SUMMARY

Experienced Senior Full Stack Java Engineer with 6 years of expertise in developing scalable web applications across finance and insurance sectors. Designed and deployed microservices-based architectures using Java 8, Spring Boot, and RESTful APIs to streamline backend operations. Improved CI/CD workflows with Jenkins and Docker, reducing deployment time by 40%. Constructed responsive, secure front-end interfaces using React.js, Angular, and Bootstrap to elevate user experience. Integrated PostgreSQL, Kafka, and AWS for efficient data management and cloud deployment. Developed Spark and PySpark data pipelines for optimized real-time analytics. Led teams in Agile environments to deliver production-ready solutions. Excellent interpersonal, communication skills, problem solving, collaborative, human relations, and presentation skills. I performed UI optimization with AngularJS and Bootstrap to enhance the user experience with accessibility and database performance.

TECHNICAL SKILLS

- **Programming Languages:** Java 8, Java 11, Java 17, JavaScript, TypeScript, Python, Golang, Bash, C#, .NET, C++, AI, Go,
- **Databases:** MySQL, Oracle, MongoDB, DynamoDB, PostgreSQL, Redis Cache
- **Java Technologies:** Spring Boot, J2EE, Spring, Spring MVC, Servlets, JSP, JDBC, JNDI, JMS, Design Patterns, Spring Cloud, Spring Security, Spring Data JPA
- **Web Technologies:** HTML5, CSS3, AJAX, Angular 12, React, React JS, Kendo UI, Vue.js, jQuery, Node JS, REST, SOAP, Vite, Jest, Playwright, Cypress, Cucumber, Webpack, Ruby, Express, PHP
- **DevOps & CI/CD Tools:** Docker, Maven, Jenkins, Bitbucket, Jira, Ansible
- **Cloud Platforms & Messaging Services:** AWS, Azure Cloud, AWS CloudFormation, Apache Kafka, GCP, Zookeeper
- **Monitoring Tools:** Splunk, Honeycomb, Datadog, Prometheus, Grafana, Jira, Confluence
- **Operating Systems:** Windows, Linux /Unix-based systems

PROFESSIONAL EXPERIENCE

Vanguard

Senior Full Stack Software Engineer

Malvern, PA, USA

May 2024 – Present

Technologies: Core Java, J2EE, JavaScript, Agile Methodology, HTML5, CSS3, Bootstrap, React JS, React native, Node JS, EC2, S3, JDBC, Microservices, Hibernate, Spring Batch, Spring MVC, Spring Framework, Angular 12, Kendo UI, Spring Boot, RESTful API, JSON, Kubernetes, Information Technology. Spark, Terraform, RabbitMQ, ActiveMQ, CouchDB, Tomcat, Waterfall, SASS, ES6, SCRUM, Docker, Ribbon, Scala, Kafka, Kotlin, SQL, Oracle, SDLC, JIRA, MAVEN, Angular 8, Postman, JUnit, UNIX, ux/ui, Log4J, OAuth 2.0, JWT, GIT Version control, GitHub, Gitlab CI, GitHub Actions, Jenkins

- As a Senior full stack constructed scalable web-based end-to-end distributed systems applications using Java, Spring web services, and PostgreSQL, performance optimization, memory management, and enhancing user experience with TDD test-driven development and functional programming approach by following strict coding standards.
- Implemented key features with Java 1.8, utilizing annotations, Generics, and multithreading, which decreased code complexity and improved maintainability by 30%.
- Led issue resolution across many environments (QA to Production), ensuring uptime and rapid response to production issues, and problem-solving skills.
- Responsible for developing a responsive web UI for the e-commerce digital transformation website for mobile, tablet, and desktop versions based on ReactJS, Next.js.

