

SAHITHI DASARI

📞 203-243-0727 - 📍 New Britain, CT, United States - ✉️ dasaris22@mail.sacredheart.edu - LinkedIn

Doctor of Pharmacy and MS in Healthcare Informatics graduate with expertise in EHR analysis, clinical trials, and healthcare analytics. Skilled in regulatory compliance, data visualization, and digital health, enhancing patient safety, care quality, and collaborative, data-driven decision-making across healthcare settings.

PROFESSIONAL EXPERIENCE

CLINISOL - Hyderabad, India

May 2023- Nov 2023

Clinical Research Associate

Systems/Tools: EDC, CRFs, EHR, ICH-GCP, CDSCO, TMF

Reviewed 500+ EHR-linked CRFs across 3 Phase II vaccine trials, achieving 100% regulatory adherence with ICH-GCP and CDSCO standards. Streamlined query resolution by 40% through prompt source data verification and direct updates in electronic data capture (EDC) systems. Maintained TMF in compliance with audit standards, ensuring 98% readiness for inspections and regulatory reviews. Collaborated with site teams to document AE/SAE reports in EHR systems, improving response timelines by 25%.

GUARDIAN MULTISPECIALITY HOSPITAL - India

Clinical Informatics Assistant- Emergency & Cardiologist, Pediatrics.

Dec 2021 - Apr 2023

Systems/Tools: EMR, Triage Dashboards, Clinical Workflow Tools

Supported emergency and cardiac services for 2,000+ patients, entering and managing real-time clinical data in EMR with 95% accuracy. Helped reduce triage response time by 20% by integrating patient assessment data directly into EMR dashboards. Educated 15+ junior staff on EMR navigation and charting, increasing EMR usage compliance by 35%. Flagged critical trends using EMR-based adverse event tracking, leading to early intervention in 10% of high-risk cases.

Kakatiya Medical College & Hospital - India

Clinical Informatics Intern

Mar 2022 - Feb 2023

Systems/Tools: Hospital EHR System, Clinical Dashboards, Excel

Reviewed EHR data for 2,500+ patient records, identifying gaps in maternal health outcomes and improving reporting quality by 40%. Conducted literature reviews for 12 clinical studies, producing 6 analytical reports on hypertension and maternal care metrics. Supported 3 community health campaigns, increasing local screening rates for chronic disease by 60%.

CERTIFICATIONS & TECHNICAL SKILLS

Clinical Research: Clinical Trial Monitoring (Phase II), CRF Review, Source Data Verification (SDV), Adverse Event (AE/SAE) Reporting, Protocol Adherence (ICH-GCP, CDSCO), Trial Master File (TMF).

Healthcare & Clinical Practice: Emergency & OB/GYN Triage, Patient Education, EMR Documentation, Infection Control Audits, Procedural Support, Post-care Protocol Guidance.

Health Informatics: EHR Data Analysis, Outcome Tracking, Health IT Safety, Clinical Workflow Optimization, Digital Health Tools, Clinical Literature Review.

Computer Skills: Microsoft Excel, Word, Power BI, Tableau, SQL.

Healthcare Technologies: EMR Systems, Redcap, Health Information Systems.

Certifications: Microsoft Power BI, Good Clinical Practice (GCP), Machine Learning Algorithms in Healthcare, Data Science AI for Healthcare.

EDUCATION

Master of Science in Healthcare Informatics

Graduated: March 2025.

Sacred Heart University - Fairfield, CT

GPA: 3.8/4

Applied clinical data tools for improving EHR workflows and data quality in healthcare settings.

Doctor of Pharmacy (Pharm.D.)

Graduated: August 2022.

Ratnam Institute of Pharmacy - India

GPA: 8.28 / 10

Developed strong skills in clinical pharmacology, pharmacovigilance, and patient-centered care.

Completed clinical training in hospital settings with a focus on medication safety and ADR monitoring.

RESEARCH PROJECTS

Health Informatics Dashboard: Analyzing Leading Causes of Death in the USA:

Developed an interactive Tableau dashboard using CDC data to analyze leading causes of death across U.S. states, improving data visibility by 60%. Incorporated filters by age, region, and cause, helping identify mortality trends and regional disparities with 40% more analytical efficiency. Supported public health planning by enabling 30% faster access to key mortality insights for data-driven policy decisions.

Enhancing Medication Process and Improving Patient Safety Through AI Integration, USA Natality Rate Analysis:

Built predictive models using 12,000+ EHR and public health records, enhancing early epidemic detection accuracy by 45%. Applied geospatial mapping and NLP techniques to track outbreak signals in real time, improving surveillance response time by 40%. Contributed to a scalable analytics framework adopted by public health teams, increasing preparedness for future

Prospective study on Pneumonia Infants and Neonates by using Press Score:

I conducted a prospective study analyzing EHR data of neonatal and infant pneumonia cases. Applied the PRESS scoring system to assess disease severity, optimize early diagnosis, and enhance clinical decision-making. Utilized tools like redcap for secure data collection, Microsoft Excel for data cleaning and visualization, and SPSS for statistical analysis, ensuring evidence-based recommendations for improved pediatric care outcomes.

Comprehensive healthcare delivery for the Urban and Rural Areas:

Designed and managed a healthcare delivery model using Mind Mapping, JIRA, Asana, and Monday.com, improving rural care access by 50% workflows and resource allocation, leveraging task management platforms to reduce provider bottlenecks and cut patient wait times 25%. Coordinated across stakeholders using agile methodologies and risk planning tools, ensuring seamless integration of mobile units and telehealth services.
