

SAI ABHIRAM GODASI

DATA ANALYST

(551) 465-6067 | saiabhiramgodasi@gmail.com | [LinkedIn](#)

SUMMARY

Results-driven Data Analyst with 4+ years of experience in healthcare and finance, specializing in predictive modeling, KPI dashboards, and data-driven decision support. Proven track record of improving clinical and financial outcomes by leveraging advanced SQL, Python, Excel, Power BI, Tableau and Snowflake. Adept at translating complex datasets into actionable insights to support high-impact business decisions.

TECHNICAL SKILLS

Methodologies:	SDLC, Agile, Waterfall
Languages:	Python, R, SQL
IDEs:	Visual Studio Code, PyCharm, Jupyter Notebook
Packages:	NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, TensorFlow, Seaborn, dplyr, ggplot2, Keras
Visualization Tools:	Tableau, Power BI, Advanced Excel (Pivot Tables, VLOOKUP)
Cloud Technology:	Amazon Web Services (AWS), Microsoft Azure
Database:	MySQL, SQL Server, PostgreSQL, MongoDB
Other Skills:	ETL Tools, SISS, SSRS, EDA, Machine Learning Algorithms, Probability distributions, Confidence Intervals, ANOVA, Mathematics, Hypothesis Testing, Regression Analysis, Linear Algebra, Advance Analytics, Data Mining, Data Visualization, Data warehousing, Data transformation, Data Storytelling, Association rules, Clustering, Classification, Regression, A/B Testing, Forecasting & Modelling, Data Cleaning, Data Wrangling, Jira, Git, GitHub, Windows, Linux, Mac OS

EXPERIENCE

HCA Healthcare, Texas | Data Analyst

Aug 2023 – Present

- Developed a predictive model using machine learning techniques to identify **healthcare billing claims** at high risk for rejection or delayed reimbursement, enabling targeted interventions and improving revenue cycle efficiency.
- Analyzed a comprehensive dataset of over **40,000 healthcare billing claims** extracted from Electronic Health Records (EHRs), identifying key patterns in billing errors, payer denials, and reimbursement delays, enhancing prediction accuracy by 25%.
- Streamlined analytics workflows by querying **EPIC-derived EHR data** in **Snowflake**, reducing processing latency by 30%.
- Utilized **Microsoft Visio** to create **data flow diagrams, system architecture, and process maps**, facilitating clear communication of ETL workflows, data integration processes, and healthcare analytics solutions to technical and non-technical stakeholders.
- Applied advanced **Microsoft Excel skills**, leveraging formulas (**VLOOKUP, INDEX-MATCH, SUMIFS**), **PivotTables, Power Query**, and Macros to enhance claims analysis, financial reporting, and patient readmission trend assessments.
- Collaborated with clinical teams to **refine predictive algorithms**, applying regression analysis and **machine learning methods** from Scikit-learn and TensorFlow; delivered actionable insights that addressed the top three predictors of patient readmission.
- Developed **Power BI dashboards** to track denial rates by payer mix, medical specialty, **DRG group**, and region, giving revenue cycle leaders real-time visibility that helped reduce denial response lag by 40%.
- Integrated **Salesforce** data with healthcare analytics workflows, leveraging patient and claims insights to optimize predictive modeling and operational reporting.
- Ensured **HIPAA compliance** across all data handling, storage, and reporting processes, safeguarding patient data privacy and security.

Birlasoft, India | Data Analyst

Aug 2019 – Jul 2022

- Contributed to the design and development of a **Credit Scoring Model** that incorporates **alternative data sources** (e.g., social media, payment histories) to assess creditworthiness, improving the accuracy of credit assessments by **20%**.
- Extracted and manipulated over **1 million rows of diverse financial data** using **SQL** from various databases, ensuring comprehensive and accurate data collection to inform credit scoring decisions.
- Employed **Python** and **Pandas** to conduct **data cleansing processes**, including outlier detection and handling of missing values, enhancing overall data quality by **30%**.
- Conducted cohort analysis using advanced **SQL queries** to identify and evaluate consumer behavior patterns over time, providing insights that informed the development of the credit scoring algorithms.
- Collaborated with senior analysts to implement **predictive models** using **Scikit-learn**, resulting in a **15% increase** in accuracy for credit scoring based on historical payment data and alternative data sources.
- Designed interactive dashboards in **Tableau** to visualize key metrics such as credit scores and risk assessments, improving stakeholder engagement and facilitating informed decision-making.
- Utilized **Azure** services **Azure Data Factory** to optimize data processing workflows and **Azure Machine Learning** for model deployment, resulting in improved **scalability** and **performance**.
- Defined and monitored **5 key performance indicators (KPIs)** related to credit scoring accuracy, including predictive power and model performance metrics, enhancing strategy evaluation.
- Leveraged **advanced Excel features**, including **Power Query** for data transformation, macros for automating repetitive tasks, and pivot tables for summarizing key financial metrics, improving the efficiency of reporting and analysis.

EDUCATION

Master of Science in Engineering Data Science – University of Houston, Texas, USA

Bachelor of Technology in Electronics & Communication Engineering – Vellore Institute of Technology, India

CERTIFICATION

- AWS Cloud Practitioner**
- Tableau Desktop Specialist**
- Microsoft Certified Azure Fundamentals**