- Collaborated with stakeholders and business analysts to transform requirements into high-performance designs, delivering features 20% faster.
- Optimized CI/CD workflows with Jenkins, reducing deployment times, and enhanced automated testing processes to ensure higher code quality.
- Established disaster recovery solutions for PostgreSQL databases, minimizing recovery times by 50% and ensuring data integrity during unexpected outages.
- Solid understanding of software architecture, design patterns, system design, artificial intelligence, machine learning, and best practices, with a track record of successfully implementing scalable and efficient solutions.
- Developed interactive, responsive web applications using React.js, leveraging hooks, state management, and component lifecycle methods to create efficient, maintainable codebases.
- Led the integration of microservices with AWS serverless Lambda, SQS, and DynamoDB, boosting application scalability and reliability by enabling real-time data processing and cutting latency by 40%.
- Strong knowledge of working with GraphQL schema, queries, and mutations to interact with MongoDB and several other data layers.
- Created Angular Components, Directives, Services, and Reactive Forms to collect the input from the User. Implemented Services by using HttpClientModule in Angular 12 for making the API calls and injecting data into the required components.
- Used Dependency Injection to communicate between Components. Developed application-level code to interact with the backend and consume the JSON API's by using RXJS Observables.
- Worked on multiple AI and Machine Learning programs within our product suites; Programs include - Predictive Analytics service - baselining and forecasting of performance and security KPIs, Security Analytics - Anomaly detection service - clustering of devices based on behaviour over time - NLP, LSTM, KubeFlow, Docker, AWS Sagemaker, AWS Greengrass.
- Managed Data Storage and processing pipelines in GCP for serving AI and ML services in Production, development, and testing using SQL, Spark, Python, and AI VM.
- Engineered the implementation of Kubernetes on OpenShift to streamline containerization orchestration, optimizing deployment efficiency and reducing infrastructure overhead by 30%.
- Security assessment of online applications to identify vulnerabilities in different categories, such as Input and data Validation, integration, Authentication, Authorization, Encryption, Auditing, and logging.
- Performed in-depth security assessments of web applications, consulting, identifying and addressing vulnerabilities, leading to a 25% reduction in potential security risks and ensuring compliance with industry standards.

Tata Consultancy Services

Hyderabad, India

Full Stack Java Engineer

March 2022 – July 2023 Technologies: Java, J2EE, Spring Boot, Microservices, RESTful APIs, Kafka, Azure, PySpark, Scala, React.js, AngularJS, Kendo UI, Bootstrap, Spark, Multithreading, SQL, NoSQL, Vite, R&D, Jest

- Led the design and development of scalable applications using Java 1.8, J2EE, Spring Boot, and Microservices architecture, improving application efficiency.
- Implemented RESTful APIs with Spring MVC to expose microservices, ensuring seamless integration between front-end and back-end services, leading to 25% faster user response times.
- Enhanced data processing capabilities by utilizing Spark, PySpark, Kafka, and Scala to build strong data pipelines, improving processing speed and reliability.
- Implemented and involved in system architecture with detailed solution design for robust business applications to help us sell our products, interact with our customers, and communicate electronically with our agents.
- Optimized user interface design with AngularJS, React.js, and Bootstrap, improving page load speed by 40% and enhancing overall user experience.
- Hands-on Experience with Angular CLI (Command Line Interface). Much work was done on template-driven, Reactive forms in Angular and their Validations. Expertise in using Angular directives, Controllers, Filters, Services, Templates, Events, and Injectors.
- Experienced in object-oriented analysis, design, and application development using JAVA, J2EE, XML, JSON, NoSQL technologies, and multithreading.
- Worked with RedHat OpenShift Container Platform for Docker and Kubernetes, used Kubernetes to manage containerized applications using its nodes, ConfigMaps, node-selector, Services, and deployed application containers as Pods.
- Created database design, data modelling schema, and a number of database objects like tables, views, stored procedures, and user-defined functions using SQL Server Management Studio.

