Play** framework and **Akka**.
- Experience in User Experience (**UX**) design and development, User Interactive (**UI**) Web Pages and visually appealing User Interfaces using **JavaScript**, **Vue.js**, **Typescript**, **Node.js** and **React.js**.
- To meet scale and availability requirements, we selected **Apache Cassandra** for **Cassandra's master** less architecture, ability to scale horizontally easily and quickly to meet their growing data store needs. Developed front-end using **XWT**, **JSP**, **JSTL** with Custom Tag libraries, **Struts** Tag libraries, **JSF** Framework, **JavaScript**, **JQuery**, **HTML5** and **CSS3**.
- Responsible for application availability and outage calls during Outage of the application. Involved in building the code using Ant & deploying on web logic server. Work on escalations regarding **AWS** Cognito.
- Implemented **Spark** using **Scala** and **Spark SQL** for faster testing and processing of data.
- Developed the application under **J2EE** Architecture using **Spring**, **Struts**, **Hibernate**, **Servlets**, **Web logic** and **JSP**.
- Used **JavaScript** and **jQuery** for validating the input given to the user interface.
- Extensively Used **Jenkins** as Continuous Integration tool to deploy **Spring Boot Microservices** to **Pivotal Cloud Foundry (PCF)** using build pack Use **log4j** or other logging frameworks for application logging and trouble shooting.
- Developed Service Timeouts for **NoSQL**, **Mongo DB**, **Db2** and **Sybase**. Created **Angular 5** service and integration with **RESTful APIs**. Involved in setting up the application to run on **AWS cloud** environment on multiple **Ec2** instances. Created even driven jobs using **AWS** cloud tools like **S3**, **DynamoDB**, **SNS**, **SQS** and **AWS Lambda** with **Java**.
- Implemented the online application by using **Core Java**, **Multithreading**, **JDBC**, **JSP**, **Servlets**, **WebServices**.
- Developed the **Spring** Features like **Spring MVC**, **Spring Boot**, **Spring Batch**, **Spring Security**, and **Spring Integration**.
- Worked on responsive design and developed a single **ISOMORPHIC** responsive website that could be served to desktop, tablets and mobile users using **React JS**. Used **SDK** such as Eclipse IDE, Toad, and **SVN** etc. in this project.
- Engaged in various phases of Software Development Life Cycle (**SDLC**) of the application like Requirement gathering, Design, Analysis and code development. Implemented **Spring IOC** for inter connection between modules in our application.
- Working on creating batch jobs using **Autosys** as the job scheduler and technologies like **SQL invoker**, **UNIX shell scripting** and **core java**. Used **spring** container for data source and to load the **Hibernate** specific classes.
- Deployed static websites and several supporting **APIs (Node.js)** following a server less architecture in **AWS (API Gateway, AWS Lambda & Lambda @Edge, Cloud Front, Dynamo DB, S3, and more)**.

Environment: Java 1.8, J2EE, JSP, HTML5, CSS3, MongoDB, GraphQL, Scala, Lambda, Drools, CI/CD, PCF jQuery, Ajax, JavaScript, Spring Boot, API, Solr, Spring, Akka, MySQL, Hibernate, Kafka, Struts, REST, SOAP, MVC, Oracle, SVN, JUnit, Typescript, AWS, GitHub, JIRA, SCRUM, Micro service, Docker, Kubernetes, Microservices, Selenium.

Client: Farmers Insurance Group
Role: Java Full Stack Developer

Oct 2022 - Jun 2023
Westlake village, California, USA

Description: Farmers Insurance Group is a major U.S. insurer offering a wide range of insurance products, including auto, home, life, and business coverage, known for its extensive network and customer-focused services. Implemented various web services and microservices, managed deployment activities in Kubernetes and OpenShift, and ensured robust security measures for application integrity.

Responsibilities:

