

SAHITHI CHANDIRI

DATA ENGINEER

USA | +1-(408)-538-4871 | sahithireddychandiri@gmail.com | [Linkedin](#)

SUMMARY

Results-driven Data Engineer with around 4 years of experience building scalable and reliable data solutions across eCommerce, Healthcare, and Banking/Finance domains. Expertise in designing data pipelines, integrating structured and unstructured data, and managing distributed systems using Hadoop, Spark, and Kafka and skilled in cloud platform.

SKILLS

- **Programming Languages:** Python, SQL, Scala
- **Big Data & ETL:** Apache Hadoop, MapReduce, Hive, Pig, Spark, Kafka, Sqoop, NiFi, Talend, Apache Airflow, SSIS
- **Databases & Warehouses:** MySQL, SQL Server, PostgreSQL, Oracle, Snowflake
- **Cloud Platforms:** AWS, Azure, GCP, Databricks
- **Reporting & BI Tools:** Tableau, Power BI, SSRS
- **Version Control:** Git, GitHub, GitLab

EXPERIENCE

Cardinal Health, USA | Sr. Data Engineer

Dec 2024 – Present

- Engineered scalable ETL pipelines to process patient, claims, and clinical datasets, reducing processing time by 30% and improving data accessibility for care coordination and analytics.
- Developed data processing frameworks in Azure Synapse notebooks leveraging PySpark to clean, transform, and normalize semi-structured HL7/JSON healthcare data, storing curated outputs in Parquet format on ADLS Gen2.
- Implemented end-to-end ETL pipelines with Azure Data Factory to ingest data from Epic EHR systems, claims repositories, and patient registries into the enterprise data warehouse.
- Built self-service BI dashboards in Power BI to monitor clinical KPIs, hospital occupancy, patient outcomes, and claims performance, enabling faster and informed decision-making by stakeholders.
- Migrated large-scale healthcare datasets from on-premise SQL Server into ADLS Gen2, leveraging Azure Databricks for distributed processing and enabling advanced analytics on clinical and claims data.
- Implemented data quality frameworks and governance controls using Great Expectations framework and Azure Purview, ensuring compliance with HIPAA and GDPR while improving overall data reliability and security.

Wells Fargo, USA | Data Engineer

Jun 2024 – Dec 2024

- Designed and optimized Spark-based ETL pipelines to process high-volume transactional, payment, and credit datasets, reducing data processing time by 30% and improving reporting efficiency by 15%.
- Optimized Hive schema design and query performance by applying partitioning and indexing strategies, improving financial KPI dashboards by 45%.
- Automated critical ETL workflows using Apache Airflow, achieving 99% SLA adherence and ensuring seamless reconciliation of multi-terabyte banking datasets.
- Built scalable data normalization and consolidation pipelines with AWS Glue, improving data quality by 50% and boosting credit scoring model accuracy by 15%.
- Engineered and deployed a Kafka-based streaming framework for real-time payment ingestion, ensuring low-latency data availability for downstream fraud analytics and AML monitoring.
- Designed a Delta Lake-based lakehouse architecture on AWS S3, achieving ACID-compliant storage to support SOX and PCI DSS audit-ready reporting.

Nefroverse Technologies, India | Data Engineer

Jun 2021 – Aug 2023

- Built and deployed real-time Kafka pipelines to process orders, inventory, and customer events, improving data quality by 30% and enabling faster analytics for merchandising and sales.
- Optimized batch processing on AWS EMR with Spark, reducing pipeline execution time by 30% and enhancing accuracy of demand forecasting and inventory planning.
- Developed CI/CD pipelines with Jenkins and Docker, standardizing data releases and reducing deployment errors.
- Established data governance and monitoring frameworks with CloudWatch and Glue Data Catalog, improving lineage tracking and operational visibility across eCommerce datasets.

EDUCATION

Master Of Science, Data Analytics

San Jose State University, USA

Bachelor of Technology, Computer Science and Engineering

Keshav Memorial Institute of Technology, India