- Deployed microservices-based applications on Azure and executed Kafka Streams and PySpark jobs on Azure Databricks, boosting system reliability and scalability.
- Automated system monitoring and troubleshooting processes, improving issue resolution time by 35% and ensuring smooth transitions from QA to Production environments.
- Applied advanced Java 8 features like Lambda expressions, Streams, and Multithreading to enhance code efficiency, leading to a reduction in resource consumption across applications.
- Implemented scalable, modular front-end applications using Angular, utilizing services, directives, and dependency injection for enhanced reusability, sales, software innovation, and maintainability.
- Collaborated with cross-functional teams to implement CI/CD pipelines using Jenkins and Azure DevOps, reducing deployment times by 30% and ensuring faster feature releases.
- Led code reviews and mentored junior developers, improving team productivity and ensuring adherence to best practices in software development and security.
- In-depth understanding of Data Structures and Algorithms.
- Integrated third-party payment gateways and external APIs, enhancing the platform's capabilities and enabling seamless transactions and real-time data processing.

Fiserv

Hyderabad, India

Junior Developer

May 2019 – March 2022

Technologies: Struts, Spring, HTML, JSP, CSS, JavaScript, Struts Tiles Framework, Struts Validation Framework, J2EE, MVC, AJAX, JSF, jQuery, ORM, OOP, AngularJS, ReactJS, NodeJs, Java, Java Unit Testing, Automation Testing, CRM, Billing Systems, Network Management

- Engineered interactive web pages using Struts Tiles framework with HTML, JSP, CSS, and JavaScript, enhancing UI responsiveness and functionality.
- Executed client-side and server-side validation using the Struts Validation Framework, reducing form submission errors by 30% and improving innovative data accuracy.
- Collaborated with clients to gather and refine project requirements, accounting, and ensuring alignment with business objectives, and accelerating project delivery by 20%.
- Constructed and developed JSP pages within Struts and Spring frameworks, optimizing MVC architecture and improving application scalability documentation.
- Developed the application using model model-driven approach by creating different Modules, Components, and using reusable code. Created Angular 12 components, implemented Interpolation, Input Variables, Bootstrapping, NgFor, NgIf, Router Outlet, event binding, and decorators. Created reusable Custom pipes and Directives for filtering and sorting for table columns for the Custom Table component, which is used for CRUD Operations.
- Incorporated telecom-specific framework, applications like billing, CRM, and attention to detail, network management systems, increasing system efficiency and reliability by 25%.
- Established interactive user interfaces using AJAX, JSF, jQuery, ReactJS, React/Node, and AngularJS, cutting page load time and enhancing user engagement.
- Integrated and optimized backend services using Java and Spring frameworks, improving data processing speed by 15% and enhancing system performance.
- Implemented automated unit and integration testing with JUnit and TestNG, ensuring higher code quality and reducing debugging time.
- Re-engineered the reporting architecture of the product with data visualization; drove digitization and self-service to drive actionable intelligence and increase decision-making TAT by 70%.
- I have developed and maintained technical documentation and diagrams for code and APIs, enabling seamless collaboration within my team for business logics.
- Collaborated with cross-functional teams to integrate third-party APIs and services, improving overall system functionality and expanding service offerings for clients.
- Development and presentation of the results and working of our model in the form of detailed reports and dashboards to executives before production.

EDUCATION

Master of Science in Computer and Information Systems
[Southern Arkansas University, Magnolia, Arkansas](#)

August 2023 – May 2025

Bachelor of Technology in Computer Science and Engineering
[Ace College of Engineering and Technology, Hyderabad, India](#)

August 2016 – May 2020

CERTIFICATIONS

- Completed Java Development Course – Udemy.
- Attained Java Development certification – Udemy.
- **Earned** [AWS Developer Associate Certification](#).
- Achieved Microsoft Azure Fundamentals Certification.

ACHIEVEMENTS

- Awarded as Best Performer for best contribution in the project at TCS as a developer.
