EDUCATION

San Jose State University - San Jose, CA

May 2024

Bachelor's in Software Engineering | [AWS Cloud Badge](#), [Google Gen AI Certificate](#), [Cognizant Prompt Engineering](#), [IBM Cloud](#)

Relevant Coursework: **Data Structures and Algorithms, Object Oriented Design, Artificial Intelligence, Operating Systems, Database Management Systems, Machine Learning for Big Data, Computer Networking, Human-Computer Interaction**

Skills: **Java, Python, JavaScript, C++, C, HTML, CSS, HTTP, SQL, MySQL, PostgreSQL, MongoDB, AWS, GCP, PHP, VIM, TypeScript, React, REST API, Docker, Linux/Unix, Git, PyTorch, CI/CD, Jest, Node.js, Flask, Postman, SQLAlchemy, TCP/IP**

EXPERIENCE

Software Engineering Intern/Fellow, Headstarter

July - September 2024

- Developed **5** AI-based websites with reusable **React components, Next.js, Shadcn, JavaScript, SQL, RAG, & Drizzle ORM**
- Automated & deployed **mock interview** Q&A, reducing **70%** manual effort with **Gemini & PostgreSQL** efficient queries
- Collaborated in a team of **5** to deliver high-performance functionality via continuous **agile** development methodologies

President and Software Engineering Technical Session Lead, SJSU Hoplite

February 2022 - May 2024

- Led **Java & Python Data Structures & Algorithm** coding workshops mentoring **10+** students in quality code standards
- Refined computer science programming proficiency and analytical problem-solving skills with excellent communication

Leadership Academy Participant, Raytheon Technologies x Girls Who Code

August - December 2023

- Implemented climate awareness web app with **3** engineers via **HTML, CSS, JavaScript ES6, React, & Git version control**
- Accelerated **70%** engagement, delivering project on time with requirements via **Software Development lifecycle (SDLC)**

Software Product Sprint (SPS) Participant, Google

May - August 2022

- Created study spot review app & impressive UI/UX in team of **4** via **Google Cloud, Java Servlets, JavaScript, HTML, CSS**
- Integrated **Charts API** for data visualization, accessibility & **asynchronous programming** via **App Engine** for refined use

Good Tech Scholars Program (GTSP) Participant and 2nd Place Winner, IBM

July - August 2022

- Delivered **job applications system** using **React, Node.js, Express.js, and IBM Cloudant** for performant system scalability
 - Stood **2nd** in **11** teams (**60** engineers) with core software design principles & infrastructure, presenting app to IBM staff
-

PROJECTS

"Spotlight", Game Builder Challenge Participant (Hackathon, Ongoing Dev), AWS

December 2024 - February 2025

- Developed a desktop web game with **90%** retention rate using **React, TypeScript, AWS S3, Amplify, and Amazon Q AI**
- Optimized back-end **distributed system** performance by **25%** via **DynamoDB database, API Gateway, and AWS Lambda**
- Utilized **object-oriented design** principles to write efficient, clean, and maintainable code with **AWS** cloud architecture

"SafeHer", She Builds AI Participant (Hackathon, Ongoing Dev), Google

October - December 2024

- Designed AI-powered safety web application via **React frontend, JavaScript, MongoDB NoSQL database, & Gemini LLM**
- Built **REST APIs** for **90%+** positive experience by improving, maintaining, & debugging user-centric interface features
- Ensured high reliability via **Jest unit/integration testing & Postman**, to troubleshoot/fix technical issues, & **Docker**

"Online Virus Checker", Software Engineer, SJSU's Server-Side Web Programming Course

March - May 2024

- Built a secure antivirus web solution in a team of **2** via **PHP, MySQL database, & XAMPP**, adhering to security guidelines
- Enhanced system resilience, reliability & file upload security by designing authentication & secure session architecture

"Flask131", Full-Stack Software Engineer Team Lead, SJSU's Software Engineering I

November - December 2022

- Managed team of **4** for social app's deliverables via **Python, Flask web framework, SQLAlchemy, Bootstrap, REST APIs**
- Refined usability by **40%** via **information retrieval** features, **Agile Software Development**, code reviews, & documentation
