SUMMARY

Results-driven Data Analyst with 4+ years of hands-on experience in data analytics, business intelligence, and data-driven decision-making. Proven ability to transform raw data into actionable insights using tools like SQL, Python, Tableau, and Power BI. Skilled in statistical analysis, data visualization, and ETL processes. Strong collaborator with cross-functional teams and stakeholders to drive operational improvements and strategic outcomes.

EDUCATION

Master of Science in Information Studies

Trine University, Michigan | Jan 2023 – Dec 2024

TECHNICAL SKILLS

- **Languages & Scripting:** Python, R
- **Data Wrangling & Analysis:** Pandas, NumPy, Excel (Advanced), Google Sheets
- **Data Visualization:** Tableau, Power BI, Matplotlib, Seaborn, Plotly
- **Databases & SQL:** MySQL, PostgreSQL, MS SQL Server
- **Data Warehousing:** Snowflake
- **ETL & Automation:** SQL-based ETL, Python scripting, Airflow (basic)
- **Statistical Methods:** Hypothesis Testing, Regression Analysis, A/B Testing
- **Tools:** Jupyter Notebooks, Git/GitHub, REST APIs
- **Cloud Exposure:** AWS, GCP (basic familiarity)

CERTIFICATIONS

- Google Data Analytics Certificate
- Microsoft Excel by LinkedIn Learning

PROFESSIONAL EXPERIENCE:

Company Name: Cognizant service

Designation: Data Analyst

Duration: February 2019 – December 2022 | Hyderabad, India

- Worked on a U.S.-based project for a leading restaurant chain, specializing in fraud risk detection involving servers and managers using advanced analytics with SQL, SSIS, and Power BI.
- Conducted biweekly data processing, including validation, creation of staging tables, and execution of test cases to ensure accurate risk score calculations.
- Analysed data across multiple KPIs to identify early signs of fraud, enabling reduced financial losses and enhanced business security.
- Built and maintained interactive Power BI dashboards with real-time data refresh, enabling accurate reporting and decision-making.
- Delivered deep data analysis on 25,000+ user phone records monthly, resulting in a 10% reduction in on-field development costs.
- Utilized tools such as Net Cracker, Insight, and DT to analyze user service data (TV, Internet, Phone plans, Billing) and derive actionable insights.
- Generated and distributed biweekly analytical reports to clients and internal stakeholders, validating user connection and billing data.
- Led the optimization of dormant ports for new connections, achieving monthly cost savings of \$40,000.
- Collected and integrated data from Excel, Databases, Flat Files, Web Applications, and AWS S3 buckets to transform raw data into meaningful insights.
- Developed 50+ reports and dashboards (Sales, HR, Finance, Analysis) using SQL, Power BI, SSRS, SSIS, and DAX, driving business intelligence initiatives.
- Cleaned and pre-processed large datasets using Python (Pandas) and SQL, enhancing data quality and reducing processing time by 25%.
- Identified and monitored 10+ critical KPIs aligned with business goals to track performance metrics effectively.
- Leveraged Power BI Server to collaborate with stakeholders on live data, fostering transparency and faster feedback loops.
- Worked cross-functionally to streamline data collection, resulting in a 25% reduction in report development time.
- Partnered with departments including Marketing, Finance, and Operations for deep-dive analyses, supporting budget optimization and campaign targeting.

Company Name: Deloitte

Designation: Development Intern

Duration: April 2018 – July 2018 | Hyderabad, India

- Designed and developed interactive Power BI dashboards to support internal business insights and performance tracking.
- Conducted usability testing and gathered stakeholder feedback to improve the functionality and design of internal reporting tools.
- Used SQL for ETL operations, enhancing query performance by 20% and improving dashboard responsiveness by 45%.
- Participated in the early stages of dashboard development lifecycle, contributing to layout design, data modelling, and testing.

PROJECTS:

Sales Forecasting Model

- Built a predictive sales forecasting model using Python (scikit-learn), achieving 95% accuracy.
- Enabled better inventory planning and budget allocation.

Customer Segmentation Analysis

- Performed cluster analysis on customer data, identifying key customer segments to target in marketing campaigns, resulting in a 10% increase.