- Used **CXF API** to create **SOAP** based as well as **RESTful** web services. Responsible for Release Management in Production and Pre-Production Environments. Extensive experience in data ingestion technologies like **Kafka**, **flume** and **Sqoop**.
- Write unit tests using **JUnit**, **Mockito** or other testing frameworks to ensure code quality and test coverage. Implemented the security on **microservices** using **Spring Boot** Auth server which generated **JWT** tokens as **OAUTH2** mechanism.
- Worked on **Kubernetes** cluster as a part of deployment activity. Familiar with **Open Shift** commands mainly for deployment.
- Create a new **.NET** console application to extract, transform and load (**ETL**) **JSON** file data into legacy and new **SQL Server** tables. Proficiency in using **JMS (Java Messaging Service) API** for building messaging applications in **Java**.
- Involved in coding, building java applications using **Core java**, **Multithreading**, **JSP** and **Servlet**.
- Involved in Scrum meetings, Sprint/retrospective planning and estimation of the tasks for the user stories and refine the tasks for next **sprint**. Expertise with unit testing & **Test-Driven Development**.
- Implemented high availability with **Azure Classic** and **Azure Resource Manager** deployment models.
- Worked on **JSP**, **Servlets**, **Struts** framework and production support issues of the existing applications.
- Experience in handling messaging services using **Apache Kafka** implemented **Micro services** architecture to make application smaller and independent REST web services using **Jersey** with the enabled **OAUTH**.
- Configured **JMS** server setup, DB connection setup & deployed Returned items in **Web Sphere Server**.
- Implemented a Continuous Delivery pipeline with **Docker**, **Jenkins** and **GitHub** and **AWS AMI's**, whenever a new **GitHub** branch gets started. **Jenkins**, our Continuous Integration server, automatically attempts to build a new **Docker** container from it, The **Docker** container leverages Linux containers and has the **AMI baked in**.
- Developed the service layer, a layer that acts a bridge between the presentation layer and data access layer, with **Spring MVC** framework. Developed **CI/CD** pipeline and build tasks to run the unit tests on **Jenkins** and maintained separate build in Maven for the module for easy integration to the portal build and configure with **Jenkins**.
- Provides intermediate level system analysis, design, development, and implementation of UI and MTs for WEB and Batch based software. Extensively worked on **Spark** using **Scala** on cluster for computational, installed it on top of Hadoop performed advanced analytical application by making use of **spark** with **Hive** and **SQL/Oracle**
- Developed all the UI pages using **HTML5**, **CSS3**, **JSON**, **JavaScript**, **jQuery**, **Angular 8**, **Ajax**.

Environment: Java, J2EE, Angular 11, Spring, Hibernate, JSP, Swagger, microservices, JSTL, HTML, CSS, JavaScript, Tomcat, XML, XSD, Linux, UML, Eclipse IDE, JDBC, PL/SQL. Maven, SVN, JMS, JUNIT, log4J.

Client: (TCS) Citibank

Aug 2021 - Aug 2022

Role: Java Full Stack Developer

Hyderabad, India

Description: Citibank, is the primary U.S. banking subsidiary of financial services multinational Citigroup. I integrated front-end and back-end components to create a cohesive application and setting up pipelines for automated testing and deployment.

Responsibilities:

- Developed automation of Validation service to provide the **JASPER** report based on bean validations, spring validations on test cases. Involved in the understanding the requirements and participated in **SDLC** life cycle.
- Involved in design, Development and implementation of Product Lifecycle admin site based on '**MVC**' architecture and Front control design pattern using **Spring MVC** Framework for Presentation tier and server-side **J2EE** technologies.
- Used various **jQuery** and Bootstrap plug-in like date picker, Bootstrap selectors. Deployed our application on Pivotal Cloud Foundry (**PCF**) which is used to reduce the development overhead by providing a ready to use platform.
- Experience with **python** and **Django** framework. Worked on **Lambda Expressions**, Functional interfaces Stream **API's**, Time **API**, and Improvements on Collection, Concurrency, and **IO** improvements by using **Java 8**.

- Used **Angular** to add functionalities and effects like Accordion, Infinite Scroll bar, slider bas, Drag/Drop, Resizable and progress bar. Implemented **core java** Multithreading, Collections, Exception Handling, and OOP's concepts.
- Good knowledge on **Amazon Web Services (AWS)**, **Amazon Cloud Services like Elastic Compute Cloud (EC2), Simple Storage Service(S3), Amazon Simple DB, Amazon Cloud Watch, SNS, SQS, and LAMBDA.**
- Expertise in developing the multi-tier web applications in both **Spring MVC** and **Struts MVC** that ensures clear separation of layers and rapid application development. Expertise in **React JS** framework to develop the **SPA**.
- Experienced on **Linux** and **Windows Virtual** servers on **EC2** using chef servers. Extensively used **JUnit** and **JMockit** for writing unit test cases. Golden **Gate kafka** adapters are used to write data to **Kafka** clusters. Developed and implemented the **MVC** architectural pattern using **Struts** Framework including **JSP, Servlets** and Action classes.
- Involved in web services design and development. Responsible for creating and consuming web services using **REST** and **XML**. Used **NodeJS, React**, and **Backbone.JS MVC** framework for developing the Single Page Application (**SPA**).
- Implemented request and response objects using **SOAP** web services and created routes using Apache Camel.
- Designed and developed **microservices** with **Spring Boot 2.0** and **Spring REST**. Used **Jenkins** and pipelines to drive all **micro service** authentication builds out to the **Docker** registry and then deployed to **Kubernetes**.
- Used **EC2** for deploying and testing the lower environments such as Dev, INT and Test and also used cloud watch for monitoring. Have also worked on **Java 8** along with **Cold Fusion** and Build **RESTful** web services using **Jax-RS API**.
- Involved in Requirements gathering, Analysis, Design, Development and Testing of application using **Agile** methodology (**SCRUM**) in a test-driven development (**TDD**) approach. Experience in writing and debugging shell scripts.

