

SAHITHI SANE

East Lansing, MI | (517) 202-6270 | sanesahithi2@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Motivated and results-oriented Data Scientist with 3 years of experience in machine learning, generative AI, and scalable model deployment. Adept at building end-to-end ML pipelines, leveraging LLMs for automation and statistics, transforming data into business-driven insights, and seeking to contribute to innovative, data-driven teams in a fast-paced environment.

EDUCATION

- **M.S. in Data Science**
Michigan State University
May 2025
- **B.Tech in Information Technology**
Jawaharlal Nehru Technology University
July 2022

TECHNICAL SKILLS

- **Programming & ML Tools:** Python (Pandas, NumPy, Scikit-learn, PySpark, SpaCy, NLTK, PyTorch), SQL, R, Shell Scripting
- **Machine Learning:** Statistical Modeling, XGBoost, Random Forest, Logistic Regression, KNN, Time Series Forecasting, A/B Testing, ANOVA, Feature Engineering, Model Evaluation
- **GenAI & LLMs:** RAG, Prompt Engineering, LLMops, OpenAI, Hugging Face Transformers, LangChain, Pinecone
- **MLOps & Deployment:** Flask, Docker, AWS EC2, MLflow, Airflow, CI/CD, Prometheus, Grafana, GIT, n8n
- **Visualization & Big Data:** Power BI, Tableau, Matplotlib, Seaborn, AWS (S3, Glue), StreamSets, Kafka

EXPERIENCE

Data Science Consultant

Mott Foundation – Michigan, USA

May 2024 – Present

- Built **regression models** on **13K+ records** by integrating financial, geospatial, and water quality data using **Python, SQL, web scraping, and PDF parsing**, driving insights that influenced a **\$2M grant reallocation**.
- **Automated** data extraction from 350+ public reports using Python and SQL, **reducing manual effort by 90%** using Python.
- Conducted statistical analysis to find demographic and investment patterns driving state policy decisions.
- Collaborated with grant analysts to identify key risk indicators & improve long-term economic resource planning strategies.

Data Scientist Intern

SKOOP Signage – Michigan, USA

May 2024 – Dec 2024

- Developed a CGI-based LLM chatbot using **RAG-Fusion, LangChain, and Pinecone** to enhance **retrieval accuracy by 22%**.
- Developed **LLMops pipelines** with **n8n** by integrating **OpenAI APIs, Hugging Face** models, and **knowledge graphs** for dynamic context-aware responses.
- **Boosted** grocery sales by **38%** via live dashboard providing actionable insights for business strategy and customer support
- Streamlined **prompt engineering** and workflow, **reducing latency by 40%** and improving chatbot real-time performance.

Software Engineer I (Data Science)

Dell Technologies– Bangalore, India

Mar 2022 – Aug 2023

- Led a team to build **ensemble time-series models** on **470M+ procurement records**, optimizing supplier selection and allocation, **cutting costs by 17%**, and enabling **multi-million-dollar savings** across 10K+ negotiations.
- Engineered **ETL pipelines** using Streamsets, and Kafka, enabling real-time analytics and reducing data processing time by **30%**.
- Automated summarizing statistical reports using **Power BI and Power Automate**, boosting sprint productivity by **25%**.
- Built an **anomaly detection** system for error handling in inventory logs, **cutting 80+ hours** of manual work weekly.

PROJECTS

Telehealth Data Analysis – Henry Ford Health (Capstone Data Science Consultant)

- Conducted **logistic regression, ANOVA, and p-testing** on visit types to quantify compliance and performance variations.
- Applied **PCA and K-Means clustering** to identify groups **49% more likely** to benefit from video visits over the phone.

Generative QA using RAG & LLMs

- Developed a fine-tuned RAG-based QA system using **T5, LLaMA 2, and Mistral 7B** on SQuAD v2, improving exact match by 37% and optimizing dense retriever recall via **cross-encoders and query expansion**.

Walmart Sales Forecasting

- Built **time-series MLOps pipeline**, deployed via **Flask & Docker on AWS EC2**; monitored with **Grafana & Prometheus**.
