- **Data Visualization:** Power BI, Tableau, Google Data Studio, Jira
- **Data Warehousing & ETL:** AWS (S3, Redshift), Snowflake, SPSS, BigQuery, MySQL, PostgreSQL
- **Soft Skills:** Problem Solving, Stakeholder Communication

EXPERIENCE

Xylo Consulting LLC

May 2024 - May 2025

Data Engineer

New Jersey, USA

- Designed interactive Power BI dashboards for revenue, expense, and profit tracking, enabling faster executive decisions and improving reporting efficiency by 40%.
- Automated data pipelines using SQL and Power BI to refresh daily financial reports, reducing manual effort by 50% and increasing data accuracy by 35%.
- Created budget vs actual dashboards to track departmental spend, assisting finance teams in identifying cost overruns and reducing overspending by 20%.
- Integrated data from ERP, Salesforce, and Excel into a unified reporting system, streamlining financial consolidation and cutting manual work by 60%.

Annalect

Mar 2022 - Sep 2022

Data Analyst

Hyderabad, India

- Constructed and maintained Power BI reports to monitor performance KPIs across marketing and sales, driving rapid decision-making.
- Engineered automated ETL workflows in Python and BigQuery to extract, manipulate, and analyze data, reducing manual reporting by 80% and enabling near real-time updates.
- Developed and sustained detailed financial models and forecasting tools in Excel using advanced formulas, pivot tables, and scenario analysis to support strategic planning and client-ready insights.
- Collaborated with stakeholders to define reporting requirements and deliver scalable, insight-rich visualizations, ensuring clarity and effective technical communication.

Transol Systems

Sep 2020 - Feb 2022

Data Engineer

Bengaluru, India

- Developed ETL pipelines to process and aggregate financial and operational data, aligning with reporting standards.
- Automated data reconciliation processes using Python and Excel VBA, improving reporting accuracy and reducing time-to-insight.
- Queried large datasets using SQL across BigQuery, Snowflake, and Oracle to support ad hoc analysis and regular reporting.
- Implemented data validation checks to uphold data quality and consistency across business units.

EDUCATION

Florida Atlantic University

Aug 2022 - Dec 2023

Master of Engineering, Data Science & Analytics

CERTIFICATIONS

- Certified in AWS Data Engineer Associate (DEA – C01)
- Certified in Python Programming Language.