Environment: Java 1.8, J2EE, JSP, HTML5, Kubernetes, Typescript, Microservices, Akka, CSS3, Selenium, jQuery, Ajax, NodeJS, JavaScript, Kafka, MongoDB, GraphQL, AWS, Spring Boot, Spring, Hibernate, REST, SOAP, MVC, Oracle, SVN, JUnit, JIRA, SCRUM, PCF.

Client: Excitel Broadband

Mar 2019 - Jul 2021

Role: Java Developer

Hyderabad, India

Description: Excitel Broadband is an internet service provider company. Identified and address performance bottlenecks in both front-end and back-end components to ensure optimal responsiveness and scalability of the application.

Responsibilities:

- Developed the application using **Struts** framework. The views are programmed using **JSP** pages with the struts tag library, Model is the combination of **EJB's** and **Java** classes and web implementation controllers are **Servlets**.
- Expertise in **RESTful, SOAP** web services developing for consumption of **API** service in the frontend.
- Create and configured the continuous delivery pipelines for deploying micro services using **Jenkins CI** server.
- Worked on **Jenkins** for continuous integration with **Gradle** and **GitHub**. Migrate existing Monolithic architecture to full-fledged **Microservices** architecture using **Spring Boot & Spring Cloud** in multiple stages.
- Supported microservice authentication service provider using **Java Cryptology Extensions' Cipher** class **API**.
- Implemented **Reacts Axioms Http** Request to read data from web server and process **JSON** data to render in **UI**.
- Front end development utilizing **HTML5, CSS3, and JavaScript** leveraging the Bootstrap framework and a **Java** backend.
- Manage and fix bugs with **JIRA** bug tracking application. Involved in designing, capacity planning and implementing multi-rack **Cassandra cluster**. Developed **JASPER** report to show the result after validations are performed on the test cases and maintaining several data accuracy. Implemented asynchronous messaging services using **JMS**.
- Used **JMS** for the asynchronous exchange of critical business data and events among **J2EE** components and legacy system.

Environment: Java 8, HTML5, CSS3, J2EE, Hibernate, Spring framework MVC, JavaScript, Agile methodology, Angular 11, NodeJS, Oracle, Medidata, Python, MongoDB, MVC, AWS, GCP, JPA, Jira, Kafka, Kubernetes, Jenkins, JUnit, Maven, Log4J, Apache Tomcat, Wire transfer, Microservices, AWS.

TECHNICAL SKILLS

Cloud Platforms	Amazon Web Services EC2, S3 etc., OpenShift
Languages	Java, YML, XSL, XSLT, C, C++, Python
J2EE Technologies	JSR-286 Portlets, JDBC, JPA Servlets, JSP, JMS, JUnit, RMI, Apache Axis2, REST, Kafka.

Frameworks	Angular, Node.js, JSF, Struts, Spring, Spring Boot, Spring Cloud, MVC architecture, EJB, IBM HATS, Hibernate, JPA.
IDEs/tools	Eclipse, IntelliJ Suite, My Eclipse, Net-Beans, JBoss, WSAD/RAD, IBM Rational Software Architect (RSA).
Design Modelling	OOA/OOD, AOP, UML
Web Tools	Typescript, AJAX, DOJO, CSS, JavaScript, Flex, XML, HTML, XHTML, SOAP, WSDL.
Version Control	Git, Gitlab, Harvest, SVN, CVS, Clear Case.
Database	IBM DB2, Cassandra, Oracle12g, Postgres, MS SQL Server, MySQL
Documentation Tools	MS Office, Visio, MS SharePoint, Confluence
Cloud	AWS, Azure
Web/Application Servers	Docker, IBM Web Sphere, Web Logic, Apache Tomcat.
Methodologies	Agile, SCRUM, TDD, Waterfall
Operating Systems	Windows, Mac, Unix, Linux
Others	ANT, Maven, Gradle, Rational Software, Open Make, UMLet, Log4J
